

"The Blood is the Life"

Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which suffers through disease. The brain is clouded, the mind and judgment are affected, and many an evil deed or impure thought may be directly traced to the impurity of the blood. Pure, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It purifies and purifies the blood, thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it will apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by enclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Mass. St., Buffalo, N. Y., and it will come to your return post. Most druggists keep it as well as the "Golden Medical Discovery."

You can't afford to accept any medicine of unknown composition as a substitute for "Golden Medical Discovery," which is a medicine of known composition, having a complete list of ingredients in plain English on its bottle-wrapper, the same being attested as correct under oath. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

### A SMALL SECRET

Two men were discussing the various food products now being supplied in such variety and abundance. One, a grocer, said, "I frequently try a package or so of any certain article before offering it to my trade, and in that way sometimes form a different idea than my customers have."

For instance, I thought I would try some Postum Food Coffee, to see what reason there was for such a call for it. At breakfast I had Postum and it proved the same, so I naturally concluded that my taste was different from that of the customers who bought it right along. A day or two after, I waited on a lady who was buying a 25c package and told her I couldn't understand how one could fancy the taste of Postum. "I know just what is the matter," she said, "you put the coffee boiler on the stove for just 15 minutes, and 10 minutes of that time it simmered, and perhaps five minutes it boiled, now if you will have it to boil for fifteen minutes after it commences to boil, you will find a delicious Java-like beverage, rich in food value, and it will never abandon it, particularly when you see the great gain in health and vitality. I joined the Postum army for good, and life seems worth living since I have gotten rid of my old time stomach and kidney troubles." Postum is so soft of medicine, but pure liquid food, and it will do for a relief from coffee worked the change. "There's a Reason." Road "The Road to Wellville," in 1907.

### REVOKE RIGHTS SAYS MAYOR

### Franchise of Oregon Traction Company Has Lapsed and Action Is Urged.

Mayor Lane in a letter to the city council yesterday went on record as favoring a rigid enforcement of the terms of franchises when he asked that the franchise granted the Oregon Traction company be declared forfeited. Mayor Lane called attention to the fact that the franchise expired April 6 of this year and no effort has so far been made to secure another franchise. He urged that if the permit be revoked and another asked for, it be made more stringent in its provisions.

The mayor's letter called for attention to the fact that the time limit fixed by ordinance for the construction of the Oregon Traction railway tracks of the Oregon Traction company expired April 6, 1907. Inasmuch as some of the terms under which this franchise was granted are obscure, and but few if any restrictions bearing upon the rights of the people of this city were contained in the said franchise, Mayor Lane respectfully asks that the franchise be declared forfeited for failure to comply with the meager requirements which it contained and that said railway company or its successors, if it will be desirable to build such a railway, be required to secure at the hands of this city a new grant more in conformity with the rights and needs of the people.

## SEARCH FOR EASTERN OREGON

### Field Considered as Promising as Any New One Now Known.

Ontario, Or., July 18.—The oil and gas in this vicinity are continuing to attract widespread attention. Much curiosity has been aroused recently by the actions of a couple of men who have been making a quiet but apparently thorough examination of the general conditions in the field. While attempting to studiously conceal their business, it is now definitely known they were here in the interests of a Pennsylvania syndicate with a view to becoming interested in the oil and gas fields. One was a well-known eastern geologist and the other a business representative of the syndicate.

It is understood that these parties while here opened negotiations for some of the choice locations under lease to the Oregon Oil & Gas company, but it is doubtful that they met with any encouragement, as this company is preparing to carry on operations itself in the field on a very large scale. The most skeptical are now convinced that the gas and oil resources of this vicinity are on the eve of large and rapid development. The Oregon Oil & Gas company has had men in the field for several months and at a large expense has examined and secured leases practically all of the desirable locations in the valley. They have a derrick at Arcadia, another at Ontario and a third is to be erected within a few days at Fayette, Idaho, and in a very short time the company will have three large drilling outfits on the ground, each capable of going to a depth of 2,500 feet and more. Experienced oil and gas men pronounced the field one of the most promising in the west, and that immense deposits of oil and gas will be encountered is hardly a matter of doubt or speculation. During the past 10 days the development work has been going on with great vigor and it is predicted that when the oil is struck eastward of the present field, the boom rivaling those of Texas and California.

## MYSTERY SURROUNDING ASSASSINATION OF DAIRYMAN HUBER ON THE CORNELL ROAD Baffles the Local Detective Department.

### Mystery Surrounding Assassination of Dairyman Huber on the Cornell Road Baffles the Local Detective Department.

Investigation by Detectives Batey and Hellyer of the shocking murder of Alexander Huber, the dairyman, whose dead body bearing two gunshot wounds, was found yesterday morning at 4 o'clock on the Cornell road, indicates that the crime bids fair to become one of the most baffling mysteries the local police have attempted to solve.

Although at first entertaining the theory that the assassination was the direct result of the fight in Grutzel's saloon, Front and Yamhill streets, last Saturday night, when Jacob Leu was mercilessly beaten by a crowd of dairymen of which Alexander Huber was a member, the detectives are now convinced that they will have to look in other directions for the murderer and motive.

Working Diligently. "We have been working diligently," said Sergeant Batey this morning, "but are not prepared at this time to announce any definite theory. We are reasonably certain, however, that neither Leu nor his friends had anything to do with the murder and believe that the assassin determined to wreak vengeance upon the man assaulted and his companions."

From the fact that prior to the assault on Leu in the front street saloon a beer glass was thrown at him by some member of Huber's party leads the police to believe that there might have been a feud existing between the man concerned in the affair which has not yet come to light.

Mistake May Have Been Made. It is barely possible that Huber was murdered as a result of a mistake. The point on the Cornell road where the tragedy occurred was extremely dark and the assassin lying in ambush for his victim, mistaking Huber for the man he was waiting for.

In the police court this morning cases against Alexander John Roth, Andrew Roth, John Giter and Henry Nagell, arrested upon complaint of Jacob Leu for assault and battery, were all continued until later in the day.

The inquest over the body of the murdered man will be held this afternoon by coroner Finley. Although a remote possibility, yet something of importance may be elicited from the witnesses subpoenaed that will furnish a clue to the assassin.
