Mr. and Mrs. John E. Boys Starting From Moscow on Long Horseback "In all the places I have seen there is nothing that will compare with the scenery about Portland. Along the Columbia and Snake rivers there is a sterile country, covered by rocks some of which are forbidding in their grandeur, but for genuine beauty as well as fertility none of them can compare with the Willamette valley, particularly in this county."

The trail was lost many times and the horses were slid down steep declivities covered with loose rocks. At

Riding horseback from Moscow, Idaho, to Portland, a distance of 540 miles, was the unique manner in which John E. Boys, one of the official reporters of local circuit court, spent his vacation. He was accompanied by Mrs.

They were in the saddle 13 days, and for three days after they reached home, both dreamed of riding the trail. Mrs. Boys dreamed that her horse was carefully picking its way along the top of a picket fence, and Mr. Boys in a vision saw himself riding to call upon a friend, and then pick up his animal and carry it under his arm when he entered the house, so the horse would

Citizens Decided They Wanted Insurance Companies to Rebuild.

(Journal Special Service.) Berlin, July 6 .- Thirteen prominent citizens who constituted the volunteer fire brigade of Siebenlehn, in Saxony, are in jail awaiting trial for the sys-

fire brigade of Siebenlehn. In Saxony, are in jail awalting trial for the systematic destruction of the town by fire. They plead in defense that their purpose was to improve the appearance of Siebenlehn by getting it rebuilt in better style at the expense of the insurance companies. One fireman has confessed that a definite plan for destroying the whole place had the formal sanction of the town council.

These zealous disciples of municipal splendor not only would start fires, but would see to it that none of them was ever extinguished. Individual members would claim the usual premiums from the town treasury for early arrival at the scene of the conflagration, but there was a general understanding that the extinguishing of the flames was to be merely make-believe. Anybody who really tried to save burning buildings would be set upon by his comrades and beaten until he desisted.

In order to insure the fires "spreading," the volunteers would carry burning beams into adjoining buildings, and houses, sheds and barns which failed to take fire would be hacked to pieces. Fire brigades from neighboring villages which hurried to Siebenlehn to assist the local heroes were either deprived of water or had their hose cut into short lengths. Fires in Siebelehn, moreover, were always made occasions for festivities.
