Investors, you are the men with whom we wish to talk. You have something to invest. You want to invest it where it will bring you the largest profit. You, however, know that \$100, or even \$500, is not sufficient capital to make you a fortune if you depend on interest rates. People don't get wealth by hard work. PINCHING AND SAVING IS NOT THE WAY, yet if \$100 to \$1,000 placed in the safest investment, where values have a habit of doubling in a day, there is a positive assurance of its reaping for you a percentage of profit, and from no other investment could anyone expect as great a profit as one could out of profitable mining. Great fortunes are known to have been made by small investments and out of mining, and not out of any other kind of investment.

WE OPERATE MINES AND NOT PROSPECTS, in one of the greatest mining camps in California (Siskiyou County). It is known as a great mining place. Siskiyou County Chamber of Commerce holds the gold medal for the best gold samples in California.

## OUR RECORD

#### CAPITAL STOCK.

\$500,000, divided into 500,000 shares, par value \$1.00 each, fully paid and non-assessable. No preferred stock. No bonds.

#### PROPERTY.

The property consists of the following mineral claims: McKinley Quartz Mine, Mountain Lily Quartz Mine, Hannah Quartz Mine, Teddy Quartz Mine, Le Clair Quartz Mine, New Discovery Placer Mine, Cham-pion Quart Mine, Portwicket Quartz Mine, Electric Light Quartz Mine, Crown Point Quartz Mine, Trinity Placer Mines, and Fairfield Placer Mines, together with water rights and improvements.

#### LOCATION.

The property is located in Siskiyou county, California, about six miles in a direct line west of Yreka, California, on one of the tributaries of the Klamath river, and is situated in the Klamath river forest reservation. From the creek hottoms, tributaries of the KLAMATH RIVER, OVER \$100,000,000.00 IN GOLD HAS BEEN TAKEN.

#### DEVELOPMENT OF CHAMPION GROUP.

The main vein outcrops for 3,000 feet across the Electric Light and Champion claims. The quartz is from one to seven feet wide, and vein matter between walls in some places is 30 feet wide. Very rich ore was taken from the surface of this vein in the '60s by trenching. These cross-cut tunnels have been cut, No. I being short, and giving about 20 feet of backs. A drift of about 40 feet in length has been run from this tunnel.

No. 2 is 200 feet, with a drift of 200 feet. This drift has cut the top of a very rich ore shoot, as shown by the following assays, AND RUN-NING AS HIGH AS \$2,480.00 TO THE TON.

#### COPY OF ASSAYS. ASSAYS OF THE CHAMPION.

GOLD, \$90.00 TO THE TON.

# Selected sample from tunnel 2, taken by A. L. Hayes, secretary, GOLD, \$1,593.32 TO THE TON.

February 15-Champion Mine-Assay Record, page 19. Sample taken by O. H. Poor, 42 feet above bottom of tunnel 2, average sample, GOLD, \$140.00 TO THE TON.

## Selected sample, taken by A. L. Hayes, from tunnel 2, GOLD, \$860.00 TO THE TON.

February 22-Champion Mine-Assay Record, page 23. Sample taken by O. H. Poor and A. L. Hayes, decomposed quartz, one foot below bottom of tunnel 2, where underground stope commences. Average sample,

#### GOLD, \$198.50 TO THE TON.

Selected sample, taken by A. L. Hayes from same place as one above, GOLD, \$768.00 A TON.

For the Champion Group-Dynamo and air compressor and pneu-matic drills; an aerial tram from mouth of tunnel 3 to mill, by which ore can be carried to and dumped into our present mill at a cost of 5 cents per ton.

### OUR PRESENT MILL.

To treble the capacity of our mill, which means more stamps, more concentrators, more rock crushers and a cyanide plant, with which we will treat our own concentrates, thereby saving smelter charges. Also steam power plant, in addition to our water power, which we are now using.

#### COST OF IMPROVEMENTS.

WHILE WE HAVE BEEN AND ARE SHIPPING GOLD TO THE U.S. MINT, most of our work has been towards the development of our property, and we are now in position, with the additional im-provements, to become heavy producers.

#### PROFITS.

"Estimated income when improvements now planned are completed: Daily output of mill, 30 tons per day, at \$20.....\$ 600 600.00

(This is putting the ore at lowest possible estimate.) Total monthly mill output, 30 days.....\$ 18/000.00

#### ESTIMATED EXPENSE.

SBEFSSRI	D miners at \$3.00 per day	120.00 13.75 12.00 7.00 11.00 12.00 40.00 5.00 8.00 10.00
	Total estimated daily expense	238.75 7,162.50
	Total estimated monthly profits	10,837.50 30,050.00

A profit of over 25 per cent per annum on the par value of our stock. Yet we expect to sell only 50,000 shares out of the capital stock. Figure what the income should be to the stockholders.

#### HISTORY.

Siskiyou county is in the northern part of California and adjoins Ore-gon on the north. It is crossed from north to south by the Southern Pa-cific railroad, which gives it fine railway facilities, Yreka railroad connecting at Montague. The Champion Group Mining Company owns large water rights across which a dam has been \*constructed, with a flume leading from same to mill, which supplies the mill with water as well as power. The hills are covered with fine timber, so that all mine timber needed and wood fuel can be obtained where needed from our own property. The Champion Group Mining Company owns about five miles of fine wagon roads, built for its own use; one road runs from the mill up the mountain to the McKinley mine; another fine road runs from the mill to the Champion mine, one from the mill to the office and boarding houses, and one from the mill to the county road. This county road is one that the heavy teaming goes over from Yreka to the Happy Camp copper dis-trict, where immense copper deposits have recently been discovered.

February 27—Champion Mine—Assay Record, page 28. Sample taken by O. H. Poor and A. L. Hayes from north end of underground stope, tunnel 2,

## GOLD, \$2,480.00 A TON.

#### **TUNNELL 3.**

No 3 tunnel is a cross-cut 90 feet, and drift 200 feet, and is being run to cut the rich ore shoot which shows assays of \$2,480.00, the top of which was cut by tunnel 2. No. 3 tunnel will give 100 to 105 feet backs on this rich shoot.

#### M'KINLEY GROUP OF MINES.

The main vein outcrops across the Mountain Lily, McKinley and Teddy claims. The vein is cut by a cross-cut tunnel 298 feet and drift 300 feet. The drift shows a rich ore shoot about 185 feet wide, dipping to the south at an angle of 45 degrees. Assays made from average sam-ples taken from the bottom of the drift for 175 feet, show free milling gold \$30.00 a ton, and assays on rock taken from winzes sunk from this drift show values of \$25.41, \$30.20, \$65.00, \$120.00 and \$135.00 to the ton.

#### DEVELOPMENT WORK IN PROGRESS

On the Champion Group the drift from tunnel 3 will be run at least 1,000 feet, to cut the rich ore shoot shown in tunnel 2, and also to cut a number of ore shoots shown on the surface. This drift will give 200 feet backs for 800 feet and 100 feet for 200 feet. A tunnel will also be run on the Portwicket, and another on the Crown Point, to cut the veins on these claims.

#### WHY STOCK IS NOW BEING SOLD.

Stock is now being sold to purchase machinery, as follows: For McKinley Group-Dynamos and air compressor and a full line pneumatic drills. The cost of mining with machinery is so much less that the cost of installing machinery would soon be saved on fabor alone, and will make a handsome increase in profits to stockholders.

Siskiyou county has been noted for its great production of gold since the discovery of gold in California. Its placer mines alone have produced over \$100,000,000.00. California's great quartz mines, the Black Bear, the Morrison and Carlock, the Advance, the Gilson, the Sheba, the Spencer and many others are in Siskiyou county.

Very rich deposits of copper have been recently found in many places, At Happy Camp, west of the Champion Group Mining Company's mines, one of the largest copper syndicates in the world purchased holdings a year ago, and their development work so far shows they have as rich cop-per mines as are found anywhere in the world. The McCann claims, a short distance northwest of the Champion Group Company mines, have just been sold for \$100,000,00, without a cent of development work upon them. Heavy operators in copper predict that within a short time its pro-duction of copper will greatly add to its mineral wealth.

The Champion Group Mining Company has large boarding houses and bunk houses, with accommodations for 50 men, at the McKinley Group of mines. At the Champion group mines we have large boarding houses and two bunk houses. The buildings are well built, and have running water, insuring a good, healthful home for men.

The McKinley Group is situated about three-quarters of a mile from the Champion Group, on a direct line, or 11/2 miles on the road.

#### WHAT YOU CAN DO WITH A FEW HUNDRED DOLLARS TODAY WILL TAKE A THOUSAND IN A FEW MONTHS.

Now is the time to take advantage of this kind of offering. Subscription for stock of this issue will be received upon terms to suit. Take advantage of this first offer of stock at the first price offered. Soon to advance 25 cents per share.

LOOK INTO WHAT SISKIYOU COUNTY IS OFFERING IN THE WAY OF INVESTMENTS. IT IS GREAT, AND THE GREATEST IN CALIFORNIA MINING.

## For Bank and Other References or Terms and Prospectus Call or Write

Subscriptions will be accepted on terms to suit. Anyone buying 5,000 shares or more this com-pany will pay the expenses to the mines. And if the mines are not as represented money paid for stock will be returned and all expenses paid. No better proposition could be expected.
