

ZIONISTS AT HAGUE

Leading Men of Hebrew Faith Meet to Discuss Scheme for Restoration of Jerusalem—Opposition to Plan is Strong.

(Journal Special Service.)
The Hague, Aug. 14.—The Zionist congress assembled here today. Several hundred delegates were present at the formal opening and many more are expected. The American organization is well represented.

The meeting which began today is the tenth congress of its kind. The gathering has always attracted leading men of the Hebrew faith, and its somewhat sentimental and romantic propaganda—the restoration of Jerusalem to the sons of Abraham—but really, at bottom, a stern business and philanthropic proposition, has attracted world-wide attention as to the ultimate fate of the Jewish people.

"Zionism," as the movement is called, by which its promoters declare, the Jewish problem is to be solved—that is, the future of the oppressed Jew of Russia and elsewhere is to be provided for—is not without opposition on the part of some prominent men of the Jewish clergy and laity.

It is pointed out as true that although the leaders of the movement have been laboring assiduously for many years to rehabilitate the Hebrews again into a nation, and there have been a number of congresses held, until now nothing really definite has been accomplished.

It is said that in view of the developments through the present congress those who have hitherto cast doubt upon the scheme will rally to the standard of the leaders, creating a solidarity so powerful in numbers and wealth that success will be assured.

The congress is to consider a proposal for the acquisition of a tract of land in Palestine larger than any heretofore considered, for the purpose of Jewish colonization. This tract is not far distant from Haifa, which promises in future to supplant Jaffa as the port of landing in Palestine. This proximity constitutes one of the principal grounds for hoping for the successful exploitation of the property. The land, which is believed, cost, together with the incidental expenses, some \$100,000, and the idea is to form a syndicate for the purpose of raising the money.

It has been stated that one of the reasons for selecting The Hague as the meeting place this year was the desire of the Zionist leaders to bring their project to the attention of the international peace congress now in session here. So far as can be learned, however, there is nothing to substantiate this assertion, and it is regarded as extremely improbable that the peace congress would give the matter any official attention.

The Eyes of the World Are Turned Toward Utah

We have the richest gold ground on the face of the earth. Goldfield is rich, but our field is ten times richer. Africa pours forth her gold, but we will overwhelm its richest spots. Ours are placer mines that require but little money to equip them, so that showers of the precious metal shall fall upon our people.

READ THIS STRONG AFFIDAVIT, then that which follows in this advertisement, and if we have then convinced you that we offer the best proposition you ever heard of in all your life, please send money in our stock, and share with us in the profits which are sure to follow.

TO ALL WHOM IT MAY CONCERN: This is to certify that I, A. L. Raplee, have lived on the San Juan River, in Southern Utah, for the past fourteen years, and am acquainted with the placer properties owned by the Gold Dredging Company of America. I am familiar with the various bars and placer deposits of the said company, and I know of my own knowledge that all of them are rich in placer gold. During these years I have "panned" with my own hands hundreds and hundreds of pans of these deposits, and strange as it may seem, in all the vast number I have washed out, I have never found one that did not show color. I have made a large sum of money in this way, having many times found pockets of virgin gold to the value of more than \$1,000 each.

The properties of the Gold Dredging Company of America are especially rich in these deposits, and favorably located with reference to the bed and wash of the river. In my opinion there will be uncovered by this company, in its future operations with modern gold-saving machinery, an amount of gold that will equal many, many fortunes, for it is my opinion that the estimate of \$1.00 per cubic yard of the property is conservative indeed. I have often panned out in the field back of my house and in the wagon road by my house a much higher average than the amount of \$1.00 per cubic yard, and in the lower grounds where the river runs through the properties the average will exceed, in many places, \$25.00 per yard. After coming to this country I became so thoroughly interested in the search for these riches that the placer properties throughout the world have held for me an especial interest, and on every occasion, where I have had the opportunity, I have talked with miners from other properties in different sections of the country, and I am more and more certain that, taking into consideration the richness of these deposits, together with the ease with which they can be handled with proper dredging machinery, that the San Juan country will be the richest of its kind ever yet discovered. I, myself, have over and over again dreamed of the fortune which was here for me if I could only control and operate even one of the great modern mechanisms which dredging companies with their aggregations of capital are now using in the various parts of the world (and especially in California, Australia and Alaska countries) to take from river bottoms the sand and gravel deposits where is hidden treasures of gold. (Signed.) A. L. RAPLEE.

TOWN OF BLUFF, COUNTY OF SAN JUAN, STATE OF UTAH:—ss.
Personally appeared before me, A. L. RAPLEE, on this 18th day of May, 1907, who is known to me, and acknowledged that the above is his signature, and affirms that the statements made in the foregoing are correct to the best of his knowledge and belief.
(Signed.) PETER ALLEN, Notary Public. My commission expires May 6, 1910

WILL PLAINLY MARK RENOVATED BUTTER

(Journal Special Service.)
Washington, D. C., Aug. 14.—Manufacturers of renovated butter will not be able to hide their light under a bushel after tomorrow, when regulations issued by the bureau of animal industry are to go into effect.

OPPORTUNITY WAITS IN LINCOLN COUNTY

(Special Dispatch to The Journal.)
Linville, Ore., Aug. 13.—The southern part of Lincoln county is now inviting the homeseekers of small means. There are a great number of tracts of land, less than thirty acres, which will sell out for less than their improvements have cost them. This is a fine country. It has a fine climate and well developed facilities, considering it is a comparatively new country. What is now wanted is a new blood and energy. The opportunities are excellent for the farmer of even moderate means, who can get in on almost pioneer terms, and yet find a great deal of the pioneer hardship has been borne by his predecessors.

NEW BUNKO GAME WORKED IN SEATTLE

Demonstrators for New Kind of Health Food Alleged to Be Dupes of Discoverers.

(Special Dispatch to The Journal.)
Seattle, Aug. 14.—Two women and a man are in the city jail, charged with operating a bunco game, which bears some new features. Their names are Mrs. J. P. Rosenberg, Mrs. M. Dynes and W. H. Maloney. The first named is the president, she says of a company formed to manufacture "Our Ancestors' Flour," a kind of medicated whole-wheat flour. Maloney is the inventor of the flour, and Rosenberg is a clerk in the office. Their company, which the police says is now capitalized at \$200,000, is now capitalized at \$300,000.

UNBELIEVABLY RICH

The truth is, our ground is so rich that we dare not explain the absolute facts, lest we be misunderstood and classed as braggers or given to exaggeration. It is hard to have something too good to be advertised at its actual value, and at the same time be unable to secure from it the tremendously rich results awaiting its development, merely for the lack of a few thousand dollars; yet this is precisely the position in which we find ourselves. We have, in Southern Utah, TWO THOUSAND TWO HUNDRED AND FORTY ACRES OF AS RICH PLACER GOLD MINING GROUND AS EVER WERE KISSED BY THE SUMMER'S SUNS, right on the banks of the great San Juan river, 1,600 feet wide at this point, containing a volume of water sufficient to operate all the placer mines of the world. These fourteen 160-acre claims of gravel bars contain gold enough to make wealthy every family in the state of Oregon, and if we had \$50,000 at our disposal today this stream of richness would be flowing into the coffers of our people within four months' time.

WHY DO NOT RICH MEN TAKE HOLD OF YOUR PROPOSITION?

We fancy we hear you asking, They would—if we would relinquish seven-tenths of our stock to them, so that they could reap all the immense profits. We have offered after offer of that kind, but it don't go with us. We found these mines. We located them. We have tested them. We know that they will make us and the few that join in with us independently wealthy, and we will not surrender them to any of the grasping, greedy ones who would turn around and bid us go! A thousand times rather would we gather together a little band or company of friends of small means, and our hearts and purposes knitted together, march along to prosperity by ourselves, than that we be dominated by some wealthy influences with hearts of stone and tentacles constantly outstretched, like the octopus, seeking to entangle another victim.

Every Share Is Fully Paid Up and Non-Assessible

J. E. O'LEARY, Secretary-Treasurer.
H. W. BAKER, Asst. Mgr.
S. E. VIBSON, Superintendent.
W. H. LEVANAWAY, Asst. Supt.

WE WANT MEN AND WOMEN OF MODERN MEANS

To link their destinies to ours, then read with us the profits that sure as there is a sky above, will be ours when our equipment has been set in motion. In addition to the 2,240 acres referred to, we have 1,760 acres, comprising 11 sandstone placer claims, making a total of 4,000 acres of gold ground, which has hidden within it a fortune sufficient to elevate to a plane of magnificent opulence every man, woman, boy or girl who has ever perused the columns of The Oregon Journal. Beyond the cost of the mining property, beyond the cost of machinery, beyond and above the cost of extraction from the sands and gravel, WE HAVE A PROPERTY THAT WILL YIELD \$365,904,000.00 PROFITS TO OUR PEOPLE, and then have enough sand and gravel left to operate the mines for another hundred years. How do we know? We have taken yards of gravel from here and there—from 500 different places on our claims—and washed it out by crude hand process. We thereby ascertained its value. It is 60 feet down to bedrock, and as the engineering department of a railroad figures out the number of yards of earth to be removed in an excavation, so have we computed the number of yards of gravel and sand bars our property contains. This is different from quartz mining, where ores may vary.

WE CAN TELL EXACTLY WHAT WE HAVE AT THE BEGINNING, AND DO NOT HAVE TO GUESS.

A. D. Burgoyne, foreman at our mines, cannot clearly understand why it is necessary that we should advertise our stock for sale. He is on the ground, and knows exactly what we have. He is not guessing, either, and wrote us the other day as follows:

COPY OF LETTER TO H. W. BAILEY FROM MR. A. D. BURGOYNE

BLUFF, Utah, July 18, 1907.
Mr. H. W. Bailey, Portland, Oregon.
Dear Friend— I shall now answer your very welcome letter, which was received by me last week. I am at present in Bluff, Utah—came up the 14th of the month—and am going back in the morning to the old grounds.
Now, Harvey, I suppose you are getting ready to come down here very soon. You told me to write to your father. I will, but I must have his address.
I am certainly well pleased with the property here. Our property is very rich. ALL KINDS OF GOLD HERE. IT IS O. K. IT WILL BE ONE OF THE BIGGEST PAYING PROPERTIES IN THE STATES. I can take my pan and go to the river, each time getting large colors of gold. There is more ground here for dredging than we can ever work out. The stock will surely fly up to the high notch when the first machine is installed. What is the matter with the people up there in your town—are they scared of the stock? I tell you they won't be able to buy it in a year from now.
I wish you success. We have it at this end of the line. Everything is coming out far better than we expected. Well, I will draw to a close. Yours truly,
A. D. BURGOYNE, Foreman.

WE ARE SELLING SHARES FOR THE PRESENT AT TEN CENTS EACH

We have never advertised a share before. It ought not to be necessary to spend much money to sell our stock. Our proposition will bear, and we invite, the most searching investigation of every statement we make concerning it. But 510,000 shares of our treasury stock will be sold. It ought to go within a month. In fact, if every reader of The Journal but knew the facts, we would sell every share we are offering within a week. If we do not have unprecedented demand for our paper, it will be because the people have not knowledge of the opportunity we are offering buyers to speedily become rich.

Write Us a Postal, and We Will Mail You a Booklet Containing Complete Sworn-to Information Concerning the Proposition of Which This Advertisement Treats

The Gold Dredging Company of America
