

# PEOPLE IN FAVOR OF GRAFT PROSECUTIONS

### San Francisco Primaries Indicate Popularity of Prosecution Being Conducted.

### UNION LABOR PARTY IS RULED BY SCHMITZ

### Herrin Laid Low at Primaries, But Though Anti-Railroad Majority Controls Republican Convention S. P. Has a Third of Delegates.

By John Taylor Waldorf.  
San Francisco, Aug. 19.—With the returns of the primary election staring them in the face, most of the politicians in this storm center realize that the people desire a continuance of the graft prosecutions. Only the lieutenants of Eugene E. Schmitz are still blind, and even they may yet see the great white light of the 25 per cent majority vote which the union labor faction, headed by Michael Casey, leader of the teamsters union and Richard Cornelius, leader of the striking carmen, represented workmen who think a grafter is grafter, no matter what label he bears.

The size of the Casey vote was a great surprise to the union labor country committee, which is controlled by the deposed mayor who is now the star prisoner in the big jail on the Ingleside. They conceded Casey 15 per cent of the vote, which would have given him about 900 votes. Instead he got nearly 2,000, carried one district, and came within a narrow margin of carrying three more. Richard Cornelius, the same Cornelius who made a vain effort last December to help Portland's striking carmen, had an army of union pickets out on primary day peddling Casey tickets, and by so doing brought down on his head the wrath of H. H. McCarthy, president of the building trades council, which organization has contributed \$100,000 of the \$125,000 already expended by the laboring unions in their effort to save Cornelius and his men from defeat in the present long drawn out car strike.

Casey himself is a candidate for delegate to the labor convention, and was beaten 10 votes, after a bitter fight. Now the victors are threatening vengeance, some harbor the notion of hinting that many of the unions in the building trades council will soon cease their contributions to the strike movement. If this happens the strike will end suddenly, for the bus service started by the carmen in opposition to the United Redwooders' strike, and at a monthly loss of more than \$10,000, and any extensive withdrawal of financial support would make the burden too great for the carmen to bear.

Another bad sign for the carmen is that 50 of the 200 unions in the city have never contributed a cent to the strike. Many workmen are "cheating" a little, taking aly rides on the cars when they are in a hurry to get somewhere, and the union labor boss Joe Sullivan, a union labor poli-

tician, who shortly before the primaries joined forces with Michael Casey and put his name at the head of the Casey ticket in the Thirty-third district. The county committee of the labor party declared him a traitor and flooded his district with circulars containing an affidavit to the effect that Sullivan had been seen riding on the streetcar. A. Tveitmo, secretary of the building trades council, and right bower of F. E. McCarthy, headed the regular ticket and made a strenuous fight, but when the ballots were counted it was found that Sullivan had swiped the district, getting 50 per cent of the total vote.

Will Garry Schmitz.  
However, as the Casey forces elected only 12 delegates out of nearly 200, the friends of Schmitz will have full swing in the labor convention. The feeling of the majority toward the convicted leader was made plain the night of the primary election. As soon as the returns assured the triumph of the regular communication with the county jail was established by telephone and the word went out to Schmitz: "We have carried the town." If the supreme court should reverse the verdict of conviction of extortion now standing against Schmitz he would be renominated with honors and the remains behind the bars one of his friends will be given the nomination. Whatever happens a year for the party in charge. Now James A. Ryan, leader of the victorious reform forces, is being boomed for mayor by his followers, and his nomination is more than probable.

Herrin has more than one third of the delegates, most of them disguised by a reform label, but he is not likely to make a year for the party in charge. The trouble will probably come after Ryan is named. The Herrinites have long knives, and if dark-alley work can beat Ryan at the polls he will be beaten. The machine wants to resume control next year, and Ryan as mayor would be in a position to throw the switch at the critical juncture, but the whole train of "thoroughbreds" into the ditch. Friends of Ryan are trying to bring about fusion with the Democrats, but Gavin McNab, whose control of the Democratic organization was indorsed at the primaries by a vote of 3,400 to 1,000, has given the movement no encouragement. As for the district attorneyship William H. Langdon has a good chance of getting both the Republican and Democratic nominations. The Democrats do not like him because his candidacy for governor in the Independence campaign last year cost Theodore Bell and elected Gillett, the Republican candidate, but McNab does not believe in letting prejudices stand in the way of good government.

Incidentally the primaries put many politicians in the class known as "dead ones," and while the wake was still in progress a general undercurrent of gloom to town and held an embalmers' contest.

Tuesday, the 20th, will be the last day to receive discount on east side car bill.

# WE SECURED A BIG COPPER PROPERTY LAST FRIDAY BY WIRE

## It Costs \$75,000

### And Is Added to the Champion Group Mining Company's Holdings in Siskiyou County, Cal.

We feel like shouting the glad tidings to our stockholders that we FRIDAY secured the property known as the Beaver Creek Copper Claims, covering an area of 600 feet wide and 31,500 feet in length, the outcroppings of a copper vein for a distance of nearly six miles, containing more than 500 acres of land. There are 21 claims in all, and we secured the entire bunch, the title to which is absolutely flawless. These claims are located on Beaver Creek, a tributary of the Klamath, and in the same copper belt as the Blue Ledge Mine, recently sold to a New York company for \$200,000.

### OUR BUY OF FRIDAY RANKS AMONG THE MOST IMPORTANT WE HAVE EVER MADE.

It strengthens every share of stock we have sold or have on the market, as we merely add to our holdings and it becomes a part of them. Those who already have purchased will note this announcement with satisfaction, as IF WE HAD NO OTHER MINING PROPERTY IN SISKIYOU COUNTY, AND THEY HAD NO CLAIM UPON OUR NOW-PRODUCING GOLD MINES AT ALL.

Our purchase of Friday would of itself carry the small amount of stock we have issued at par and more. But, as we have said, our shares cover everything we own in Siskiyou county. Nothing is reserved, and now we shall be astonished if, within a year, our stock is not selling freely at \$5 per share. It will not surprise us if it goes to \$10.

### LINKED TO OUR GOLD PROPERTIES, THIS COPPER PROPOSITION WOULD SEEM TO REMOVE EVERY ATOM OF CHANCE IN OUR INVESTMENTS.

It is well known that copper mining is only next to gold in its profits. Now our shares have both of these precious metals behind them. Just think of a copper mine more than five miles in length, and 12 gold-bearing, gold-producing quartz claims consolidated into one property. And remember our constant offer to any person buying any considerable amount of stock to pay his fare to the mines and return and all expenses of the trip, then if he discovered that we have in anyway misstated anything; if in any of our publications, any of our advertisements we have deviated one jot or tittle from the absolute and exact truth, we will cheerfully refund to the buyer, without parleying and without question, every cent he or she has paid us for shares so bought.

### THE SUPERSTRUCTURE OF THE WORLD IS BUILT UPON GOLD.

There never was a prosperous nation that did not found its financial system upon gold or silver. There never was a jewel made of these metals, nor has there ever been a dollar of money coined that was not extracted from the earth. If it be said that "more money has been put into the ground

than taken out of it," inquire, "Where did that money come from?" In the treasuries of the nations there are tons and tons of gold. In the banks of the nations there are other tons and tons of this precious metal. Beneath the surface of the earth there are millions and millions not yet uncovered, but its hiding-place is being found by the prospector from day to day. It is enriching thousands from year to year. It is enriching nations, too.

### TELL US, WHAT WOULD BECOME OF THE WORLD WERE IT NOT FOR GOLD?

The struggle for the metal is keen and vigorous. It builds the homes of the poor and mansions of the rich. It erects fortresses and warships, hospitals and churches. It enters into every avenue of commerce and enterprise of life. Its channels of usefulness are numerous as the stars. It is the best of all Nature's gifts to man.

### THE WORLD'S AFFAIRS WOULD BE REDUCED TO CHAOS WERE IT NOT FOR GOLD!

Every man and every woman is entitled to a generous share of this precious gift. How to acquire it is a problem that has puzzled millions. It will puzzle other millions, too. Still, how to obtain gold is not a mystery. The river flows from the fountain at its head. Gold must come from the earth. If we would ascend a mountain we must go to where the mountain is. It will not come to us. Therefore, we go to the earth for gold. We delve into its fastnesses and find gold there, blasting its rocks, crushing them to atoms, milling the particles and husbanding the product. This is distributed to all those rightfully entitled to share in the increment, and the work of acquiring money by the process of mining has been completed.

### THE CHAMPION GROUP MINING COMPANY

Is engaged in mining. It owns REAL mines. It is not exploiting "prospects," but MINES that it has acquired from original developers—from those who had uncovered the rocks found pregnant with quartz, but without funds necessary to completely develop the discovery. We have equipped the property with a five 850-pound stamp mill, absolutely complete in all its details. This ought to be immediately en-

larged 10 times. It will be—must be—and the money we are receiving from the sale of shares will be wholly used for that and other development purposes.

### ALL OUR EFFORTS, ALL OUR ENERGIES, ALL OUR MEANS WILL BE EMPLOYED TO HURRY UP THE HOUR WHEN OUR MINES SHALL GLADLY DEN THE HEART OF EVERY HOLDER OF OUR SHARES.

Our properties are only seven miles from the railroad, and a splendid wagon road every inch of the distance. We constructed, at an expense of \$10,000, five miles of this road ourselves. It is our private property. Our predecessors had not the means to do this work. It was necessary to forward the interests of our mines, and when a thing is necessary we do not hesitate. We stop at nothing—if for the best. We're not mossbacks. We do things. Our good friends will soon discover this.

### WHEN WE SELL A SHARE OF STOCK WE SELL AN INTEREST IN ALL OUR 37 SEPARATE AND DISTINCT PROPERTIES.

We are not selling shares in one to develop another. We have grouped all our Siskiyou holdings together, and our people buy an interest in all when they buy an interest in one. Like the great president of our great nation, we believe in a SQUARE DEAL—and practice that belief. DO NOT FAIL TO BUY THESE SHARES WHILE THE OPPORTUNITY IS AFFORDED.

### REFERENCES:

Any business man or Siskiyou County Chamber of Commerce, Siskiyou, California.

### PARTIAL PAYMENTS MAY BE ARRANGED.

That none may be debarred from this privilege of these shares—from participating in their profits in the future—if it be desired arrangements may be made whereby stock can be secured by making a small payment at time of purchase, the balance in weekly or monthly payments. This will enable persons of small means to follow the example of the Hearsts, the Floods, the Mackeys, the Spreckles and the host of other wealthy men of the Pacific coast.

# WE ARE NOT SPECULATORS IN MINES

We bought the McKinley Group and the Champion Group of mines in Siskiyou County, California, 390 miles south of Portland, consolidating them into one property, owned by one company, and incorporated for only \$500,000. Had we been mining speculators we would have incorporated for \$5,000,000 or \$10,000,000, so that we could have sold half a million dollars' worth of shares and still have owned the mine almost in its entirety. The speculator, the value of whose property is chiefly represented by the paper on which his stock is printed, always capitalizes his company up in the millions, while the honest developer of mines, putting his money into them as an investment—as a purely business proposition—capitalizes his mine at a small figure. Then when its dividend-paying days arrive there is the best results for all concerned. In other words, it is easier to pay 50 per cent dividends on a capitalization of \$500,000 than so much as 1 per cent on \$5,000,000 or \$10,000,000. The small capitalization is a square deal; the other isn't. At first we had not intended to sell any stock at all in our properties, but we soon discovered that with improved modern machinery and appliances we could hasten the time when our mine would yield its best results, and having exhausted our means in the purchase of the properties, we concluded to let the public in on our deal, to a limited extent, hence our shares are upon the market at present prices for a short time only, and we are confident that these shares, now that we have added the great copper claims, 21 in number, to our holdings, will speedily advance to \$5 per share. We are sure of this, almost, as that we are living.

### THE CHAMPION GROUP MINING COMPANY IS A STICKLER FOR A SQUARE DEAL—This it will give its shareholders. It wants it for itself. It is just that everyone should have it. The days of sharp practices are happily dying out. Let us all be glad of that.

### TALK IN MILLIONS

#### THE ALMOST INCOMPREHENSIBLE RICH MINES OF SISKIYOU COUNTY, CALIFORNIA.

The Evening Telegram of August 15 has this refreshing news article relating to the mines of Siskiyou county. It ought to be remembered that the millions of dollars spoken of here were washed down from the very mountains which contain the quartz owned by THE CHAMPION GROUP MINING COMPANY. The body of the gold is, of course, still in the rocks, and this is what we are after. The immense wealth therein contained is yet to be taken out, and as we dig out and crush the precious rocks, their glittering gifts will be divided among our people. WE OWN THE GROUND AND NO ONE CAN ROB US OF ITS TREASURES. Every stockholder in our mines is a part owner of them, too. But read what The Telegram said on Thursday, remembering, always, that Mr. Patterson is an old-time resident of Portland and in no wise interested in our properties:

"C. A. Patterson of 211 Park street will leave this evening for Yreka, California, where he is largely interested in gold mining, owning the Spencer mine and having an option on the Eliza, which he expects to take over within a few days. 'Railroad fare,' Mr. Patterson says, 'from Portland to Yreka is \$12.50, and from Yreka to the mines, over a splendid road by stage, is \$1. The distance is 390 miles, and leaving Portland at 7:45 in the evening, one arrives at Yreka at 4 o'clock the next afternoon, and 40 minutes later may be upon the ground that has turned out more than \$100,000,000, and is today one of the richest mining camps in the United States. I mention these facts, distant and time, Mr. Patterson continued, 'that you may be impressed with our proximity to gold mines famous in all the mining camps of the country, but as little known to Portland as if located in Johannesburg or the wilds of Yimbucoos. The reason for this lack of knowledge I attribute to Portland's boundless prosperity, and the hum of business on every

hand, especially since the exposition. Almost like pits left by smallpox on the human face, the part of Siskiyou county adjacent to Yreka is dotted with mining properties, from some of which fabulous sums of gold have been extracted. Take the three branches of Humboldt creek, for example. From the West Fork alone \$27,000,000 has been taken. The ore was washed down from the mountains, and these are now being uncovered, blasted out and milled, and are proving to be of exceeding richness. New capital is coming into the district, the prospector is being replaced by the actual miner, and Siskiyou county is again coming to be known as the Mecca toward which are turned the eyes and money of men of means from the principal money centers of the country. Portland people ought to know its neighbors just over the line in California better than they do, Mr. Patterson added. 'Its acquaintance is a good thing to cultivate.' JOHN BARRE DIED AND WE SECURED THE MINES.

John Barre, president of the McKinley Mining company, died in May, 1906. The majority stock of the corporation belonged to the estate. This was settled on October 1 of the same year. We had been informed that the property, consisting of the McKinley group and the Champion group, 12 claims, just arrived at the productive period, could be purchased. They were examined by our representative and favorably reported upon on October 3, and next day became our property. The Barre people (the McKinley group) had taken from the mines exactly \$6,726.85. The company was composed of poor men. It had nothing modern to work with. It had the quartz, but no money. We bought its mines. The property was so rich that immediately we were

offered an advance of \$25,000 for it. We declined the offer. It was not for sale. We felt sure that we could interest sufficient capital to capture the mines, and that our shareholders and ourselves, we having advanced the purchase money, would come very much better off than we had been disappointed. We have not been disappointed.

### PROSPECTORS ARE BUYING OUR STOCK WITH A MOST CHEERFUL READINESS.

We are having no trouble on that score. And for those who have been our partners, we have some cheerful news. The original owners of our mines had reached only \$14 to \$20 ore. That was fine-paying rock, but WE HAVE NOW REACHED QUARTZ THAT RANGES FROM \$20 to \$2,480. Not all of it mills so much, but it averages four times better than the McKinley people mined. In fact, the truth of the whole matter is that we have a great mining proposition over there in Siskiyou county, California, and with a few months' more development, an enlargement of our mine and an aerial tramway to carry our ore over the gulch to our stamps (at a cost of 5 cents per ton, as compared to 16 cents and \$1 by wagon, as at present), we will return to the pockets of these investors the money they have entrusted to our care and judgment, and thereafter the handsome dividends we feel sure will be as constant as the passing of the months.

### MONEY IN MINING SHARES.

Nearly every reader of newspapers has become familiar with the history of the Mohawk mine, in Goldfield, Nevada; therefore, in directing attention to riches made in mining shares, we refer to that property merely because of human familiarity with its record. This record has been repeated over and over again, and will continue to be repeated so long as the world shall exist. We believe it will be almost, if not quite, duplicated in our own case. This is what has happened to owners of Mohawk shares. \$5 invested in Goldfield Mohawk shares at first hands would now be worth \$3,400.

### A REGION LINED WITH GOLD

Siskiyou County, Cal., Has Been Rediscovered, So to Speak—A Fortunate Man Has Been There. (Evening Telegram, August 12.) C. F. Bunker, 514 Chamber of Commerce, has just returned from a trip

to Siskiyou county, California, made in his own interests and for private purposes. Learning of this, the Champion Group Mining company Cough building, asked the gentleman if he would write his impression of the region in relation to mining, which he kindly said he would do, and the following was received from him today: PORTLAND, OR., Aug. 12. (Champion Group Mining Co., 204-T Couch Bldg., Portland, Or.) Gentlemen: It was with considerable pleasure that I called upon you a few days ago to talk over the great future of the mining in Siskiyou county, California. It has been my good fortune to spend considerable time in and around Yreka, California, and I am well acquainted with the resources of Siskiyou county. There is no doubt in my mind that the Siskiyou mining district is rich in gold and copper, if not the richest county in the United States, not only in gold but also in silver and copper. When going from Yreka to your property, it is wonderful to see the great number of placers that were worked in the early days, records of which will show that the amount produced in gold was something enormous. I wish you every success, and from what I know of your property I can see no reason why you should not become a big dividend-paying company and produce a large proportion of the gold now produced out of the mines in your section. Very respectfully yours, C. F. BUNKER, 514 Chamber of Commerce, Portland, Or.

### CUT OUT AND MAIL THIS COUPON TO US TODAY.

The Champion Group Mining Co., Couch Building, Fourth and Washington streets, Portland, Or.  
Gentlemen: Please mail me, without cost to me, descriptive booklet relating to your Champion Group Mining properties, and oblige.  
Name.....  
Street and No.....  
Town..... State.....

### ALL SHARES AT HALF PRICE NOW

All our shares are at half price—really selling at half actual value—at the present time. Price will positively be doubled within a short time. This stock will sell at \$5 per share before the end of 12 months. We are confident of this. This is absolutely the best stock bargain ever offered the people of Portland or the Pacific northwest. It stands upon both a gold and copper foundation, a foundation substantial as that upon which the treasury of the nation stands.

## ROOSEVELT GOES TO CAPE COD

### President Speaks at Provincetown Tomorrow at Cornerstone Laying.

### COMMEMORATES LANDING OF PILGRIMS

### Yacht Mayflower to Drop Anchor Where the Original Mayflower Landed First Settlers Two Hundred and Eighty-Seven Years Ago.

(Journal Special Service.) Provincetown, Mass., Aug. 19.—The cornerstone will be laid here tomorrow for a monument to commemorate the landing of the Pilgrims, and Provincetown is putting on her best bib and tucker in anticipation of the occasion. It is expected to be one of the most memorable celebrations Cape Cod has ever seen. President Roosevelt will be here, together with Governor Guild and other notables. Many ships of the North Atlantic squadron have already departed, and the fleet is expected to arrive in making the celebration one long to be remembered. The presidential yacht Mayflower will drop anchor about 10 o'clock tomorrow morning inside Long point, where the original Mayflower is supposed to have landed in 1620. Pilgrims 287 years ago. The president will be welcomed by Governor Guild and the local committee. After landing the visitors will be escorted to the top of Town hill, where the ceremonies of the day will take place. The Massachusetts grand lodge of Masons will be in charge of the exercises. In addition to President Roosevelt the speakers will include Ambassador Bryce, Senator Henry Cabot Lodge and Congressman Lovett. A banquet and literary exercises in the town hall.

## FAMOUS SCIENTISTS MEET IN BOSTON

(Journal Special Service.) Boston, Mass., Aug. 19.—Boston welcomed several hundred of the most noted scientists of the world today at the opening of the Seventh International Zoological congress. The congress will be in session four days. The formal opening took place in Jordan hall this afternoon, with Prof. Alexander Agassiz of Harvard, presiding. In conjunction with the zoological congress, meetings are being held by the Entomological Society of America and the America Microscopical society. After the zoological congress has concluded its session in this city the foreign delegates will make a tour of a large section of the United States and Canada, visiting the museums and scientific institutions of New York, Philadelphia, Washington, Toronto and other cities.

## Saginaw Has a Birthday.

(Journal Special Service.) Saginaw, Mich., Aug. 19.—This was a great day for Saginaw. The occasion was the opening of a week's celebration of the city's fiftieth anniversary. An attractive program of parades, historical exercises, athletic sports, aquatic contests and other forms of festivity has been arranged for each day of the week. The city is rapidly filling with visitors.

NO STUDENTS. NO GAS. NO COCAINE.

### We Set the Pace Specialists in Painless Dentistry

TEETH WITHOUT PAIN A SPECIALTY

Nervous people and those afflicted with heart weakness can now have their teeth filled and extracted without the least pain or danger. To introduce our painless method until August 31 we will do all kinds of dentistry at one-half our regular prices. Protective guarantee given with all work done by us. Lady in attendance. Open evenings.

### Chicago Dentists

Suite 3-4-5 Raleigh Bldg. Sixth and Washington Sts. Phone Main 3880.

### CARTER'S LITTLE LIVER PILLS.

## CURE SICK HEADACHE

Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pains in the Side, etc. While their most remarkable success has been shown in curing

Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cause

Ache they would be almost priceless to those who suffer from this distressing complaint, but fortunately their goodness does not extend here and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. Buy at all drug stores.

Small Pill. Small Dose. Small Price.
