The Story of Graham Flour.

Graham flour is so named from Dr. Sylvester Graham, who in 1829 first used and strongly recommended foods made from unbolted flour. The Graham bread and crackers made in those days were coarse and unpalatable and were eaten more as a dietary obligation than as an enjoyable food. But, in accordance with the theory of Dr Graham foods made from this flour.

Dr. Graham, foods made from this flour proved to be very beneficial. The di-gestion was strengthened—the appetite improved—and the coarseness of the flour had a stimulating effect upon the

improved—and the coarseness of the flour had a stimulating effect upon the digestive organs. The Graham foods, through experi-ment and skill, became more and more palatable until finally the real Graham Cracker—the tempting food—was pro-duced by the National Biscuit company. Its flavor is that of the sweet, nutty kernel of wheat, almost a dessert—it is so rich and delicious. Used instead of i bread at any meal, it furnishes an agreeable change. For lunch or late supper it satisfactorily takes the place of meats and heavy food and leaves none of their ill effects. As a cereal at breakfast, nothing can excel Graham Crackers and cream. The National Biscuit company Gra-ham Crackers are packed in moisture and dust-proof boxes, keeping in all their oven crispness, freshness and fla-vor. When you open a box it is equiv-alent to taking them from the oven, and therefore Graham Crackers should be served from the original package to be eniowed at their hest. All grocers

be served from the original package to be enjoyed at their best. All grocers keep the Graham Crackers of the Na-tional Biscuit company.
