### Intersection Numbers.

The numbers at each intersection are the same throughout the city as a rule and the numbering has been carried out on that plan. The odd numbers always occur on the north and west sides of the street.

Around the corner from 215 Alder street is 125 Third street and every street from Front out to Chapman is numbered 125 at that same point, on the northwest corner of the street. The Fifth street is at the northwest corner
