A Beef Trust Butcher Apologizes for Using Beef Trust Meats.

The proprietor of a well-known retail meat shop in the downtown district said to us the other day:

"Smith, I much prefer to buy your fresh meat for my customers, rather than give them the Beef Trust's meat. The Beef Trust is bringing in frozen meat from the east in carload lots, and after being thawed out it is dealt out to the retail butchers of the city. I prefer to buy your meats, but you know how the Trust is hounding us and watching us for fear we do."

This statement came to us voluntarily. We did not solicit it. If the butchers of the city take this view of the matter why shouldn't you, too, prefer Smith's Oregon meats? The Trust can't hound you, and it should be a deep pleasure to have it watch you come to Smith's. Avoid all other markets in the city, because they are all supplied by the Trust. Smith's meats are 100 per cent Oregon meats and 100 per cent pure. Eat them.

Don't go into that market whose door is right alongside Smith's and painted the same color as Smith's, in order to trap you. It is a Beef Trust market and it was put there for a purpose.

Wood dealers say there is little wood being cut in the mountains, owing to the scarcity of men, and wood will probably sell at \$10 per cord before next winter.

Record Catch of Smelt.
 Aberdeen, July 26.—The Indians of the Quinalt reservation have recently made the largest catch of smelt on record on the north beach. The fish ran at the mouth of the Quinalt river, and the Indians, going out in their canoes through the surf, caught them in dip nets. They brought two tons of them to the harbor last week.

HERRICK REFRIGERATORS FOOL THE ICE MAN

"They are ice-savers and money-savers," said J. J. Kaddery when seen in his salesroom at 130 First street alongside the depot of the O. W. P.

"It is not the cold alone which is so essential in refrigeration, as may be easily demonstrated, but the circulation of cold, dry air, forced by proper lines of construction, proper insulation and arrangement. Perishable foods kept in our refrigerators are preserved in the best possible manner. (Fruits, vegetables, etc., can be stored in our refrigerators together with milk, cream, butter and other susceptible articles without contamination or taint. The walls are always dry and sweet, even after years of use. Matches can be kept on the shelves of our refrigerators for months and struck with ease on any of the linings.) To be sanitary the refrigerator must have this positive forced circulation.

"The importance of a sanitary receptacle for the storage of perishable goods is recognized by more each year, since it is found that much sickness is traced to unsanitary conditions in connection with the foods.

"So highly are these refrigerators regarded that government surgeons, stewards have adopted the Herrick in preference to all others."

KOCHER MAY CUT LUMBER AND FUEL

(Special Dispatch to The Journal.)
 Walla Walla, Wash., July 26.—M. R. Kocher, residing near Portland, has arrested in Walla Walla to look after timber interests near the Government Meadows, 18 miles south of Walla Walla, and also to investigate the feasibility of establishing a sawmill in that district. Mr. Kocher owns a valuable tract in that vicinity. Altogether there is probably 20,000,000 feet of good saw timber in that section, and Mr. Kocher believes it can be worked up and transported to Walla Walla by teams at a good profit. In view of the high price of lumber here now, if he installs a mill he will also engage in the wood business, utilizing the slabwood and stumps for cordwood. Common lumber retails for \$24 per 1,000 feet and good wood is selling for \$7.50 and \$8 per cord. Slabwood is worth \$4 a cord to the harbor last week.
