So great has become the outside de-mand for Oregon butter that prices are advanced another 2½c a pound today. The price of the best product has been placed by several creameries at 32½c a pound, or 65c a square. From the far north orders are coming in a steady stream and this demand is taxing the larger creameries of the coast to keep abreast of it. While supplies of cream are still very liberal the output of butter is no greater than the demand. Outside of the far northern trade there is nothing extraordinary in the existing demand, but the former inquiry is sufficient say those that made the advance. cient, say those that made the advance today, to fully justify the new price. They have no doubt that the new figure can be easily maintained despite the fact that this would put the local market 2½c above the markets on the sound. This is a most unusual occurrence and indicates that the Alaska trade prefers the Oregon product in

souted. One outside and, it is stated, several local creameries are paying as high a price for butter fat as they are obtaining for the finished product. All last week some of the larger cream shippers were obtaining 30c a pound for their best product, but the general market did not go above 28½c. Alaska 1907

Egg Market Is Just Holding.

In order to get rid of their outside product at a good profit, handlers of eastern eggs are again manipulating the price on Oregons. The local egg market is not firm nor weak—it is just able to hold its own. Large arrivals of eastern cheap stock are hurting the trade because eastern can be sold un-der the Oregon product. The condition der the Oregon product. The condition of local arrivals is rather badly mixed, but not half as bad as the eastern. Some of the local stocks are being very roughly handled by express companies, and it is an unusual instance for a case to arrive without a number of the eggs being broken. Whether they are broken

I CURE MEN Original Methods

I cannot too forcibly impress the fact that the METHODS BY WHICH I TREAT AND CURE MEN'S DISEASES ARE ORIGINAL WITH ME. They are a result of my observation, research and study during years' practice as a specialist. This should especially appeal to THOSE WHO HAVE BEEN DISAPPOINTED in their efforts to obtain relief, and should aid all afflicted men IN THE CHOICE OF A PHYSICIAN. As to my understanding of men's diseases and the scientific correctness of my treatment, MY UNEQUALED SUCCESS IN EFFECTING PERMANENT CURES speaks sufficiently. DR. TAYLOR, The Leading Specialist.

Such treatment merely obscures the
