All Sorts of Troubles Confront Growers of Hops This Season—Lice and Spiders Are Now Reported as Infesting Yards.

LIGE AND SPIDERS

More Difficulties Confront Producers All Over the Coast This Season.

Today's market features:
Lice and spiders in hopyards.
Hood River strawberry production.
First car cantaloupes in.
Egg market at 30c flat.
First car new red onlons in.
Sensational price for store butter.
Salmon fishing to stop tomorrow.
Cheese market better than supplies.
Temato market is lower.
Currants appear along the street.
Poor demand for strawberries.
Oregon string beans arriving.
Large receipts of peaches.
Dressed meat market holds.

One thing after another seems to appear to make matters worse for the hop producer this season. First it was an extremely bad winter during which the yards suffered materially from the cold, then it was the missing hills; then the high price of materials entering into hop enture. Then again low prices offered for hops and the high cost of labor, with the consequent scarcity of the latter. Now with the remarkable long stretch of cool and rainy weather for this period of the year, the growers troubles have been multiplied by the coming of great numbers of vermin into his yards. Samples of hops brought to this city for the inspection of The Journal this morning clearly showed the presence of lice in great numbers. To add to that there was almost a certainty that red spilers were in evidence to some extent for the vines had that appearance.

More Troubles for Hop Growers.
Lice, red spiders, high and scarce laber, unfavorable weather and low prices fored are not sufficient to add to be weight on the already burdened rowers for a new trouble—one that is not prominent of all—confronts them. Where will they get money for picking? May a few of the Pacific coast hopsrowers are in a position to go through picking time without the ald of outside ioney. To borrow this necessary money or harvest this season is already worging producers. Some have already proached bankers for ald and have in nost instances been refused because ankers have been bit by the downward and of the hop market for two seasons and are not over-anxious to attempt it gian. This season matters are worse ian ever for 11c a pound has been the pp price paid on contracts thus far; east of them going at 9 and 10c—below as cost of production. Without the cossessry picking money everywhere on a coast prospects are not very bright of the harvesting of a bumper crop anybere this season.

Hood River Strawberry Crop.

Special information regarding the look River strawberry crop furnished H. F. Davidson, the veteran packer that city, shows that prospects are a production of \$60,000 crates in the strict this season as against \$6,000 ates a year ago. The berries sent om Hood River the fore part of the ason were rather poor but the latter it of the crop is in fine shape.

Locally, the strawberry market is in ther poor shape. Best berries are toy selling rather slowly at \$1.75 a late with most of the sales of good sit at \$1.50. Weather too cool for les.

Cantaloupe Car Arrives.

Page & Son report the arrival of the first car of cantaloupes to arrive here this season. Supplies were from Brawley California, and were in good shape. String beans are now arriving quite freely from The Dalles and are in fine shape, crowding out Californias on account of superior quality, at 10c a pound. Cucumbers coming from the same place. Selling at \$1.25 a box.

Tomato market is lower with larger supplies from California. Today \$2 for the ordinary run of trade.

Broker Hosking reports in first car of California red onlons for present season. Supplies so scarce on account of rains that other orders have been refused.

Sonsational Store Butter Price.

Sensational Store Butter Price. Sensational Store Butter Price.

To show the full strength of the ene butter market at this time it is
iy necessary to show the sensational
less that are being offered and paid
supplies by eager luyers. As high
18e is now being paid for best qualto ther values range according to
midition, Creamery butter is holding

condition. Creamery butter is holding its own.

Egg market is steady at 20c today for prime stock well candied.

Poultry raceipts were liberal today with demand steady at unchanged prices. Cheese market is better than supplies. Northern firms are very heavy buyers at this time. Shipment of 450 cases to one firm walch will arrive tomorrow have almost all been sold to the north.

The spring-summer season for salmon is the Williamette river and its tributaries will close tomorrow. Fishermen see not quite sure whether the closed season relates to shad or not but most of them intend to continue operations along the Williamette slough until more fully advised. The season on the Columbia does not close for some time and there is considerable agitation among the Williamette river fishers to have the law changed at the next session of the legislature. They charge discrimination in favor of the lower Columbia and Williamette river salmon men of organizing to fight the legislation of the lower Columbia packers. At present the claim is that all laws are made by the lower river people for their own benefit and directly against upper river fishing.

Commission selling prices:

GRAIN BAGS — Calcutta, 3c, large lots: small lots. 10c.

GRAIN BAGS — Calcutta, 9c, large lots; small lots, 10c.

BUTTER—City creamery, 25c; secmds, 21 ½c; store, Oregon, 18@19c.

EGGS—Extra fancy, candled, 29c; unandled, 19c.

WHAT DEALERS SAY

Receipts of eggs have been growing smaller of late and despite the fact that berries are now in season there has been a brisk demand and prices have firmed up quite a little. It is likely that there will be no lower prices for some time. Butter is unchanged—just as

firm as it has been for some

Hens seem to be slightly weaker and the same is true as to springs, especially the small sizes which shippers persist in sending to market despite repeated advise to not do so. Prices have been shaded quite a little on all chickens. Spring ducks (large only wanted at all) are also weaker. Hides and wool are unchanged

but old potatoes if good are selling at even better prices than have obtained in some time. Now is a good time to clean up on any that are mar-

GOLDFIELD GAINS. Laguna\$.10[8. Pick Ext. ..\$.03

Failures of brokers who are said to have held large blocks of Nevada shares as security, caused a bad break today in mine shares in San Francisco. Among the houses reported as failed are W. F. Bond & Co. and Horton & Co. of Goldfield. Another prominent firm of that camp is reported in difficulties.

In San Francisco today the failure reports caused a fresh burst of selling pressure and losses were quite bad in the leaders. With but two exceptions the entire list is down.

at Dixie. It is stated that Sam

Drumheller and George Welch

own the remaining wheat there.

Wheat opened about ic a bushel lower in Chicago this morning, with more favorable crop reports. Liverpool was dull and slow and this forced further liquidation of long wheat in Chicago. The closing today was 214c under Thursday. Thursday.

Standpatters to Stand Back of Senator Knox for Presidential Candidacy.

(Washington Bursau of The Journal.)

Washington, June 14.—That the tariff stand patters purpose to back Benator Knox for the presidency becomes plainer every day. Now that the utterance of the Harrisburg state Republican convention on the tariff has been earefully canvassed, the politicians are finding in it nothing to indicate that, so far as Pennsylvania Republicans are concerned, there is hope for real tariff reform. It was expected that the Harrisburg convention at least would declare for tariff reform in some manner; at least, would say that the tariff should be reformed at some time in the future, as the last Republican platform proclaimed, "when it may be done with due regard for the maintenance of American industries," or words to that effect.

effect.

But so pat did the Pennsylvania Republicans stand that they avoided even a faint reference to tariff reform. Indeed, they even went so far as to inderse President Roosevelt and quote from one of his utterances in a manner to hint that the president himself is a standpatter.

LEAVE BUDS ALONE; CUT OFF BLOSSOMS

F. V. Holman, perhaps the leading expert on roses in Portland, said today that the stormy weather of late had so damaged the flowers that all injured blossoms should be at once cut off. The buds, although even if the tips were slightly affected, should be left slone. The ground should not be disturbed while it is so wet, but if it gets dry before flesta it should be loosened slightly around the but in the short time remaining should not be cultivated.

"To get the best results," said Mr. Holman, "leave the bushes alone, except to cut off the fullblown and injured roses. For anything else the time is too

FENDER TESTS WILL BE MADE TOMORROW

Fender tests will be made by the Portland Railway, Light & Power company tomorrow morning at 9 o'clock at the Savier-street barn. At that time tests will be made of a number of models submitted for consideration and adoption by the company. The management of the street railway company is now trying to select a fender which will protect the lives of persons who may happen to be caught in front of the cars. The move has been hastened by the 30-day limit placed upon the company by District Attorney Manning in which the company is to have all its cars properly equipped with safety appliances.

WE CURE WEAK MEN!

VARICOCELE

Varicocele is a treacherous and subtle disease, and, when neglected, it is surprising, and to those who do not understand the nature of the same is almost incredible, how many and how serious Diseases and Nerve Weaknesses may arise from a comparatively slight Varicocele. Not only the vital system itself is robbed of its nourishment and strength, but by s-mrathetic irritation, where the same has been present for any length of time, the entire Nervous System, as well as the brain, has been drained. Varicocele causes more unhappiness in men and makes more unhappiness in men and makes more unhappy homes than all else combined, therefore no man should continue to suffer the pangs of remors. that accompany the lot of the victim of these diseases, or will surely be his lot if he neglects himself, when we are daily curing the most complicated cases without pain, loss of blood or detention a single day from business.

BLOOD POISON

(Primary, Secondary, Tertiary, Hereditary.)

Are you in the clutches of this nertil, life-consuming disease, allowing yourself to drift on, like a ship without a rudder, to a certain and swful death? Not for yourself alone, but for your posterity, why not have this "King of All Maladles" permanently eradicated from your system by a method that has given new life to hundreds in your very name condition? Investigate for yourself what we are doing along the line of our specialty.

Male Weaknesses The Only Scientific

Certain Cure For Men

Men who are on the decline, and there are hundreds of them, who find they have not the ambition, vigor, manhood and strength that they well known they should have, owe it to themselves to take prompt steps to relieve a condition which ultimately leads to misery and helplessness. Although you may think your condition is not serious enough to demand the attention of an expert, still so surely as you neglect yourself the disease, which is truly a disease of the vital nerves and forces, becomes more and more complicated every day, every week it remains without attention, until in time it makes of its victim a complete nervous, vital and mental wreck. We cure this by methods exclusively our own and does not detain you from business at all.

we are daily curing for life the most obstinate and long-standing cases without pain or a single day's less from business? Investigate for yourself what we are doing for others suffering just as you are.

Until within recent years there has been but one positive cure for this disease—cutting—but the dangers accompanying this procedure necessitated the sceking, of other methods. The operation method has succeeded admirably when properly done, and we will gladly perform the operation where, the patient so desires, but why undergo the danger, pain and forebodings of an operation when there is another way to reach the very same results? It is not necessary to perform any operation, as we will cure it without any surgical procedure.

INVESTIGATE OUR METHODS AND LEARN THAT WE ARE ALL CLAIM TO BE, AND WHEN YOU PLACE YOUR CASE IN OUR

Judge My Ability by My Success &

I do not wish people to judge my work merely upon what I say about it. I want them to note the evidences to prove my statements correct. The proof of a physician's ability is to be found in the results he obtains, and though I am not at liberty to supply individual names of patients as references, the marks of superior skill and services are so prominent and conspicuous as to render my doing so unnecessary. Sixton were of success and constant growth of practice is certainly a practical demon-Estimate for yourself my volume of practice as compared with the practice of other western specialists. Is there the slightest probability that if unable to back up all my claims, I would have won and retained the foremost place among physicians treating men? Could I fail to cure and yet succeed as I have? Have you ever heard of promise of mine remaining unfulfilled, or of one of my patients being dissatisfied with the treatment received? Consider these things and then come and talk with me in regard to your case. I am always willing to wait for my fee until a cure is effected.

Men's Diseases Only

Be sure your cure is thorough. Not one of my patients has ever had a relepse after being discharged as cured, and I cure in less time than the ordinary forms of treatment require.

SPECIFIC BLOOD

POISON. No dangerous miner-als to drive the virus to the interior, but harmless blood-cleasing remedies, that remove the last poisenous taint. What Weakness is and How I Cure It

"Weakness" is merely a symptom of chronic inflammation in the prestate gland, brought on by early dissipation or by the improper treatment of some contracted disease. A complete and radical cure is, therefore, a question of restoring the prostate gland to its normal state, and this I accomplish promptly and completely without the use of internal remedies. My freatment is a local one entirely, and has been proven absolutely effective by thousands of tests. I am convinced that by no other methods can full and permanent restoration of strength and vigor be accom-

VARICOGELE Absolutely painless treatment that cures completely in one week. Investigate my method. It is the only thorough scientific treatment for this disease being emplayed.
