He married an ideal, and was disap-pointed to find it had flaws. He paid no attention to his personal appearance after marriage. He treated his wife as he would not have dared to treat another woman.

. . .

What Is a Lattice? What is a lattice?

That is the question which perplexed nore than 2,000 boys and girls who took the examination for admission to the high schools in Philadelphia. The question was sprung on them in the language examination, and as yet most of them are much in doubt about the answer

They have looked through dictionaries, encyclopedias, architectural mag-azines and text-books on physiology, but most of them haven't been able to The cherries shown in the accompany are grown in all parts of Oregon, but ing picture, nearly four inches in circumference, are of the Lambert variety decide yet whether a lattice is part of wine colored and of fine flavor. Their size is easily comprehended by compar-ing them with the half dollar which was photographed with them. They are typical of the splendid fruit for which the entire state of Oregon is noted.

decide yet whether a lattice is part of the human anatomy, a board fence or a peek-a-boo waist. The question was down in the lan-guage test in connection with the poem, "An Apostrophe to the Wind." Several verses of the poem were quoted. In one of the verses the noet referred to the

worn with a decollete gown, although it is often used to give character to a lingerie collar.
A New German Bread.
An entirely new kind of bread made either of wheat or rye, is bécoming pop-ular in Germany, and is likely soon to be introduced into this country. It is made of the whole grain—but not acworn with a decollete gown, although wind as "The spirit which breathes through my lattice." The question was, "What is the mean-ing of the word 'lattice' in the poem f" When the examiners started in to mark the papers they didn't know whether they were marking for a physi-question." What is the meaning of the question. "What is the meaning of the analytice?" About one quarter of the an-swers put lattice down as a synonym for nose. Others declared that lattice in this case meant mouth.

in this case meant mouth "By lattice is meant the network of hairs in the nostrils" was the answer sightly. Don't use soda when washing china ornamented with gilding, for soda will in time surely take off every vestige of one bright boy.

"Lattice is the pores of the body," said another. The most novel explanation was given by a boy who wrote: "A lattice is a deKoltay waist. My sister has one. See diagram." And appended to the examination pa-

per was a neat sketch of a peek-a-waist, made with a lattice effect.

Cleaning Greasy Dishes,

. . .

The most objectionable part of dishwashing is the cleaning of greasy dishes and utensils, says a contributor

to Ladies' World. The tiny particles of fat cannot be scraped off, and so float about in the dish-water, making it very disagreeable and almost unfit for further use. After many experiments, I have found a way of cleaning them quickly and thoroughly. In a convenient place I keep a tin box containing bran, and a mitten rudely cut and stitched from any odd pleces of cloth. Some of this bran is shaken into cloth. Some of this bran is shaken into the dish, the mitten slipped on, and by rubbing the bran round the sides and bottom, every particle of fat is re-moved, and the dish is quickly and eas-ily washed. The bran is then pourod into the next dish or thrown away, ac-cording to its condition. When the mitten becomes solied it is destroyed and a fresh one put in its place. This method is much quicker and better than rubbing the dishes with cloth, paper or a rubber scraper. a rubber scraper.

. . .

Household Hints.

Tasty sandwiches have anchovy paste, mayonnaise and minced green peppers as filling.

Add a little milk to the water in which potatoes are bolled and they will when done look very white and taste well.

Paint marks on glass may be removed by rubbing with a paste of whiting and ammonia, thinned with water to the consistency of cream. Leave the

paste on, and when it is dry wash off

paste on, and when it is dry wash off with scap and warm water. When the woodwork in a room is be-ing painted it is a good plan to have about three inches of the floor painted with the same color paint, then if ever it is necessary to put a carpet upon the floor which does not exactly fit it, the little space left will not be so un-

of gold from the pattern. Boap may be added to the water with impunity and it will do the work of cleansing without roughening the hands of the operator. TWO WOMEN FREED FROM DRINKING MEN Two divorces were granted by Judge Frazer in circuit court yesterday after-noon to wives who complained that they had been cruelly treated. Mrs. Martha Olson said Lars Olson indulged of gold from the pattern. Boap may be to excess in intoxicating liquors, be

KIDNEY DISEASES CAUSE ONE-THIRD OF THE TOTAL DEATHS.

When the Kidneys fail to perform their functions properly by not straining out the poisonous waste matter from the blood as it passes through them, the poisons are carried by the circulation to every part of the body, deranging the different organs. This causes heart trouble, stomach trouble, sluggish liver and a host of other ills, all due to deranged Kidneys.

FOLEYSKIDNEYCURE

corrects irregularities and cures Kidney and Bladder diseases in every form, tones up the

CURED OF BRIGHT'S DISEASE.

CUMED OF BRIGHT'S DISEASE. Mr. Robert G. Burke, Elnora, Saratoga Co., N. Y., writes:-I am giad to have an oppor-tunity of telling what magnificent results I have had from using FOLEY'S KIDNEY CURE after having tried other advertised medicines and several physicians. Before I began it I had to get up from 15 to so times each night to relieve my bladder. I was all bloated up with dropsy and my syssight was so impaired that I could acarcely see one of my family across the room. In fact, I was so badly used up that I had given up hope of living when I was urged by a friend to try FOLEY'S KIDNEY CURE. One 50-cent bottle worked won-ders, and before I had taken the third bottle the superfluous flesh had gone, as well as all other symptoms of Kidney trouble. My friends were surprised that I was cured, as they all thought I was going to die. Every few days some one comes from miles away to learn the name of the wonderful medicine that cured me of Bright's Disease, and not one that has tried it has fails to be benefitted.

whole system, and the diseases that have resulted from disordered Kidneys disappear, because the cause has been removed. Commence taking FOLEY'S KIDNEY CURE

possible with the machinery of govern-ment. Washington is now practically deserted by those high in official life, and the departure of chiefs and clerks has left all the departments of the gov-ernment running along with their min-imum force. Members of the cabinet, justices of the supreme court, senators and representatives are scattered from coast to coast and may be found almost anywhere except in the national capital. About the only official activity dis-played anywhere just now is in the havy, which is engaged in completing arrangements for the dispatch of the big fleet of warships to the Pacific coast. No date has yet been fixed for the departure of the fleet, it evidently being the intention of the navy depart-ment to show no undue haste in the matter.

"Weddings and Strikes

are the bane of a telephone manager's life," seld one of the afflicted the other day in our office. "It's hard enough to get operators, anyway, and just when they begin to be worth their salt they start something doing. One day this spring I learned that two of my best operators were going to get married soon and that a bunch of the worst ones were framing up a labor union.

"That Set me thinking

about how much we are at the mercy of these girls. And then they are harder to get from year to year. I figured it all out-what we spend for the operator hire, for training them and for the extras for their comfort, and how little we get for all this, and I decided that if automatic equipment would wipe out these two items and the worry that accompanies them.

'me for the automatic'

How many managers are in the same fix? Don't all speak at once, but think it over, and remember that the automatic switches never get married or go on a strike; they are never tired, or peevish, or unruly; but they "are all there all the time," as an enthusiastic automatic exchange manager said recently. Their maintenance is small—\$10.34 for repair parts on 3,000 switches in a year and a half, in one instance—and, taking it all around, they are the most efficient and economical operators a manager can get.

"It might interest you

to know that the total maintenance expense of parts for our entire plant of 3,000 switches for the past eighteen months has been \$10.24," writes Superintendent J. A. Duncan of the Sioux City Telephone Company, Sioux City, Iowa. (This company operates the AUTOMATIC TELEPHONE SYSTEM.)

"A like sum

would perhaps take care of the repair cost on operators' chairs in a manual exchange of the same size," adds Mr. Duncan.

It occurs to us

that the one item of switchboard cords alone for a manual exchange of 3,000 lines would amount to at least \$150 in eighteen months. That is fifteen times the cost of all repair parts on the Sloux City automatic exchange.

That is only one

of the many coonomies of the AUTOMATIC SYSTEM. These economies all help to swell the profits. And—the AUTOMATIC being the best service commands the highest rates. Low production cost plus high selling price equals big dividends. That is what led to the adoption of the AUTOMATIC TELEPHONE SYSTEM in the following cities:
