Tillamook Supplies Are Very Small.

Cheese supplies at Tillamook are said to be the smallest ever noted there at this time of the year for many scasons,

and this in a measure accounts for the many recent advances in the price there. The greater northern demand at this time is also alding the advance here, but one of the principal causes of the higher prices is the fact that but little cheese has been purchased by local parties because of the enormous values asked.

asked.

Practically all sales of city creamery butter were made today at 32½c a pound, the figure quoted by the recent advance. One or two creameries sold some of their old customers at the old range, but all will charge the higher price tomorrow morning. The improved tone is likewise shown along Front street, and the best product there brings 30c today.

Egg Market Is Steadier. A steadler tone is shown today in the local egg market. While a considerable number of bad eggs continue to come to market the general run of supplies is

of better quality. Price unchanged as

shipments are now holding up well.

Fancy peaches are selling higher.
Some from The Dalles sold this morn-

ing as high as \$1.35 a box, but this was

received but for one shipper's supplies. The higher priced stocks were not even Crawfords. Crawfords are ranging between \$1 and \$1.25 a box.

Chittim Bark Is Advanced.

Owing to the very light peel in both Oregon and Washington this year on account of the scarcity of labor, the price of chittim bark is advancing, and dealers are freely offering 6c a pound

#### Sculptor at Work in Jail.

The Italian sculptor, G. Cisariello, who has been in prison at Naples for the last eighteen months, has recently been allowed to practice his art in the prison. The idea was suggested to him by a postal card sent to him by a friend, with a portrait of the Crown Prince of

on it. and queen and the boy and made appli-cation for modelling clay and tools and for permission to have a child of 2 years to visit him daily to serve as a model for Prince Humbert. The tools nodel was refused.

Cisariello went on with the work and he has just finished it. Fellow prisoners occasionally posed for the adult figures, but he had no material for the child except the postal eard.

Notwithstanding this, the work is add to have merit. The government has ordered the model to be cast in bronze and the finished work is to be the prison.

(Special Dispatch to The Journal.) (Special Dispatch to The Journal.)
Albany, Or., Aug. 7.—One of the best
yields of wheat reported for the present
year is that of a two and one half-acre
tract on the farm of John Lennox, about
six miles east of Albany. Using a new
variety of wheat purchased in Canada, variety of wheat purchased in Canada, called the New Abundance, he threshed 116 bushels from the small tract or at the rate of 45 bushels machine measure, or 50 bushel by weight. Alongside of this he has a field of Golden Chaff which yielded 23 bushels to the acre. Mr. Lennox belleves that he has the right variety of wheat for this section and with introduction of new seed feels that the valley yields can be doubled and made to bring forth yields equal to those of early days. It has been the option long held by many that the fields of this section are run out and incapable of producing the heavy yields credited to this section in the early days.

At the present moment both orange and sugar-cane growing industries of Louisiana are seriously threatened by the ravages of the New Orleans ant, which is a South American, that entered this country by way of the city San Francisco, Aug. 7 .- Official bid whose name it bears. The efforts made whose name it bears. The error is made by the state to keep out the cotton boll-weevil have been unsuccessful, and the commission having charge of the matter has about given up the fight. The conclusion arrived at was that the weevil could not be exterminated, but that its destructive operations could be kept destructive operations could down in a measure by the farmers in careful planting and burning the stalks, but this same commission has taken up the warfare against the misnamed New Orleans ant, which is said to be more of a menace than the weevil ever was. It is said that the sugar plantations of Grenada, in the West Indies, were almost wiped out of existence by these ants in a campaign which extended over 10 years.

The sections are laid in masonry, so as to permit of expansions and contractions from the changes in temperature. The use of metal in this manner is unique, and greatly simplified the problem of building the canal through the desert country. try.

A series of tests made recently of the different electric lighting systems gave results greatly in favor of the vacuum tube system. As far as possivacuum tube system. As far as possi-ble all the different lamps were tested under the same circumstances, and it was shown that the long vacuum tubes were the most satisfactory and the most economical. While the virtues of this comparatively new method are manifest, there are certain disadvantages connected with their use which must be overcome before they can be generally accepted for service. The disagreeable color of the glow, which was very noticeable at first, has been overcome in a great measure and the system otherwise perfected.

Reports from France are to the effect that electricity may supplant drugs in the capacity of an anesthetic. What is called electro-narcosis is being developed by Professor Leduc, of Nantes, which is said to produce complete insensibility without any injurious results whatever. He has conducted experiments sufficient to demonstrate its value. A current of from six to eight volts completely deadens the brain of a rabbit, and this suspension of its function can be extended indefinitely without danger. #### NOVEL COAT HANGER

Convenient Combination Which Will Appeal to the Traveler.

A very convenient combination which will appeal to the traveler epecially, as well as to others, is the coat hanger and clothes brush combined, as shown in the

FOLDING CLOTHES BRUSH AND HANGER.

accompanying cut. Garment hangers are largely resorted to by women as well as men at the present time. In fact, their use is wellingh universal, and the very first thing that one wants after taking a garment from the hanger is a brush. Where the new combination is made use of, the brush is not only at hand, but in hand, as a matter of fact. This article consists of two portions hinged in the center, at which point is also secured a hook for hanging. The two parts are supplied with bristles suitable for brushing the clothing, and when the two end portions are folded back onto each other a very excellent article is presented in the shape of a brush. accompanying cut. The Secret of the Ses. Inscrutable and doomful deeps, Where Solitude, calm spirit, sleeps. Beyond the furthest seeking sunborn

Where Silence, kindred god, abides, And 'rythmically restless tides Clock off th' unreckoned, lightless ocean

No temple of the olden time
Was ever like to this sublime,
Nor from the world of men so all unlinked.

Here broods the Spirit awesomely In his own sanctum of the sea— True Holy of all Holles, God disting So was it when the world began. So in the cycle, God in Man— o when this earth is old and cold 'twill

Then Man in God, one perfect soul The ultimate, the supreme goal, Shall share the long locked secret of the sea.
