FINANCIAL SITUATION IS MOST SATISFACTORY

Letters From 30,000 Business Firms Paint Outlook as Bright for Country.

MONEY IN DEMAND FOR DEVELOPMENT

No Coin for Speculative Purposes Because It Is All Tied Up in Enterprises—Strain on Money Centers Great.

(Journal Special Service.) Chicago, Aug. 22.—The Commercial National bank of Chicago today issued a summary of financial, commercial and industrial conditions, stating that the business situation is sound and the outlook assuring. The report in part follows:

We endeavor in this summary to present to the public an answer to the question which all men are asking: "Is the business situation sound and the outlook assuring?" This answer is drawn from a composite picture of conditions as graphically described in letters from thousands of banking, manufacturing and merchandising correspondents throughout the country. Not far from 30,000 separate replies enter into the picture before us, and the definiteness of the image is remarkable. There is no vagueness or blurring about it. It is clear and incisive.

Money Demand and Credit. The bankers of the country with few exceptions in the far west, report an extraordinary demand for funds in all lines of business activity. Interest rates are very firm everywhere and in the central reserve and larger reserve cities the inquiry for funds so much exceeds the supply that money is described as "very tight." The range of our investigation justifies the conclusion that bank deposits show a straight average increase of about 14.2 per cent against a similar average increase of 10.8 per cent in the loans. The averages weighted according to the relative magnitudes of the totals would probably show a closer correspondence between the growth of deposits and of loans. It is significant that the states of primary production in agricultural and mineral products show a larger margin of deposits over loans than the states of secondary production, that is, the essentially manufacturing and trading communities.

The consensus of opinion is that the demand of legitimate business will continue to absorb all available funds for some time to come and there is nothing in our review to suggest any recession in rates, at least not before the year-end liquidation.
