stocks for the day and Sunday. The bulk of the business was done in the carly hours. Owing to the lateness of the river boat there was a shortage of some varieties. Choice peaches were scarce and there was a particularly good inquiry. Bertles in good condition went at advance prices. Choice red loganberries have become almost too scarce to quote. A good quantity of Fontainbleu grapes arrived from Vaca-ville, but there was a wide difference in quality, some being too green. A small lot of seedless grapes from the south brought \$1.75 per crate. Four boxes of huckleberries were received from Occidental, with sales at 17½c Ripe Bartlett pears in small boxes

per pound. Ripe Bartlett pears in small boxes were offering at 75% 85c and seedlines in baskets at 75c. Bartletts for canning ruled very firm. Apples show but little variation in price. There have been no very good bellflower apples as yet. A carload of Valencia oranges arrived from the Ojai valley. The last carload of navels was going off well. Two carloads of Central American bananas were received. Figs were scarcer and higher. In the Robinson household, but was dis-charged because he was too friendly with Mrs. Robinson. week, prices are still high as compared with other seasons. Vegetables from the river districts arrived too late for the day's trade and much inconvenience resulted. As a rule prices were about the same as on Friday. Asparagus is practically done for the season. Rhu-barb might as well be dropped from the list.

"Weddings and Strikes

are the bane of a telephone manager's life," said one of the afflicted the other day in our office. "It's hard enough to get operators, anyway, and just when they begin to be worth their sait they start something doing. One day this spring I learned that two of my best operators were going to get married soon and that a bunch of the worst ones were framing

"That Set me thinking

about how much we are at the mercy of these girls. And then they are harder to get from year to year. I figured it all out—what we spend for the operator hire, for training them and for the extras for their comfort, and how little we get for all this, and I decided that if automatic equipment would wipe out these two items and the worry that accompanies them,

'me for the automatic'

How many managers are in the same fix? Don't all speak at once, but think it over, and remember that the automatic switches never get married or go on a strike; they are never tired, or peevish, or unruly; but they "are all there all the time." as an enthusiastic automatic exchange angeneser said recently. Their maintenance is small—\$10.24 for repair parts on 3,000 switches in a year and a half, in one instance—and, taking it all around, they are the most efficient and economical operators a manager can get.

"It might interest you

to know that the total maintenance expense of parts for our entire plant of 3,000 switches for the past eighteen months has been \$10.34." writes Superintendent J. A. Duncan of the Sloux City Telephone Company, Sloux City, Iowa. (This company operates the AUTOMATIC TELEPHONE SYSTEM.)

"A like sum

would perhaps take care of the repair cost on operators' chairs in a manual exchange of the same size," adds Mr. Duncan.

It occurs to us

that the one item of switchboard cords alone for a manual exchange of 3,000 lines would amount to at least \$150 in eighteen months. That is fifteen times the cost of all repair parts on the Sloux City automatic exchange.

That is only one

of the many economies of the AUTOMATIC SYSTEM. These economies all help to swell the profits. And—the AUTOMATIC being the best service commands the highest rates. Low production cost plus high selling price equals big dividends. That is what led to the adoption of the AUTOMATIC TELEPHONE SYSTEM in the following cities:
