Ex-Governor Peabody of Colorado, in Portland on a Visit, Says Self-Confessed Assassin Is a Wonderful Criminal With a Remarkable Memory.

**BELIEVES ORCHARD'S STOR** 

James H. Peabody, ex-governor of Colorado and the man whose life was so earnestly sought by Harry Orchard, the chief assassin of the Western Fed-eration of Miners, is a Portland visitor. In company with Mrs. Peabody and their daughter he is tarrying at the Portland hotel viewing the beauties of the city and planning, if possible, to re-main long enough to participate in the celebration of the rose flesta scheduled for the latter part of the week. In a few days the ex-governor and his fam-ily will leave for San Francisco. Los Angeles and the other points of inter-est along the southern route back to Denver. Ex-Governor Peabody is the man who was at the helm during the turbulent times when the Western Federation of which has never been called off, though long since dead. He it was who gold which has never been called off, though long since dead. He it was who gold which has never been called off, though long since dead. states that an investigation shows that of the estate. Mrs. Dufreche declares that she has absolute proof that her father was the reticent, enigmatical millionaire who died last March in

the ticket clerk on duty that morning showed poor judgment in discontinuing to sell fickets before the leaving time of the train. O'Brien also says that the ticket agent used poor judgment in stat-ing that he would return to sell tickets for the train, which gave the passengers the impression that the train would not leave until they were supplied with tickets. The conductor's action in leav-ing the station on schedule time is ap-proved by the railway officials, and the matter has been taken up with the Hood River employe to avoid repetition. The railway commission today re-ceived a communication from C. E. Ve-lin, who recently removed from Port-land to Central Point. He makes com-plaint of an alleged overcharge on freight shipped between these two points. He states that he secured a car from the Southern Pacific for his movables and machinery at 55 cents per hundred, the minimum load to be 20,000, and that he was charged \$29 extra freight on a second-hand wood saw. The matter has been taken up by the commission wth the railway peo-ple for investigation.

## RISES HALF-HUNDRED FEET IN DRILL HOLE

Hope That Artesian Water May Be Developed Makes Rejoicing Still Greater-Water Wagon to Scrap

Madras, Or., June 17 .- There is reolding in the Madras country today. Water has been struck in the well being drilled on the Agency plain on the ranch of W. F. Magill, 10 miles north of this place, the flow being tapped at a depth of 420 feet and the water rising 50 feet in the drill hole. The drillers state that the first water brought out of the well was warm. Several ex-press the opinion that an artesian flow will be developed when the well is

will be developed when the well is called. The water was encountered in a layer composed of soft soapstone and clay and drilling is being continued in order, if possible, to get a hard bottom for the

## Whistle Blew All Might.

When the water was struck the steam whistle on the drilling outfit was tied down and blew all night, telling the slad tidings to all the residents of the furrounding country and sounding the first note of farewell to the water tank and enforced task of hauling water for all purposes.

and enforced task of hauling water for all purposes. The apparently complete success of the drilling operations on Agency plains is looked upon as a demonstra-tion of the greatest importance to this region. Water on Agency plains at this reasonable depth means water anywhere in the whole district comprising the tablelands of northern Crook county. The water problem on Agency plains was considered to include the greatest difficulties to be encountered in any locality of this section, and the success of this undertaking makes other con-templated well projects appear much templated well projects appear much more practical than they have hereto hore.

## What the Drill Penetrated.

In sinking this well the drill pene-trated about 100 feet of lava flow, then alternate layers of a formation like granite, lava and sandstone. Then about granice, lava and sandstone. Then about 100 feet of seemingly wash gravel and clay was encountered. When the bot-tom of the gravel bed had been reached the drill entered the soft soapstone formation and, after sinking a score of feet or mere in this, the waterflow was fanned.

feet or mere in this, the waterflow was tapped. The drilling operations were in charge of James Trotter, of Wapinitia, and the outfit is the property of J. Strain. This signal solution of the water problem marks the dawn of a brighter era for this, region. The ranchers can now approximately estimate the cost of securing water on their property, and can readily arrange to sink wells. The prospect of expending \$1,500 or \$2,000 in an experiment has not been attractive to them but this is now all changed. All On the Water Wagon.

All On the Water Wagon.

Persons who have not experienced the hardships of a waterless country can scarcely realize what it means. It means that unless once or twice each week the farmer hitches four horses to his water-tank and drives from three to 12 miles for water, he finds himself without this indispensable element-no water to drink, no water for his house hold needs, no water for his chickens hogs, cows, or workhorses. With fertile lands and delightful climate, and now, promise of the passing of the serious handicap of lack of water for household

and ranch purposes, the spirit of re-joicing is strong upon every resident of the district, and this baptism of

water, although subterranean, has washed away many of the sins of this country, in the judgment of the people who love it and are developing it,

CRIMINAL ACTION

# A Thoughtless Druggist.

ONLY a thoughtless druggist would offer a preparation without the signature of Chas. H. Fletcher when Castoria is called for; the "delicate, faint and flickering light" that joins baby's life to its devoted parents being too sacred, to the self-respecting druggist, to be trifled with.

For over thirty years Mr. Fletcher has given, and still gives, his personal attention to the preparation of Castoria. It has won the confidence of mothers and physicians everywhere never harmed the tiniest babe. This cannot be said of Imitations, Counterfeits and the "Just-as-good" rot.

The thoughtless druggist only offers the counterfeit because of a few pennies more profit. Any new preparation can be but an experiment, and they are experiments-mere guess work-irrespective of what their sponsors may say for them. It is experience of over thirty years, against wild and injudicious experiment.

# Wrong Food Makes Invalids

## Little Quirks and Ails are Nature's **Mild Requests to Right Some Wrong**

## One must Heed the Complaint or

Pay the Penalty

Modern folks have discovered a way to recover-by proper selection of food and drink.

Look carefully into the health of the individual who knows that "coffee don't hurt me" and you are almost sure to find some physical ail or functional disturbances-perhaps muddy complexion, weak eyes, incipient heart failure; kidney, liver or bowel disorders; or some form of weakness that shows plainly enough the cry for relief sent up from some organ of the body.

Dismissal of coffee and change to Postum brings relief and shows clearly that coffee hinders digestion. Failure in digestion means lack of good red blood and therefore a lack of food for the nerve centers. Removal of the cause will allow Nature to right herself, and Postum contains Phosphate of Potash, Albumen, etc., from the field grains which unite to form the delicate gray matter of the nerves throughout the body.

Long-boiling (see directions on package) brings out the rich flavor and snappy coffee taste-free from the nerve-racking drug-caffeine-in coffee.

licket to Miss Harrington. His work licket to Miss Harrington. His work is as interesting to the police as that of the pink domino, who terrorized the Nob Hill district last winter. Miss Harrington occupies room 338 on the third floor of the hotel and is accompanied on her visit to Portland by Mrs. Thomas B. Riter and Mrs. M. J. McCallin of Pittsburg. They are touring the coast and are returning home by way of Yellowstone park from San Francisco.

Wants Snakes Protected.

2

Wants Snakes Protected. Carmi Correspondent of St.Louis Times. At a meeting of the Melon Growers' association it was decided to adopt reso-lutions for the preservation of all snakes of the chicken and spreadhead variety in the melon belt, and the sense of the meeting was that the increase of the meeting was that the increase of the meeting was that the increase of the meeting was that the spreadhead snakes are the natural enemies of field mice and destroy scores of them each day.

The result is that small home build-ing has been greately curtailed and the ware-sagner in consequence denied the rights and privileges enjoyed by those in possession of more means. Those brave enough to build are fleeced and in the same proportion as the man who requires several thousand dollars' worth of work. The unscruppious robbery of the pub-lic by the trust and its consequent ef-fect upon the building of homes has so incensed the residents of Sellwood that a mass meeting will be held in Camp-bell's hall tonight to discuss the situa-tion and devise some means, if possible, to relieve the community from the com-bine's "bonus" and "over-charge" grafts which are paralyzing building advance-ment. of work

Councilman Wills is to preside at the
