Missouri Governor Grants a Respite to Bogus Lord Barrington, Under Death Sentence for Brutal Murder of Former Friend.

(Journal Special Service.) Jefferson City, Mo., July 28,-Governor Folk this morning granted Lord Barrington, who is under death sentence, 30 days' respite, to August 16.

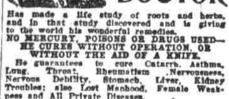

Barrington was to hang July 26. Convicted of the cowardly murder of James P. McCann, his friend and patron, for nearly four years Barrington has successfully fought the death sentence. Strong efforts are being made to have Governor Folk commute the sentence of death to one of life im-prisonment. Barrington is an English subject and the British consul in St. Louis has strongly interested himself in the case. Bishop Tuttle of the Epis-copal church is among the many per-sons of prominence and influence whe have petitioned the governor for clem-ency. ency

Extraordinary Oriminal Career.

Weds American Girl. In 1889 he came to America for the second time, with a draft for \$30,000, and rapidly acquired a reputation in New York City for possessing all the flashy virtues that Broadway esteems. In 1890, when his money began to run low, he selected the daughter of a wealth- widow in Brooklyn, Miss Ce-lestine E. Miller, as his prey, wooed and won her, persuaded the girl and her mother to sell their property in order that he might invest it in England and then took them across the Atlantic and Weds American Girl.

Salem, Or., July 23 .- The irrigation of

(Journal Special Serries.)
 Salem, Or., July 22.—The irrigation of hop yards is the latest experiment being watched with interest by local hop-growers. There are no experiments conducted in this county as yet, but those which are in progress at Corvallis and Eugene are being watched with those which are in progress at Corvallis and Eugene are being watched with those which are in progress at Corvallis and Eugene are being watched with those which are in progress at Corvallis and Eugene are being watched with those which are in progress at Corvallis agent, and now a state railroad com-missioner, is conducting an irrigation ex-periment at his yard a few miles south gasoline engine as motive power has been installed and has connection with the sard by a flume nearly 1,000 feet jong. The watch is purple from as this synch watched from a state railroad com-meters. \$1:26: chertics, \$2:00; tomatoes, \$2:00; and Superles, \$1:25: chertics, \$2:00; and Superles, \$1:26: chertics, \$2:00; and agent, and now a state railroad com-meters, \$2:00; tomatoes, \$2:00; and agent, and now a state railroad com-meters, \$2:00; tomatoes, \$2:00; and agent, and now a state railroad com-meters, \$2:00; tomatoes, \$2:00; and agent, and has connection with the yard by a flume nearly 1,000 feet jong. The watch is pumple from as this synch and the connection with the synch be available and hexhause this empty is available; and hexhause the effrection of the West yard is capable of furnishing \$00 gailons of the charection of Lotics State is capable of furnishing \$00 gailons of water per minute and if the experiment will be increased to 1,500 gailons of water per minute and if the experiment will be increased to 1,500 gailons of water per minute and if the experiment whill be increased to 1,500 gailons of water per minute and if the experiment will be increased to 1,500 gailons of water per minute and if the experiment will be increased to 1,500 gailons of secannet is made conductiong water per minute and if the experim

Another experiment is being conduct-ed near Eugene by Dr. W. L. Cheshire, who will irrigate his hop yard. Al-though low prices in hops are prevail-ing, it is a matter of encouragement to see growers who still have faith in that great industry, which brings thousands of dollars each year to this section of the Willamette valley. As a whole the present property as a state of the presen

the Willamette valley. As a whole the present prospect for the hop crop is good. The yards on the lowlands are proving thrifty and the arms are forming in great style. Around Woodburn the old yards are not so thrifty as they have been in past years and in many cases the output will be much less than in former years, while in the young yards, those which but five years old or under, the yield will be much better than expected.

NEW YORK STOCK MARKET

was rather a typical summer market, there being no special features, although a noticeable feature is that the list is receiving very good support, especially of the Hill stocks. Amalgamated Cop-per, Union Pacific and Southern Pacific continue to be the dominant factor at the present. The strength is that issue is confident of an increase in dividend rate at the next directors meeting. The closing shows no important changes for the day's trading.

54 a day, which is the lowest paid posi-tion in the Lacrosse wheat fields. Binders are not used here to do harvest work—only headers and combined har-vesters. The combines use 36-horses is each, but only about four men. With the combines the grain is cut, threshed and sacked. About 12 combines have been purchased by the farmers here this season and they cost from \$1,500 to \$2,500 each. During this month sev-eral refreshing showers have fallen and the weather is not so hot as in July, 1906. Spring wheat is looking fine and an excellent crop is expected. 43 %

Save the Forests!

From the New Orleans Times-Democrat. 6814 chief unaterial, but upon a climate and productiveness as well. Never before has there been such wan-

productiveness as well. Never before has there been such wan-ton waste of timber as we of America are guilty of today. We are cutting down three times as much as we are growing, using six times as much wood per capita as is used in Europe. After the eastern and western states had wasted their valuable forest wealth it was thought that the south, which had the bulk of the remaining merchantable timber, would be more careful and spar-ing, but experience seems to go for nothing in this matter and the south is today cutting down its pine, oak and cypress as rapidly as Michigan did. In the 26 years up to 1907 the 14 southern states produced 285.147,000,000 feet of lumber, or near one third of the fotal. Today the south has reached its maxi-mum of production and if it continues at its present figure it will soon be as treeless as portions of the easter At present about one fifth of the to-tal forest; the other four fifths have alrendy passed into private hands. The question is now as to the preser-vation of these lands and the extension of federal and state ownership and con-trol so as to save such of our forests as remain. Public sentiment is un-questionably with the president in this matter. 3814 111 % 19 % 66

house James P. McGann, owner of race horses and man about town, took him up, and Barrington began a flourishing parasite's existence. McGann drank heavily, hobnobbed with a fast set, and never worked. He lived upon the resi-due of a large fortune which he had largely dissipated, and by gambling. He trusted Barrington implicitly and had arranged to back him in a hotel venture. On the night of June 18, 1903, the pro-tege enticed his patron, who was in the habit of carrying large sums of money THE C. GEE WO OHINESE MEDICINE CO., 162% First St., Cor. Morrison, Portland, Oragon, Floase Mentios This Paper.

tege enticed his patron, who was in the habit of carrying large sums of money upon his person, to Bonfils, a suburb twenty miles out of the city. In this lonely place, in the Missouri river bot-tom lands, Barrington murdered his protector. One week later the nude body of McGann was found floating in a pool in an abandoned quarry near Creve Couer lake. Barrington was at once arrested. He was wearing the dead man's hat when taken into custody, and had a considerable sum of money for which he could not give a satisfac-tory accounting. He was tried, convicttory accounting. He was tried, convict-ed and given the death penalty. The case was carried up to the highest tri-bunal in the land, which upheld the ver-dict of the trial court

From the New Orleans Times-Democrat. Aside from those interested in tak-ing up these public lands there is a strong sentiment in favor of support-ing the president and saving our for-ests. Unless something is done in this matter we shall soon see the end of our lumber resources, with the very worst results not only to the many industries which depend mainly upon wood as their chief #material, but upon a climate and
