DALLAS TO HOLD FOURTH TWO DAYS

(Special Dispatch to The Journal.)

Dallas, Or., May 31.—The finance committee appointed to solicit funds for the Fourth of July celebration is meeting with great success. In one evening's work \$500 was subscribed by merchants and business men. The committee expect to raise nearly \$1,000 for the two days' celebration. "Timon Ford of Salem will deliver the annual address to the pioneers July 3. The orator for the Fourth has not yet been selected. Two bands will be engaged for both days, and each afternoon will be given over to sports and games. About \$200 will be spent for fireworks, insuring a good electrical display on the night of July 4. The Goddess of Liberty will be appointed by the executive committee, thus doing away with the voting proposition entirely. Dallas is enjoying the most prosperous year in her history, and the business men are going to respond liberally to make this the biggest celebration ever held in Polk county.

BAKER CITY TAKES IN NO BAD COIN

Baker City, Or., May 31.—The discovery by government officials of numerous counterfeit coins in eastern Oregon has caused many people in this section to become uneasy for fear of having some of the spurious and money-forgers which leaves room for suspicion that it might be floating in any community in the eastern part of the state. The matter has been investigated in so far as it pertains to Baker City, and the result is most satisfactory, as not one of the banks of this city has taken a counterfeit coin and none is familiar with the location of the bogus money. However, cashiers here are using unusual care in the examination of money offered.

COLLEGE EIGHT RACE ON TODAY

Will Be First Contest for Eight-Oared Championship of the Pacific Coast.

STANFORD HAS BEATEN BERKLEY

Race Will Be Rowed on Lake Washington, Over Four-Mile Course—Comparison of Crews.

(Special Dispatch to The Journal.)

Seattle, May 31.—The first eight-oared rowing championship of the Pacific coast is the prize for which crews representing the University of Washington and Stanford university will struggle on Lake Washington this evening. Stanford has already proved her superiority over the University of California.

The race will begin at 6 o'clock and be over a four-mile course. Everything considered, Stanford seems to have slightly the better chances for the race this afternoon. Her men are more experienced and in better condition. Saylor of the University of Washington crew is convalescing from an attack of quinsy, and big Kirby, the heaviest man in the boat, is suffering slightly from the same disease.

Washington has much better facilities for practice than Stanford, and this may tend to offset the advantage the visitors have in health and experience. There is some difference in the stroke of the two crews. Washington's stroke is long and sweeping, while Stanford's is shorter and more choppy. In rough water the latter will find her stroke very advantageous. If the water is smooth, Washington's stroke will be more effective. Stanford's form is not so good as Washington's, as the men do not pull so evenly.

Zimmerman, the visiting captain, is the Washington man, among whom Captain Gloster is the best water man. Washington has been practicing for a long race all season and will probably have more endurance than her opponents, while the Crimson oarsmen are not so used to long sprints and would be more at home in a shorter race. This, then, is an advantage for the U. of W.

It is thought that fully 30,000 persons will witness the big contest. Boat races here before have drawn crowds numbering in the thousands and there is every reason to believe that today's crowd will surpass all others.

FREE BOOKLET ON BRIGHT'S DISEASE AND DIABETES

We desire to place in the hands of those afflicted with Bright's Disease or Diabetes a 36-page pamphlet that is saving human lives. It is not an ordinary pamphlet, but is principally made up of reports of scientifically conducted tests in a large variety of cases, showing 97 per cent of recoveries in these hitherto incurable diseases.

This booklet is for thoughtful people who can discriminate between common patent medicine literature and a carefully prepared report of a patient, serious and profoundly important investigation.

The specifics employed in these tests are known as the Fulton Compounds, and the results obtained prove conclusively that these dreaded diseases so long fatal have at last yielded to medical science. The pamphlet is free.

When to suspect Bright's Disease—weakness or loss of weight; puffiness ankles, hands or eyelids; dropsy; kidney trouble after the third month; urine may show sediment; falling vision; drowsiness; one or more of these.

In Diabetes the distinguishing feature is, weakness with great thirst and at times voracious appetite.
