THE OREGON DAILY JOURNAL, PORTLAND, THURSDAY EVENING, AUGUST 15, 1907.

(Special Dispatch to The Journal.) Helena, Mont., Aug. 15.—The an-mouncement made by former Governor S. T. Hauser on his return from New York, that funds had been provided for the building of a third great dam across the Missouri river and that a portion of the electric power developed would be util-ized for the Helena-Butte electric line, means volumes for the minense district between the two cities and transporta-tion from mines to smelters will be available at a nominal cost. This will apply to both East Helena and Butte, but as the one commercial smelter in the latter city is overtaxed with Sen-ator Clark's output. East Helena will be means the ficiary. Indeed, so crowded are the Anaconda and Great Falls smelters that there is reason to believe the Amalgamated will build a third

ised for the Helena-Butte electric line, means volumes for the mining industry of central Montana. Cheap power will be furnished for the immense district between the two cities and transporta-tion from mines to smelters will be available at a nominal cost. This will apply to both East Helena and Butte, but as the one commercial smelter in the latter city is overtaxed with Sen-ator Clark's output, East Helena will be the chief beneficiary. Indeed, so crowded are the Anaconda and Great Falls smelters that there is reason to believe the Amalgamated will build a third plant on the shores of Lake Hauser, cre-ated by the backwaters of the second dam. Amalgamated interests are large-ly behind the three dams and also the Butte electric road. Another reason for selecting the Lake Hauser site is found in that a perfect and perpetual dump would be found in the Missouri river, thus obviating all lawsuits for damaged and Boulder. Governor Hauser said this matter was the case at Anaconda and Boulder. Governor Hauser said this matter was the above. That it will be ultimately built, however, admits of

Platinum From New Source.

Platinum From New Source.
Hat watched Philadelphia mint re-turns praty closely for some time, W. G. Brown, a local assayer and mining man, noticed that considerable platinum was being found in the gold which came from the western states and particularly Montana. Brown traced some of this gold to Warm Springs, gulch, near here, and began experiments which proved its existence and, he believes, in commer-cial quantities. He says a rough sep-aration of the gold from the platinum could be made with handsome profit at the mine, the chemical refining to be nearly twice as much as gold, and its saving will doubtless become a feature of the industry in this state hereafter, especially in Warm Springs.

Some Recent Strikes.

Some Becent Strikes. The Contact Copper company, operat-ing in Colorado guich, above the Broad-water hotel, has struck in its shaft at the 60-foot level a body of exceptionally rich copper ore. N. H. Graemling, who was one of Heinze's experts in the great copper war, is one of the promoters of this mine and is of the opinion that a new Butte will develop near here. The Butte & Elliston company, oper-ating in Powell county, just across the Rocky mountain divide from Helena, has made five shipments of ore to the East Helena smelter which average \$40 in gold, 17 ounces of silver and 8 per cont copper.

hast Heiels sincter which average set in gold. 17 ounces of silver and 8 per cent copper.
The Baid Butte company has made another big cleanup, and it is found that the operations for July were in excess of \$1,000 a day in gold.
At a depth of 30 feet the Carter Mining & Milling company has struck near the town of Carter, a vein varying from 14 to 16 inches in width which assays approximately \$3,000 a ton, with the chief value in gold.
A big body of high grade ore has been struck in the Lehish mine in Madison county. J. B. Salisbury has made a similar strike in the same district.
A. J. McKenzie has struck a six-inch vein of 14 per cent copper ore in his Princess mine in Baboon sulch, Madison county. The outcroppings on the surface show a ledge more than 200 feet wide.

wide. In the 50-foot tunnel of the Coeur of the & Montana company's mine near out creek, Sanders county, ore has been taken which assays 23 per cent copper, \$18 in sliver and a trace of gold, while another shows \$105 in cop-per and gold.

The Dallas (Texas) Trades assembly has appointed a committee to consider the project of erecting a labor temple for the unions of that city.

STEEL BRIDGE TO SPAN UMATILLA AT ECHO

(Special Dispatch to The Journal.) Echo, Or., Aug. 15.—A new steel bridge is to be built across the Umatilia river at Echo, according to an order just made by the Umatilia county court. In addition to the 120-foot steel span, matter was in abeyance, and not ripe for in addition to the 120-root steel span, definite statements as yet. That it will be ultimately built, however, admits of three-foot fill made. There will also the doubt. The new electric line will tap, Corbin, Boulder, Basin, the Eva May and many other well known dis-tricts. Platinum From New Source.

BRONZE TABLET TO MEMORY OF PILGRIMS

(Journal Special Service.)

Gloucester, Mass., Aug. 15 .--- Citizens of Gloucester today unveiled and dedicated a bronze tablet at Stage Park in memory of the men who, under the di-rection of Rev. John White, came from Dorchestor, England. in 1623, settled here and founded the Massachusetts Park colour

Bay colony. The dedication ceremony was at-tended by many notables. Senator Hen-ry Cabot Lodge delivered the oration of

Eunting for Trouble.

"Twe lived in California 20 years, and of burns, sores, wounds, boils, cuts, sprains or a case of piles that Buck-len's Arnica Salve won't quickly cure," writes Charles Walters of Alleghany, Sierra Co. No use hunting Mr. Wal-ters, it cures or money refunded at Bad ters; it cures or money refunded at Red Cross Pharmacy. 25c.

Mexican

Mustang Liniment

Goes quickly to the very core of the disease and stops the most deep-set, exeruolating pains almost instantly.

Mexican

Mustang Liniment

Ouros every alimen of Man or Beast that a good, honest Liniment can ours. None better, None so good.

in the state lines f Oregon, it has been a case of work day and night for myself and my staff. Hardly do we get the stocks arranged for the next day's business before we hear the hammer, hammer, hammer on the door-customers anxiously awaiting admittance-and as a matter of fact I have not had time to get the real astonishing offerings into print. Right in the busiest I am arranging a few of Friday's extra specials. I cannot go into descriptions, I am too busy, but just come and see me, good people, that's all I ask." DAVID LION, Sales Mgr. P. C. S. Co.
