

PREDICTS GREAT GROWTH FOR COOS BAY REGION

Population of 25,000 to 30,000 Within Three Years Guess of Prominent Woolen Mills Man—Wonderful Reversal of Opinion Toward Portland Since the Quake.

"Coos bay is a young men's region. Within three years it will have 25,000 to 30,000 people," declared J. L. Bowman, of the Brownsville Woolen mills, who has just returned from a successful business trip on the coast. "At Marshfield the greatest lumber mill on the coast is being built, five brick buildings are going up, the town has a first-class daily newspaper, run by two of the best young hustlers in the business."

wonderful change in the feeling of Coos bay people toward Portland. Where formerly it was all good will toward San Francisco and ill will toward Portland the situation is reversed and Portland is regarded as the most advantageous center of trade relations. The people of Coos bay have become convinced that Portland's attitude has been and is one of friendliness and fairness. The newspapers, he says, of Portland and some of the business men have brought about the change.

"I have been going over to Coos bay in the line of business and pleasure for 13 years and only in the last two years have I succeeded in getting any considerable business. I have this year sold a complete line of orders. For years I have been much interested in that region, for I married a Coos county girl and have numerous friends in that section," Mr. Bowman said.

"Coos bay has great resources in coal,

Fireproof brick building to be erected at Marshfield by Bowman & Rogers. Travis & Wilson, architects.

timber and agriculture. Every farmer has his gasoline launch. In one day I saw lined up at the Marshfield wharf 50 gasoline boats in which farmers up the river had come to town to trade. There are 2000 of these boats on the waters tributary to the upper bay.

Finest Business Building.
Bowman & Rogers are about to erect in Marshfield a three story fire proof brick building planned by Travis & Wilson, architects of this city. The building will be one of the first large brick structures on Coos bay. It will cost about \$40,000 and will stand on a lot valued at \$20,000. The building will be of Newberg pressed brick, shipped from Portland. It will be 60x100 feet and contain 16 offices and two or three store rooms.

At a recent meeting of the Marshfield chamber of commerce, C. A. Smith of Minneapolis made an address in which he said that within a radius of 75 miles of Coos bay there is more standing timber than in any other section of the world. He said that he will ultimately move his entire Minneapolis business to Coos bay, employing 4,000 men in his timber and lumbering industries.

The ship channel on Coos bay bar has just been measured by government engineers and there is found 20 feet at low tide on the bar. A company has been formed at Marshfield to dredge a deep channel 800 feet wide in the upper bay, leading to Marshfield, and the Smith mill plant. The sill will be used to fill new lots back of Marshfield.

Mr. Smith is building at Newport News a steam schooner 295 feet long, to be used as a lumber carrier. It will draw 14 feet water and will be the purpose of the company to maintain a channel in the bay that will accommodate vessels of that draft.

Parisian Women's Renowned Beauty

Mainly Consists of Beautiful Complexions, Specialist Gives Splendid Formula

In a recent interview Dr. Jean Valier, the eminent dermatologist, made some very interesting statements concerning the beauty of the fair sex. He claimed the highest type of features and those that approach nearest to the old Greek standards are to be found in America. Although the French ladies are world renowned for their beauty, they lack the classical mould of face. But this defect is evidently counter balanced by their matchless complexions. To this they give the most rigid care in the matter of diet and daily grooming.

Dr. Valier gave the formula for a skin food which he said had worked wonders for the society ladies of Paris and which, though a simple mixture, is probably the most effective known to science for restoring the normal rosy complexion and building up the undeveloped parts of the face, neck and bust. The formula is as follows: Two ounces of Rose Water; one ounce Cologne Spirit, and four ounces Bariton (crystallized).

COAL LAND FRAUD CASES ON TRIAL

Government Begins Prosecution of Alleged Glenwood Springs Conspiracy.

(Journal Special Service.)
Milwaukee, Wis., July 24.—The cases of Chauncey Lloyd Jones, L. J. Rosenberg and Elias Arnold, under indictment for conspiracy against the United States government in securing coal lands in excess of that amount allowed by statute, were called for hearing in court today. The three defendants are representatives of the Federal Coal & Iron company.

JUVENILE OFFENDERS ARE NOT CRIMINALS

Monroe, Mich., July 24.—The annual meeting here of the Michigan Probate Judges' association, which will be in session three days, has topics of more than usual importance scheduled for consideration. A matter of greatest importance to the association is the adoption of the new juvenile court law which places the control of all juvenile offenders and those who are neglected or ill-treated children under the jurisdiction of the probate court.

STUDENTS SUBDUED PHOSPHORUS FIRE

Busy Quarter of an Hour at University of Washington Administration Building.

(Special Dispatch to The Journal.)
Seattle, July 24.—The University of Washington administration building had a narrow escape from destruction by fire early yesterday morning because of the fact that a jar containing a quantity of phosphorus covered with water had cracked. Flames were discovered at 3 o'clock in the chemical laboratory. The big university bell was rung and the whole university community aroused, professors and students at the summer school appearing in force.

CHEYENNE TO HOLD FRONTIER FIESTA

(Journal Special Service.)
Cheyenne, Wyo., July 24.—The eleventh annual Frontier days celebration and carnival opens in Cheyenne tomorrow and already crowds of visitors are coming in from Denver and numerous other points. Over 1,000 people are to participate in the carnival this year, giving the most elaborate reproduction of wild west sports ever seen. Many covers are on hand from all parts of Wyoming and they, with the Indians in their red and yellow blankets, are attracting much attention from the visitors. The streets are lined with booths and street fairs and peddlers are crying their wares from every corner. The entire city is profusely decorated for the occasion. The program calls for a long list of cowboy and Indian races, bucking contests, steer roping contests, band concerts and Indian dances. The Frontier park stables are full of race horses being put in condition for the race. Some fast horses have been secured and it is expected that some record time will be made.

DRY SUNDAYS NOW AT WESTPORT, WASH.

(Special Dispatch to The Journal.)

Westport, Washington, July 24.—This place was closed tight Sunday, not only the saloons, but every store, cigar stand or stand for refreshments being shut up. Acting Sheriff W. W. Anstie came down from Aberdeen Saturday and gave orders to put the city on a strict basis faithfully obeyed. Only a ball game between a team from Aberdeen and the local team served to lighten the Sabbath calm. Some sympathy was felt for the men who had opened fruit and candy stands to sell to campers and anglers excursions on the coast. But short, but there was general satisfaction with the closing of the saloons.

Valuable Discovery by Accident in Whatcom County, Washington.

(Special Dispatch to The Journal.)
Seattle, July 24.—A large bed of anthracite coal, pronounced by experts to be as good as anything in Pennsylvania, has been found in Whatcom county. The discovery was made by G. A. Alexander, purely by accident. He was following a stream of water down a mountain when he fell over a lump of what he supposed was a black stone. He examined it and found it to be high grade anthracite. Analysis later showed it to be 85 per cent carbon. Alexander then began an investigation of the land, of which he and two others are owners and found about 2,000 tons of the coal in sight. John T. Wheatman, manager of the Washington Saw Works, of this city, is one of the owners. The claim shows 112 feet on the trend, 40 feet on the dip and the depth is estimated at 30 feet. Several offers for the land have been received, but all have been refused. Among the would-be buyers is the Great Northern. The property is twelve miles from the Great Northern line and four miles from the B. B. & B. C. railroad.

THE UNIVERSITY OF WASHINGTON ADMINISTRATION BUILDING HAD A NARROW ESCAPE FROM DESTRUCTION BY FIRE EARLY YESTERDAY MORNING BECAUSE OF THE FACT THAT A JAR CONTAINING A QUANTITY OF PHOSPHORUS COVERED WITH WATER HAD CRACKED. FLAMES WERE DISCOVERED AT 3 O'CLOCK IN THE CHEMICAL LABORATORY. THE BIG UNIVERSITY BELL WAS RUNG AND THE WHOLE UNIVERSITY COMMUNITY AROUSED, PROFESSORS AND STUDENTS AT THE SUMMER SCHOOL APPEARING IN FORCE.

THE OFFICERS OF THE ASSOCIATION IN CHARGE OF THE ANNUAL MEETING ARE: PRESIDENT, Judge W. M. Snell, Seattle; St. Marie; vice-president, Judge J. M. Harris, Charlevoix; secretary-treasurer, Judge F. H. Williams, Allegan.

THE PHOSPHORUS IS ENTIRELY HARMLESS SO LONG AS IT IS KEPT COMPLETELY SUBMERGED IN WATER. THE JAR, HOWEVER, HAD BECOME CRACKED AND THE WATER HAD LEAKED AND EVAPORATED AWAY, EXPOSING THE PHOSPHORUS TO THE AIR, WHEN IT SPONTANEOUSLY BURST INTO FLAME.

Pendleton Pythians' Officers.
(Special Dispatch to The Journal.)
Pendleton, Or., July 24.—Lodge No. 4, Knights of Pythias, has elected the following officers: Dan P. Smythe, chancellor; professor M. S. Kern, vice-chancellor; J. H. Estes, prelate; E. B. Aldrich, master of work; D. B. Waffle, master at arms; Clyde Finch, inner guard; Walter Whitman, outer guard.
