

# NEW LAWS FOR TEXAS TONIGHT

### Legislation Which Will Turn State Topsy-Turvy to Become Operative.

(Journal Special Service.)  
Austin, Tex., July 11.—Laws that are calculated to turn things in the Lone Star state more or less topsy-turvy for the time being will come into operation at midnight tonight.

The new law of which the country at large has probably heard the most is the Robertson act, which requires foreign insurance companies doing business in Texas to deposit 75 per cent of the reserves on Texas business in state depositories. It also requires a tax of one per cent on gross premiums collected. As a result of this law two thirds of the big insurance companies doing business in Texas have already withdrawn from the state and the rest will probably do likewise before December 31, on which date the first investment and deposit required by the law must be made.

Several other new laws are of a more or less radical nature and have attracted widespread attention. One of these is an anti-pass law and another places more stringent regulations on the sale of liquor in Texas. Still another requires that all proprietors of hotels, sleeping cars and other places for the accommodation of the traveling public shall furnish top sheets not less than nine feet in length and provides a penalty for failure to comply with the law.

The new law for the regulation of the liquor traffic, known as the Baskin-McGregor act, requires every liquor dealer in the state, whether wholesale or retail, to take out a new license. The new licenses are to be issued only to persons of good character who have resided for more than two years in the county where the application is made, who have never had a license revoked or forfeited and who have never been convicted of a felony.

The anti-pass law practically revokes the free railroad pass system throughout Texas. Even the state railroad commission will have to pay railroad fare, as the new law cuts off all passes for the commissioners and employees of that body. All of the railroads of the state have sent out requests to holders of annual passes and are asking that such transportation be returned to the general office for cancellation.

All Methodists!  
We still have a few pianos for Methodist homes—special rates. Reed-French Piano company.

# NEWPORT RECEIVES FURTHER ACCESSIONS

### Camp Willamette Particularly Favoured by the Learned Professors of Oregon.

(Special Dispatch to The Journal.)  
Newport, Or., July 11.—Camp Willamette has received accessions as follows: Mr. and Mrs. Kirk, Professor Matthews, Professor May Reynolds, Professor Bach, Mrs. Chapel, Miss Spigel, President and Mrs. Coleman and children, all of Salem; Professor Chambers of Forest Grove, Professor and Mrs. Hopkins of Albany, Professor Prideo of Portland, and Mrs. Hayden, Mrs. Sorenson and Miss Nora Sorenson of Harrisburg.

Mrs. Carvie Chapel of Salem has just arrived to conduct the course in primary methods at the summer school. Dr. John H. Coleman, president of Willamette university, with his family, has arrived and is at Camp Willamette, on Nye creek.

The new hall at Nye creek gave the formal opening July 4. The attendance was about 200. An orchestra of 10 pieces furnished music. The affair was a complete success.

# BETH SULLY WEDS DOUGLAS FAIRBANKS

(Journal Special Service.)  
Providence, R. I., July 11.—Miss Beth Sully, only daughter of Daniel Sully, the famous cotton king of a few years ago, was married today to Douglas Fairbanks of New York. The ceremony, which was largely attended, took place at the Sully country home, Ketchikan Ridge, at Watch Hill.

The bridegroom was formerly an actor in a stock company in New York. It is said he was obliged to give up the stage before Mr. Sully would give his consent for him to wed his daughter. He is now vice-president of the corporation which formerly belonged to Mr. Sully's brother-in-law, Colonel Thompson.

Great Reed-French demonstration sale. Startling values!  
Half past seven. See tomorrow night's Journal.

# The Pearl

That our American forests abound in plants which possess the most valuable medicinal virtues is abundantly attested by scores of the most eminent medical writers and teachers. Even the untutored Indian had discovered the usefulness of many native plants before the advent of the white race. This information, imparted freely to the whites, led the latter to continue investigations until today we have a rich assortment of most valuable American medicinal roots.

Dr. Pierce believes that our American forests abound in most valuable medicinal roots for the cure of most obstinate and fatal diseases. If we would properly investigate them, and in conjunction of this conviction, he points with pride to the almost miraculous cures effected by his "Golden Medical Discovery," which has proven itself to be the most efficient stomach tonic, liver invigorator, heart tonic and regulator, and blood purifier known to medical science.

Not less marvelous in the unparalleled cures it is constantly making of woman's many peculiar affections, weaknesses and distempers, Dr. Pierce's Favorite Prescription, as is amply attested by thousands of published testimonials contributed by grateful patients who have been cured by it of catarrhal pelvic inflammation, irregularities, prolapsus, and other gynecological troubles, is a simple preparation of natural vegetable roots, and is entirely free from alcohol and all other harmful, habit-forming drugs.

Both the above mentioned medicines are wholly made up of the glyceric extracts of native medicinal roots. The processes employed in their manufacture are especially studied with Dr. Pierce, and they are carried on by skilled chemists and pharmacists with the aid of apparatus and appliances specially designed and built for this purpose. Both medicines are entirely free from alcohol and all other harmful, habit-forming drugs.

Items for the Vacationist.  
The person who needs the vacation most is not always the one who can get away, but, as I have said before, there are many opportunities also for the one who stays at home, providing the home is in Portland.

Within easy reach are fields and streams, are trees and groves, where one may spend blessed hours of idleness and breathe in the fresh sweet atmosphere of the morning one whiffs along the pleasant river bank past the many little homes which have sprung up with almost a mushroom growth all the way from Portland to Milwaukie.

Another opportunity which is now open is that of spending a day—or several days—at Chautauque. Leaving town in the cool of the morning one whiffs along the pleasant river bank past the many little homes which have sprung up with almost a mushroom growth all the way from Portland to Milwaukie.

There are no tedious distances to be traveled; step from the car and here you are at Gladstone park. Within the great shady groves of oak and fir await you. Dim aisles suggest haunting, venerable rocks decked with moss invite repose. The decorous family life of the camps suggests no anomaly; these are earth children come back to their native soil, and are accepting the feast of beauty spread for them.

The great bee-hive dome of the assembly hall sun-streaked and brightly lit, room top and gives a welcome shade—and some brilliant addresses are to be made under its canopy this year. The groves will echo with music, also, and with worship.

The wayfarer or the chance visitor will find a restful welcome at the headquarters of the W. C. T. U., the largest tent on the grounds and made conspicuous by its banner bearing the well-known words—"For God and home and five land." Mrs. Anderson is acting as hostess, and is always ready with information and courtesy.

Many camps are coming in, and the organized work of the classes and a full program will occupy the time and attention from now on. Now, as this is in readiness for the vacationist, stays at home. Those who are at the seaside or off in the mountains may read it and wish they could be there; it is for the stay-at-homes.

Fashion Hints From Dress.  
New Embroideries—Roumanian, Bretonne and Moldavian embroideries are the newest trimmings for tussor and rajah gowns, and even on the simple voile frock this brilliant trimming will be worn. The bizarre colorings give a bright and gay effect which add a certain cachet to the dull shades so much worn this season.

The Bathing Suit—Checks, stripes and polka-dotted fabrics are most in favor for bathing costumes, and are trimmed with bias bands of plain silk. These garish effects are purely a matter of taste, but by the woman who likes her costume to be smart, but less conspicuous, a plain satin or taffeta trimmed with narrow straps in plaid silk is preferred. The materials for evening wear are changing dress are satins, taffetas, brilliants, burlesque, fine wale surah, mohair and challis.

An Attractive Model—An unusually attractive suit is a brown taffeta princess; small plaits are laid over the hips, but a wide box-plait bordered with pale blue and brown check silk runs from the square yoke to the hem of the suit. Three large blue buttons on either side of the plait ornament the waist. Short puff sleeves are gathered into a band of blue and brown plaid. A fitted corset cover gives the necessary support to the knickerbocker, which are shaped with darts on the hips, and drawn in at the knee with an elastic band.

A Fad of the Moment—Among the most original and unique ideas in hat pins are those specially designed to commemorate the Jamestown exposition. A jagged, irregular pearl in the shape of a cotton boll is set in old-fashioned guinea gold, the setting forms the capsule of the cotton plant, while the pearl represents the boll with its loose fibres.

That our American forests abound in plants which possess the most valuable medicinal virtues is abundantly attested by scores of the most eminent medical writers and teachers. Even the untutored Indian had discovered the usefulness of many native plants before the advent of the white race. This information, imparted freely to the whites, led the latter to continue investigations until today we have a rich assortment of most valuable American medicinal roots.

ELECTRIC ROAD FROM COAST TO ROSEBURG  
(Special Dispatch to The Journal.)  
Roseburg, Or., July 11.—Judge C. A. Sehlhede, while in Roseburg en route to Astoria from Marshfield to meet Vice-President Fairbanks, who is an old-time friend of his boyhood days, said the bay city was very enthusiastic over the prospect of an electric road from that point to Roseburg. They had over 75,000 subscribers and the balance of the required amount, which is \$125,000, would be subscribed within the next few days.

While Coos bay is in favor of the Harriman line now in course of construction from Drain, that road will practically bisect North Bend and Marshfield, unless the company can obtain the waterfront and a bridge across the bay, two things that Marshfield will not grant.

This is what makes the Southern Pacific so slow in construction. It is just holding the ground to keep out competition, and if it could hold the entire waterfront on Coos bay the chances are that it would be many years before Marshfield would have direct communication with the outside world. The bay people thoroughly realize their situation and feel sure that the electric line will be built within the next two years. With three fourths of the money in sight and plenty of outside capital to carry the road to completion, it is safe to say that this road is now assured.

High School Students!  
You can get a piano at a purely nominal rate to advertise our factory methods of selling, by applying early at Reed-French Piano store on Sixth and Burnside streets.

# RURAL CARRIERS AT SILVERTON

(Special Dispatch to The Journal.)  
Silverton, Or., July 11.—An interesting feature of the annual meeting here of the rural letter carriers of Marion county was the address of President Franz Krauszberger, who had just returned from an extensive trip through Europe, where he paid special attention to the postal service. He said the parcel or packet post is a decided success in Europe. All postal employees must wear uniforms, postmasters included. Rural carriers and some city carriers are supplied with automobiles for the service after a certain number of years of service. Postal employees receive pensions.

The following officers were elected for the next term: President, Franz Krauszberger, Aurora, re-elected; first vice-president, G. Allen, Silverton; second vice-president, Harry Hobart, Silverton; secretary, O. L. Wolford, Silverton; treasurer, J. H. Keene.

The next meeting will be at Aurora, October 6. A vote of thanks was extended to the carriers of Silverton for the hospitality extended.

# LIQUOR DEALERS ARE SHUT OUT OF RESORT

(Special Dispatch to The Journal.)  
Newport, Or., July 11.—Charged with selling liquor, J. T. Porter and Williams & Winant of Newport were tried before Judge Sylvester. They pleaded guilty and were fined \$100 each, and, in addition, were placed under bonds of \$1,000 each to observe the law in future. They paid the fines. So Newport is now a dry town in the full sense of the word. District Attorney McFadden conducted the prosecutions.

When in San Francisco  
Stay at Hotel Hamlin, 237 Eddy. Fire-proof. 100 rooms, 40 baths; rates \$1.50 and up. Eddy-street cars at ferry.
