

# GOVERNORS WHO REBELLED AGAINST FEDERAL INTERFERENCE IN BUSINESS DEVELOPED TO USE ALL

## Assassin Had Good Room and a Special Cook in Prison.

### CROSS-EXAMINATION OF WITNESS IS FINISHED

#### On the Stand for Six Days Without Breaking Down—Used His Influence With the Governor to Save Murderer From Gallows.

(By John Nevin.)  
(Special Dispatch to the Journal.)  
Boise, Idaho, June 12.—When the trial resumed this morning Richardson at once plunged into a series of questions designed to bring out every detail of Orchard's movements just prior to the Steuenberg tragedy. It was plain he desired to impress the jury with the fact that Orchard was broke and realizing his former partners in the Couer d'Alene district had made fortunes which he would have participated in if he had not had to leave the state because of Steuenberg had caused him to murder Steuenberg without suggestion from anyone.

When asked if he had not told Jack Morfit in Wallace that he was going to get sound medical opinion into the country Orchard said no.

He thought he might have said something about a smuggling proposition but he could not remember.

**Robbed Banker.**  
Before he and Simpkins started for St. Joe the latter gave him \$100 which he claimed was sent by Hayward. He admitted that he had borrowed \$100 from the bank of St. Joe and that night broke open his cash register and stole \$100.

Before reaching St. Joe Orchard and Simpkins went to Spokane and stayed three days at the latter's home. Then he went on to St. Joe and hunted for a woman named Alice.

He and Simpkins went direct to Caldwell. He stayed there three weeks while Simpkins went to Silver City and Halley. Orchard returned to Caldwell and stayed three days at the latter's home. Then he went on to St. Joe and hunted for a woman named Alice.

He and Simpkins went direct to Caldwell. He stayed there three weeks while Simpkins went to Silver City and Halley. Orchard returned to Caldwell and stayed three days at the latter's home. Then he went on to St. Joe and hunted for a woman named Alice.

confession, each time to go to court or to go before the grand jury.

**Worked Upon Adams.**  
After his confession, Steve Adams was arrested and locked up in a cell in the room with Orchard. He knew beforehand that Adams was to be arrested. He told the warden that he would do the best he could to get Adams out of the cell. Adams was to be taken to work Adams. He admitted that he had led Adams in his cell.

Orchard showed a slight semblance of emotion several times today and Richardson made the questions as cutting as possible, trying to break him down, but failed utterly.

**Most Favored Prisoner.**  
McFarland, he said, had told him he could not promise immunity, but would try to get him out of the prison as soon as possible. He said he would see him later. The governor was to see him, and has visited him seven or eight, possibly more times. Gooding told him, he would see him later. He said he would see him later. He said he would see him later.

Orchard admitted that he had been furnished with an entire new outfit of clothing for the trial. He had been furnished with an entire new outfit of clothing for the trial. He had been furnished with an entire new outfit of clothing for the trial.

Richardson announced that he was through with the direct cross-examination and stated that he had 150 witnesses, many of whom would impeach the witness, and asked if he could recall the witness and the court asked.

Howley then produced the bomb which was planted in front of Judge Goddard's house. Orchard identified it.

**Next Witness Cook Testifies.**  
The next witness was Mrs. Sadie Swann, of 1735 Grand street, San Francisco. She worked for Fred Bradley as a domestic. Her testimony was corroborative of Orchard's regarding his movements. She met Orchard in Giblin's store and knew him as Barry. She could not remember how long he was with her, but she was sure she had seen him several times. She took the milk from the door. Bradley tasted it, said it was bitter and threw it away. She finally turned it over to the dairymen, who took it away. This was three days before the explosion. It was 20 minutes before the explosion that she got the paper.

Carroll cross-examined her, but nothing material was developed. She was brought into the case by a Pinkerton detective who asked her if she did not remember all the incidents in connection with the poisoning of the milk and the explosion.

Oliver Cook, the San Francisco milk man, next told of delivering the milk and declared it was all right when he left it there on November 14, 1904. He was the last witness.

**Score From Flashlight.**  
Orchard denied he had visited Boise contractors and tried to sell them a non-explosive explosive. About this time the photograph started flashing and Boras and Richardson both jumped and deputies and detectives dragged their hands to their guns, but dropped following the reason for the noise was apparent.

Orchard said that he chose bombs instead of a revolver for the killing because he was confident he would get away. He went to Nampa at once with his bomb, intending to put it up in the bank, but it did not get a chance. The fact that many others might have been killed, and that Orchard had no impression of his explosion made no impression on him.

**Bad Pepper for Dogs.**  
He denied that as soon as he had exploded the bomb he had gone to his bedroom in order to put things around to prove that he had not made a bomb. He said that he was trying to make a bomb, but it did not get a chance. The fact that many others might have been killed, and that Orchard had no impression of his explosion made no impression on him.

**Brought to Boise.**  
He was held 18 days in Caldwell and then brought to Boise. After three weeks' confinement Detective McFarland was ordered to take Orchard to Boise and never had any business arrangements with him. He remained alone with McFarland in his cell.

McFarland told him about his experiences with the "Molly Maguires." First, however, he desired to discuss the Bible which he had read in the prison. He had talked about the Western Federation, but later stated that he might have said something about it.

McFarland also mentioned a number of other persons who had turned state's evidence and finally told him that all tales were fair with their best witness.

Orchard became angered at Richardson's apparent attempt to show that McFarland was willing to do anything to secure a conviction. Orchard said that he had stopped all crimes after a year or so.

The witness did not know that prior to McFarland's going to the United States, only three murders had been committed, but while he was there, 23 were committed.

**Contemplated Suicide.**  
Orchard admitted that he contemplated suicide long after he had made his confession and his desire to die. He said that he had contemplated suicide long after he had made his confession and his desire to die.

He said that he had contemplated suicide long after he had made his confession and his desire to die. He said that he had contemplated suicide long after he had made his confession and his desire to die.

He said that he had contemplated suicide long after he had made his confession and his desire to die. He said that he had contemplated suicide long after he had made his confession and his desire to die.

## Schmitz Jury Expected to Decide Fate of Mayor in Short Time After Leaving Courtroom—Conviction Is Predicted by Spectators.

(Journal Special Service.)  
San Francisco, June 12.—The closing argument of the defense in the Schmitz case was begun this morning by Campbell before an audience of 3,000 people. He began by pointing out that none of the French restaurant keepers testified that they had been threatened. Then he made an attack on Reagan who, he declared, first fought the restaurants on his own initiative and then voted in favor of their licenses.

"Reagan comes into court, forgets the essential and magnifies the real," he said. "If it was true that the French restaurant were running contrary to law and none of these restaurant men denied it, then there could have been no threat. Take the testimony of Reagan and see if you can find the language of a threat there and if you cannot find threat you must find the mayor not guilty."

**Best's Confession Foretold.**  
Campbell declared Ruef's confession was forced from him by methods worthy of the inquisition and that as it was a forced confession it should not be given weight. He declared there was not a scintilla of evidence to prove that the mayor and Ruef ever held a moment's conference with regard to the restaurants. While Campbell spoke the mayor sat with his head in his hands.

In closing Campbell said: "Gentlemen of the jury, in the name of God, don't make a mistake. Don't send the wife and children of this man out into the world with the mark of Cain upon their brows. Take the case from the records and do your duty according to the dictates of your conscience."

Campbell closed at noon and a recess was taken until 2:30 o'clock, when Reagan will make the closing argument for the state. He will speak for two hours. The judge's charge will take about an hour. It is believed that the jury will render a verdict and it is the general expectation that it will find Schmitz guilty.

**Abused Wife Asks Court for Relief From Husband's Cruelty.**  
Washington, June 12.—W. W. Cotton, chief counsel of the O. R. & N. Co., was the witness today against the western Washington petitioners in the joint rate hearing and gave figures showing that the O. R. & N. delivered to the Oregon Short Line 8,900 more loads than it received from it in 1906; that for every four loads moved east, the Navigation company had to haul one empty car west. In the lumber business, he stated, in the past five years, going a witness, Huntington gateway had increased 117 per cent; general business eastbound had increased only 23 per cent. Out of 28,000 loads eastbound, 18,000 was lumber.

Cotton filed a table of rates to various points, showing that among a vast mass of important details, the rate for the O. R. & N. was generally higher than that of the other lines. He also stated that the rate for the O. R. & N. was generally higher than that of the other lines.

**No New Equipment.**  
The joint through rate case has developed information tending to show that the Northern Pacific's present plans for betterment of way, additional trackage, increase in equipment, will not be carried out. The rate hearing, which is now in progress, is expected to continue for some time.

**Always a Car Shortage.**  
Commissioner Cockrell said to Woodworth that the railroad is in a bad way. He has brought to pass existing conditions of car shortage. If the railroad don't pay more for a good price for their cars, they will catch up with traffic demands.

**Kept Cousin Out-Lawed.**  
For enticing his 17-year-old cousin, Rachel Harvey, away from home and encouraging her to remain away, Joe Barney has been indicted in the circuit court for contributing to the girl's delinquency. Barney is about 25 years of age. It is said that he encouraged the girl to stay away from home until late in the night.

**Ruby Will Not Go to Jail.**  
A Ruby, charged by 18-year-old E. Bowers with a statutory crime, pleaded guilty this morning and was sentenced to the county jail and pay a fine of \$100. The jail sentence was suspended during good behavior.

**John Conrad Is Arraigned.**  
John Conrad was arraigned before Judge Cleveland in the circuit court this morning. He was charged with a disorderly conduct at 236 Davis street. He was allowed until Saturday to plead.

## Development League Will Review Progress of Oregon—Large Attendance Expected to Attend From All Over the State.

(Special Dispatch to the Journal.)  
Seattle, Wash., June 13.—The steamship Ohio of the White Star company collided with a submerged iceberg at Port Safety at 3 o'clock yesterday morning and at last accounts was sinking in Nome roadstead. Two white men and one Chinese were drowned and many other persons who jumped into the sea from the badly damaged ship had narrow escapes.

The stricken ship, with a great hole in its bow, backed off the ice field and made way to Nome.

The Ohio struck the sunken ice with a crash and one was killed and her forepeak almost immediately filled with water. A panic followed and a rush was made for the lifeboats. In the confusion the davit lines were cut and the boat was dropped prematurely and three dozens of its occupants out into the sea. Others jumped from the ship, which all supposed was going down immediately. Passengers and crew lost their heads and in all about 20 persons either were thrown or jumped into the water. All but three were rescued. The name of but one of the drowned persons, Otto Anderson, has been learned.

**Officers Kept Heads.**  
Officers of the ship kept their heads, but were rather slow in getting the situation in hand. The water-tight bulkheads of compartments one and two were closed, confining the water in the forward part of the ship and preventing her from sinking immediately. The captain, Captain Brown, First Mate Mills, Chief Engineer Raymond and Purser Allen, disasterous loss of life might have resulted.

The ship returned to Nome where a committee was appointed by Captain Brown to survey the vessel.

## Flower and Fiesta Committee Designates Saturday, June 22, as Date—Automobile Parades and a Night Fire Run Spectacular Features of the Occasion.

Saturday, June 22, will be a fiesta baseball day. In the afternoon there will be an automobile parade, under the auspices of the Flower Mission day nursery. At 3 o'clock the game will begin on Multnomah field, between members of the bankers league on one side and doctors and lawyers on the other. All are ex-college baseball men and society will be out in force. All arguments with the umpire will be attended to by the lawyers then and there, and the doctors will come in handy when a 200-pitcher presents trouble from even trying to steal bases.

**Spectacular Run.**  
At night Yamhill street will be darkened, all street lights being turned out, and with red fire blazing along the sidewalks the fire department will make a spectacular run.

After this rousing feature the first game of night baseball ever played on the Pacific coast is scheduled for Multnomah field between the railroad men of Portland and their fellow railroaders of Spokane. The Portland Railway, Light & Power company is to have the field as light as day with arc lights. The ball used will be white and of larger size than those used in regular games.

The solid gold button to be given as a prize for the finest dozen buds of the "Portland rose," technically known as the "Caroline Testout," to be delivered at the Forestry building Thursday, June 13, before 12 o'clock.

The committee has decided on a button made of gold of various tints. The flower will be of reddish and pinkish gold, while the leaves will be of greenish colored gold. The button will be an exhibition of Friedlander's window this week.

**Award Committee Chosen.**  
The committee to judge the roses, select the finest dozen "Portland roses" and award the first Portland flower was selected today by E. B. McFarland, secretary of the fiesta. The members were: E. B. McFarland, chairman; J. W. Bates, secretary; and J. W. Bates, secretary.
