SEE PAGE 15. You've got six days in which to think of a business phrase; read the ads, read the street cards, read the signs; beat them! \$100 if you do!

Attorneys for Nickel-in-Slot Machine Owners Contend Element of Chance Does Not Enter Into Operation of Silent Cigar Salesmen.

On the placing of a comma, and the consequent construction of a clause in the statutes, depends the slot machine question as applied to the machines known as "silent salesmen" used three months ago by Alfred Wickham in his store at 209 Washington street.

Attorney R. E. Moody for Wickham argued that because there is no comma after the word "machine" in the statute the element of chance clause refers back to it and modifies it, making it necessary to determine whether there was an element of chance in the slot machine in question.

Moody argued that if the state's contention were upheld it would mean the prohibition of nickel telephone machines, and the machines which sell gum, shoestraps or other small forms of merchandise.

The question was argued before Judge Gantenbein, who took it under advisement and said he would announce his decision some time this week.

Wickham had been fined \$25 in the municipal court and appealed to the circuit court. The question was argued on a demurrer to the indictment. If the judge sustains the demurrer there is no contention a trial will be had.

Section 1955 in full says: "Any person or persons who shall conduct, maintain or operate a slot machine or other device of like character wherein the element of chance enters, shall be guilty of a misdemeanor."

Section 1955 in full says: "Any person or persons who shall conduct, maintain or operate a slot machine or other device of like character wherein the element of chance enters, shall be guilty of a misdemeanor."
