# ORDERED BY RAILROAD

(Journal Special Service.) St. Louis, Mo., Aug. 27.-Stockhold-ers of the St. Louis & San Francisco Railroad company held a special meet-ing here today to authorize an issue of llen 1

Home Telephone Bond Applications will be oversubscribed. List goes out tomorrow but closes Saturday night. Send all applications in at once to Walter O. Poor, District Manager, 5 Lafayette, block, Portland, Oregon.

# What Western Financiers Say of

# HOME TELEPHONE BONDS

"At the request of the Home Telephone company of Portland, we beg to say, regarding the bonds which they have issued on their plant in this city, that after a full investigation of same, we have taken \$50,000 in bonds, which shows better than words how we regard them."-Frank Watson, President Merchants' National Bank,

"I have followed closely the course of the market on the securities of the Home Telephone companies of southern California, and they have invariably shown a steady increase in value. After careful consideration, we invested in the bonds, underwritten by the National Securities company, of the Home Telephone companies building in the Pacific northwest."-M. P. Snyder, President California Savings Bank of Los Angeles.

"I have been familiar with the Independent Telephone movement in this city and vicinity. The services rendered by the Independent Telephone company have been so much superior to what the public has been accustomed to receive that the system and its securities became and have remained deservedly popular. I have handled both the stocks and bonds of the Home Telephone company with great satisfaction and profit."-W. C. Patterson, Vice-President First National Bank of Los Angeles.

"I have invested considerable in both bonds and stocks of the Home Telephone company of this city, Southern California and also of Portland, Oregon, and I think they are certainly a safe and excellent investment."-Herman W. Hellman, President Merchants' National Bank, Los Angeles.

"Our investments in Home Telephone securities have

For selected stock the local potato market is in excellent shape today. Too liberal supplies of green and unmatured Ilberal supplies of green and unmatured spuls caused lower prices in the lat-ter, but for fancy stock the market is in better shape than ever. Alaska de-mand is still quite liberal and prac-tically all the buying for the outside at this time is for the northern mar-kets. For this reason dealers are very easier to secure only the best potatoes that can be bought and in some inspuJs ter stances they are paying a fractional ad-vance over the prices quoted in order to get something better than the ordiary quality

Along with the Alaska potato demand there is a call for a small amount of onions. This keeps the latter market in fine shape. Dressed meats of all kinds still hard to obtain. Price same.

Fish market prices remains at the top notch. Markets still have some fresh salmon left over from the open

"I received a long-distance telephone call from a party up the valley, who asked me whether he should put up picking-money for his hopyard renter, who could not get the money otherwise. I advised him not to pick more than half a crop in any event—no picking would probably be better for all concerned."— Henry Stephenson of the Stephenson Commany.

are. In an interview Sunday Henry L. Bents, president of the Aurora State bank, stated that his concern has not and will not loan money on the hop crop this season for picking expense, because he thought the security too risky risky.

For picking purposes money is not to be obtained anywhere unless the grower is willing to mortgage his yard. The crop will not be taken as security. "I tried to get picking-money, but could not de so," says Andrew Kan, a local merchant and a well-known hop-grewer. "At Salem," he said, "the bank people told me that I would have to mortgage the yard. They would not loan the money without the mortgage." With picking-money so hard to get, a large portion of the hop crop is sure to be left unharvested, even though grow-ers were willing to gather their prod-uct.

to see hop values advance, because he has some 1906 "pets" still on hand. Mr. Neis says that the interview in an Albany paper, in which he is reported to have said that California hops bring 7 cents a pound more than Oregons, is incorrect. What he really said, he states, is that New York states sold that much above the product of this state.

state Much Fruit Ruined.

Much Fruit Ruined. (Special Dispatch to The Journal.) Ontario, Or. Aug. 27.—It is estimated that over \$25,000 worth of fruit has been wasted this year under the Owyhee ditch on account of lack of proper spraying. The farmers of this vicinity seem to be too busy raising sugar beets and alfalfa to give the proper care and attention to their orchards. Besides, they do not seem to realize that they must spray properly in order to rid their orchards of the fruit pests. Those who do care for their orchards raise fruit that rivels that of Hood River.

 the farming class over the possible in-jury to the grain crop unharvested. Practically none of the spring grain has been threshed and some still stands un-cut in the fields. With the continuance of the rain injury will undoubtedly result to that portion of the crop out-

sult to that portion of the crop out-standing. Hops will be damaged and the prune-growers fear that the ripening fruit may crack and much of the present heavy yield be guined. The prune crop is the best in the history of the county and with a fine market and an unpre-cedented demand for this product makes it highly essential that this be saved. About the only parties that are not worrying over the possible damage from the early rains are the potato-growers.

New York, Aug. 27. — Government bonds: Asked worrying over the possible damage from the early rains are the potato-growers, and they are actually jubilant over the prospects for the finest crop in the history of potato growing. The quality is said to be excellent and all reports are to the effect that the yield will be far above the average.
