CONVENIENT WRITING SURFACE.

a desk being much more preferable. An exceedingly good substitute, where a desk cannot be procured, is the invisible folding desk shown in the illustration, the invention of a North Carolina man. This desk can be constructed in conjunction with a cabinet, chiffonier or other article of furniture having the usual drawers. It has the appearance of an ordinary front of drawers when closed within the bureau. When desired the desk can instantly be withdrawn and used for writing, reading, etc. The desk can either be placed at a conventient height for a person while sitting or placed above, so that it can be used while a person is standing. When the folding section of the desk is opened out it is securely braced by brackets at it is securely braced by brackets at each side. The desk also slants slight-ly, affording a proper and rigid writing surface which will bear any reasonable

## POTATO KNIFE

At One Operation the Potato Can Be Cut Into Eight Pieces.

It had been surmised that inventors had reached the limit in the improvement of household inventions, but this does not seem to be the case. Inventors still are on the lookout for some device that will prove a household necessity, as they realise it will command a ready market. As an example, an Iowa man has patented a knife for cutting pota-

toes that does eight times the work of the ordinary knife. Instead of requir-ing eight cuts to divide the potato into pieces it is all done at one operation. The illustration plainly shows the construction of this knife, no description being necessary. Six small blades and one center blade, attached to a handle, are all that is required. One stab at a potatoe divides it into eight pieces, each piece being of practically the same size. In hotels, restaurants, etc., where thousands of potatoes are cut up each day, sands of potatoes are cut up each day,

Paddles Is the Latest.

An entirely new idea in the propelling mechanism of vessels has been patented by a Massachusetts man. A glance at the illustration will suffice to show the theory of his invention. Many such schemes look good on paper, but a practical demonstration is always necessary to prove their worth. This mechanism is located amidships in a vessel and below the keel, and consists of numerous readdlewheels working in sprocket. paddlewheels working in sprocket wheels. These paddles do not extend at each side of the vessel, but are located within the interior in pairs. To secure the greatest efficiency of propulsion.

MARVELOUS INVENTION **CURES WEAK MEN** 

Patent Granted by the United States Government.

A new and scientific appliance invented by L. B. Hawley, M. D., will in preserving an orderly and always ac-produce full manly power at first ap-needed. Mounted upon a circular base produce full manly power at first application. The effects are immediate and startling to a high degree. Develops, strengthens and cures lost vigor. Positively no failures. Physicians indorse and use it in their practice. If you are the least skeptical as to the value of the remarkable treatment, send for illustrated circulars, take them to your in heeded. Mounted upon a circular base are two circular stands, the upper one two circular stands, the upper one stands are two circular stands, the upper one two circular stands, the upper one two circular stands, the upper one two circular stands are two circular stands illustrated circulars, take them to your in a cover, family physician and get his opinion. This is the first time anyone has requested you to take his circulars to your family physician. Why? Simply

INSURES TIDINGS.

SCIENCE NOTES.

your family physician. Why? Simply because he knows your physician will not recommend his treatment. Not so with this appliance. Your doctor will immediately grasp the idea, and when he does he will recommend it. Nothing like it has ever been sold before. It works the same on every individual. Send today for free descriptive circular of this wonderful instrument. The moment you see it you will realize its possibilities. No. C. O. D. or free trial schemes to catch the unwary. This is a plain business proposition that will appeal to you as the greatest opportunity ever offered to those who are weak. Address L. B. Hawley, M. D., 102-A. Granite building, Eochesten, N. Y. Electric Derrick.

HANDY PLACE TO WRITE.

Desk Which Folds Into the Bureau or Chiffonier.

A very convenient article to have in every household is a writing desk of some description. A table is not always a satisfactory place on which to write,

scrap (whether loose or in bales), shearing scrap, rod scrap, bolts nuts, punches, rivet spikes, rail ends, machine borings, flats, sheets and, in fact, almost any form of iron or steel which affords a surface sufficiently large for the magnet to act upon. When the

affords a surface sufficiently large for the magnet to act upon. When the material has been carried to where it is to be deposited, the current is turned off and the magnet at once releases the load. Scrap tin has always been an ugly form of material to handle satis-factorily, but by the use of this device it may be deposed of as rapidly and as easily as heavier stock.

Paper From Cotton Stalks.

The manufacture of paper from the fiber of the cotton stalk is one of the latest inventions which are said to have

passed the experimental stage. It is asserted that all grades of paper, from the best form of linen to the lowest grade,

can be manufactured from cotton stalks.

In addition to this a variety of by-prod-ucts, such as alcohol, nitrogen, material

for gun-cotton and smokeless powder, can also be secured in paying quantities. Mills for the use of cotton stalks in that

way may become general in the cotton-growing states. It is estimated that on an area of land producing a bale of cot-ton at least one ton of stalks can be gathered. Upon this basis from 10,000,-

could be secured for the production of paper, which would increase the value

Valuable Insulating Invention.

A new insulating material has re-cently been invented by a Portuguese firm of cork merchants. It has for its

time, the inventor claims, will give such constant and advantageous hold upon the water, that the propelling power is exerted to the greatest advantage and attainment of speed.

NO SWEEPING.

The Up-to-Date Method of Cleaning

Rooms and Furniture. One of the greatest inventions of the present time is the suction machine for renovating and cleaning hotels, apartment houses, etc. No sweeping is necessary. The power necessary to operate the apparatus is furnished by an engine fitted with a wagon and supplied by means of rubber hose. The dust is forced into the machine by suction, it being possible to clean every part of the room, ceilings, floors, walls, furniture, etc. Up to the present time this machine has been used for large operations only. Now a Chicago inventor

SUCKS UP THE DUST.

has patented a similar machine, which can be used in every household. The power apparatus is stationed in an out-The 000,000. house or other out-of-the-way place and the renovator reduced in size so that it can be manipulated by anybody. Ex-pert skill is not required. In cleaning the rooms the dust is gathered up in the collector, and when the entire house is cleaned the renovator is taken to the cellar and the dust removed. Its superiority over the ordinary method sweeping will be at once apparent.

firm of cork merchants. It has for its principal component granulated cork, and is called "corticite." Its application is unlimited, for it will resist the cold of a Siberian winter and the rays of a tropical sun; also the attacks of insects, even the white ant being powerless against it. As a nonconductor of sound it should be unseful in city flats. On boiler tubes and boilers it is said to reduce the temperature of the boiler-room to an agreeable one. It is not inflammable, and may be generally adopted for partitions and linings of houses. Bricks and slabs of "corticite" are made for this purpose, and can be sawed and bored like wood. It would seem to possess special advantages for use on warships, taking the place of wood as far as possible. the disorderly condition in which sewthis knife would save considerable labor and time.

NEW BOAT PROPELLER.

Ing machines are generally allowed to remain, has devised a sewing cabinet which should be of interest to every woman. It comprises a holder for spools, pins and needles and other small Vessel Equipped With Numerous is conducive to the utmost convenience

True Cures for Men

B. TAYLOR.

## Never Guess and Renew Your Strength

Do you feel that you are not the man you once were? Do you feel tired in the morning and easily exhausted? Is your back weak? Is your memory failing? Do you have difficulty in fixing your thoughts? Are you losing ambition? If you have any or all of the above symptoms, you surely do not desire to remain in your present condition. Let me explain to you my methods of rebuilding the vigor of men, and refer you to the thousands I have cured. Experiment or take chances of any sort. I attempt to cure only those diseases that I have been curing for the past 25 years, and feel sure I am justified in saying that I have learned all about them. Were I lacking in knowledge pertaining to my specialty I would never have attained my present success, nor would I today be recognized as the leading specialist treating men's diseases. If afflicted, you can depend upon Spermatorrhoes, Lost Vigor, Vari-cocele, Enpture, Files, Eydrocele, Organic Weakness, Contagious Blood Diseases, Acute and Chronic Ure-thral and Prostatic Inflammation. it that the service I offer you is the service you need, and is service such as can be rendered by no other physician.

My cures of this disorder are permanent and lasting. We tenies that stimulate temporarily, but thoroughly scientific treatment for the removal of conditions responsible for the functional derangement. "Weakness" is merely a symptom of inflammation or congestion in the prostate gland, and under my own original local treatment this gland is promptly restored to its normal state and complete functional activity is the lasting result.

No Better

VARICOCELE

An average of one man in five has variousele. Most men that have this dragging, draining weakness are not aware of it until it has wrecked their lives. Variousele causes congestion of the blood in some of the most vital blood vessels of man. It causes a dull, heavy, listless feeling which is often mistaken for nervous lebility or general decline of power.

"WEARWESS!

MODERN RAILROAD CAR.

MODERN RAILROAD CAR.

actually caused by the collision. Railroads in every part of the United States are at present experimenting with passenger coaches of fireproof construction, and are building no more of the old wooden type. The majority of these new fireproof cars have been of steel construction throughout, with the exception of course, of the seats. It has been found that this is the ideal material. The one disadvantage is in the fact that this type of car retains heat to a great extent, and the problem has narrowed down to a successful method of ventilation. One of the most recent devices for overcoming this fault is shown in the car here illustrated. This car is covered with a remevable hood, which is supported over the car, a space intervening between the hood and the top and sides of the car. This is claimed to afford efficient means for keeping the car cool. The hood is also made with the top and sides convex and tapering ends, thus assisting in securing speed.

Chicken Stealing Rattler. Correspondence Nashville Banner.
Recently I lost seven of a broad of choice Plymouth Rock chicks. I was confident that neither cats nor other

VARIOUTELE is a diseased condition of the scrotal veins. It may be caused by own, kicks, falls, heavy lifting, mumps, early indiscretion or may be a symptom only some special weakness. The proper treatment consists of local application for the purpose of dispelling the stagnant blood and contracting the swellen veins, as well as internal medication to strengthen the nerves which govern the blood supply to these veins.

Though emising you no trouble at the present time, your Varicocele will, if permitted to go without the proper treatment, impair and destroy the elements of vitality.
