displayed over the Chinese reaction co-day in token of the fact that this was the birthday of the emperor, Kuang Hsu. Born August 2, 1872, the present emperor of China, at thirty-five years of age, is probably the least known of the great rulers of the world, and this de-spite the fact that his domain in ex-tent and population has few equals and his country is a center of great attrac-tion and interest for the rest of the world.

# world, Kuang Hsu is said to be popular with the intelligent element among his sub-jects, and it is believed that were he able to shake off the domination of the dowager empress he would aid in bring-ing about liberal reforms in China. For-eign diplomats, who have resided at Pekin, speak well of the young emperor. But so long as the old dowager retains her power there is little hope of bring-ing about better conditions in the flow.
