

FOR CREMATORY BUILT ON ISLAND

Councilman Kellaher Advocates Placing Plant Near Mouth of Willamette.

TO SAVE EXPENSE AND OBVIATE SMELL Present System Too Expensive— Would Mean Quicker Service and Removal of Garbage by Barges Loaded From Dumpers.

Councilman Dan Kellaher has found a solution for the crematory problem. Kellaher refuses to sanction any proposal to establish a crematory in the residence districts and believes the garbage plant should be placed on one of the islands near the mouth of the Willamette river. He argues should a plant be built on one of these islands, no residence district would be affected and the operation of an up-to-date plant at such a point could be accomplished at a minimum expense and convenience that is not afforded in many cities as large as Portland.

Above all, Kellaher believes the city should assume the whole expense of building and operating a refuse and garbage plant. The present system is conducive to many inconveniences, and is the cause of much suffering. That a crematory must be built at once is a foregone conclusion, and the sooner such action is decided upon the better off the city will be, says Councilman Kellaher. The city is growing fast, but should a crematory be built after the plan suggested by him, Kellaher believes the facilities afforded will be great enough to meet the needs of the city for many years.

"It is my plan," said Kellaher, "to build an up-to-date crematory on Ross island or other island down the river. I think a site down the river would be preferable to one above the city, for then there could be no liability of the water becoming contaminated that flows into the city, while at the same time the cost of floating garbage to the plant would be minimized. Northern winds in summer would tend also to carry any odors from the plant west of the city.

There should be provided a system of scavengers to carry the garbage from all parts of the city to especially provided dumpers on the river front; these dumpers to be so arranged that the refuse could be dumped on board scoops from sanitary cans with which each property holder must provide himself. The city owns the foot of each street on each side of the river and many of these dumping places and barges could be provided as the service would demand.

Barges in wood. The barges should be small and arranged so that they could be hauled ashore at the crematory by power generated by the plant. This is practicable and the most excellent method. If a modern plant is built with steam rollers to extract the moisture from the refuse the cost of burning would be much less than the present expense at the old crematory. The city recently purchased 300 cords of wood for the crematory and that will not last all winter. Wood is high, too.

Kellaher invites criticism of his plan and stands ready to push its merits. He says any scheme where the refuse must be hauled from every part of the city is extravagant. Furthermore he urges as the most apparent advantage, the nearness of the river to the west side retail district, and especially the commission houses on Front street where 60 per cent of the city's garbage has its source.

EMMA BAMES STOREY IS GRANTED DIVORCE

(United Press by Special Leased Wire.) New York, Aug. 31.—Madame Emma Bames Storey, the opera singer, is now completely free from the matrimonial bonds which bound her to Julian Storey, her husband. The divorce in her divorce suit was signed today by Supreme Court Justice Morschauser at White Plains. She may retain her former name and manage her own affairs.

Archbishop Who Made Pope Laugh.

From the London Daily Chronicle. Archbishop Murphy of Tasmania, the record prelate who just entered on his ninety-third year, is a humorist, and the fact may account in some measure for his remarkable longevity. He was held in high esteem by the late Pope Leo XIII. There was a bond of affinity between them, as both received their mitres from the Vatican at almost simultaneously. At the age of 79 Dr. Murphy visited Rome, and at the close of a social audience Pope Leo remarked: "Well, my dear brother, I suppose this is our last meeting in this world." But five years later Dr. Murphy thought he would have one more run around the globe, and presented himself at the Vatican as pert and smiling as of yore. He reminded Pope Leo of his prophecy, and he replied: "So you see you are not infallible after all." This is said to have been one of the few occasions on which Pope Leo laughed heartily.

FRESH AT NIGHT

If One Uses the Right Kind of Food.

If by proper selection of food one can feel strong and fresh at the end of each day's work, it is worth while to know the kind of food that will produce this result.

A school teacher of Media, Kan., says in this connection: "I commenced the use of Grape-Nuts food five months ago. At that time my health was so poor that I thought I would have to give up my work. My weight was rapidly losing, my nerves were all shot, and I was nervous and sleepless, and experienced, almost constantly, a feeling of exhaustion. I tried various remedies without success, then I determined to give particular attention to my food, and have learned something of the proper use of Grape-Nuts for rebuilding the brain and nerve centers.

"I commenced using that food and have since made a constant and rapid improvement in health in spite of the fact that all this time I have been engaged in the most strenuous and exacting work.

"I gained twelve pounds in weight and have a good appetite, my nerves are steady and I sleep sound. I have such strength and reserve force that I feel almost as strong and fresh at the close of a day's work as at the beginning.

"Before using Grape-Nuts I was troubled much with weak eyes, but as my vitality increased my eyes became stronger. I never heard of any other food as nutritious and economical as Grape-Nuts. Read 'The Right to Well-being' in this paper. There's a Reason."

BALKY HORSE STOPS IN FRONT OF TRAIN

Aged Man and Daughter Crushed to Death By Locomotive.

(United Press by Special Leased Wire.) Atlanta, Ga., Aug. 31.—Locked in each other's arms in a death embrace, Frederick Johnson, aged 65, a resident of this place, and his daughter, Mrs. Pullen, were taken from the pilot of an Atlanta & West Point engine today after being carried half a mile at terrific speed. A balky horse was the cause of their deaths. They were driving to West Point. Johnson decided to pass ahead of the train and had ample time to do so, but the animal balked just as the carriage was on the rails.

DOMINION FLOUR UP TWENTY CENTS

(Special Dispatch to Journal.) Vancouver, B. C., Aug. 31.—Big milling companies today advanced the wholesale price of flour 20 cents per barrel. The advance affects the entire dominion. It is ascribed to the alleged poor crop outlook in Manitoba, as well as increased import demand.

NEGROES THREATEN TO AVENGE LYNCHING

Danger of Race War Over Lynching of Negro Murderer By Mob.

(United Press by Special Leased Wire.) Bluefields, W. Va., Aug. 31.—There is danger of a race war at Welch, where an unknown negro was taken from a hospital last night and lynched by a mob. Negroes of the vicinity are in an ugly mood and are threatening to retaliate by killing whites.

ROAD BUILDING IN FOREST RESERVES

(Special Dispatch to The Journal.) Eugene, Or., Aug. 31.—Supervisor C. R. Setts of the Umpqua and Tillamook forest reserves, whose headquarters are in Eugene, has just returned to this city from a trip through the reserves. He reports the beginning of various improvements in the reserves similar in nature to those announced a few days ago by Supervisor Bartrum for the Cascade reserve.

WOMAN BALLOONIST IS LOST IN FOREST

(United Press by Special Leased Wire.) Winsted, Conn., Aug. 31.—Carried by a brisk north wind far out of her course Miss Carrie Meyers, a professional balloonist, was lost in a swampy forest infested with wildcats and was delayed for hours in finding her way out of the woods. It was only by chance that she was rescued this morning by a hunting party, almost exhausted from exposure and hunger.

RIGHT HAND OR BOTH

Four-Fifths of the Babies Said to Be Ambidextrous.

Many reasons have been advanced for the prevalence of right-handedness. It is by some said to be the result of nursing and infantile treatment, to be due to early practice in writing and drawing, to be the outcome of warfare, education and heredity, the result of mechanical law and other remote causes, according to the Strand. Sir James Bayley declares that the preferential use of the right hand is due to the fact that in primitive days man used the right hand for the purposes of offense, as far as possible from the assault of an adversary. Recent experiments and observations, however, prove that single-handedness is merely the result of faulty or restricted education.

It is a curious instance of human contrariness that should one eye, one ear or one leg of a child show signs of diminished vigor, the parents would instantly seek the cause of it, and if possible the remedy for that lamentable condition; yet for some inexplicable reason or prejudice the left hand and eye of the child is ruthlessly and deliberately neglected, until in mature years it is an undeveloped, useless and almost unnecessary appendage.

Careful observations have shown that out of every 100 persons born into this world 50 are naturally ambidextrous; that is to say, they will instinctively reach for an object with either hand, and require proper instruction and training to develop both hands to an equal degree of strength and skill. Of the remaining 50, 17 will be right-handed, while the other three will show a natural bias toward the left hand. The cultivation of ambidexterity therefore offers no insuperable difficulties, and the economical, physiological and psychological advantages are enormous. It is said that the Japanese soldiers can use their weapons with equal skill in either hand, for they were trained to be ambidextrous from childhood. At school they are taught to write and paint with both hands. In drawing and painting no supporting device whatever is used, the entire arm being employed. The German educational authorities, too, are at present giving considerable attention to left-hand work, especially in their technical and industrial schools. The students are taught to saw, plane and hammer as well with the left hand as with the right, and the economical and industrial importance of ambidexterity is firmly impressed upon the minds of young men and women.

WOMAN BALLOONIST FALLS INTO SWAMP

Descends In Dark Into Swamp Infested With Wildcats.

(Hearst News by Longest Leased Wire.) New York, Aug. 31.—Swept from her path by a brisk night wind, Miss Carrie Meyers, professional balloonist, dropped near Winsted, Connecticut, into a swampy forest infested with wildcats, and until early this morning was in constant peril of her life. Miss Meyers has for several weeks been making two ascensions a day for the crowds at Highland Lake park, which borders on one of the biggest lakes in Connecticut, and Friday evening when her balloon went up it was almost pitch dark.

LUMBER TRUST TO BE GRILLED NEXT

(United Press by Special Leased Wire.) Cleveland, Aug. 31.—The so-called lumber trust is to be the next big corporation to be investigated by the United States department of justice. This was admitted today by Secretary Garfield of the department of the interior in an interview after his return from a consultation with President Roosevelt at Oyster Bay. He said past investigations had brought to light that a lumber trust existed and that the action taken would be in the form of an inquiry before the interstate commerce commission.

TO SELL EXPOSITION STOCK ON LUCKY DAY

(Special Dispatch to The Journal.) Seattle, Aug. 31.—On October 2 the Alaskan-Yukon-Pacific exposition will try to dispose of the \$180,000 of stock that is left in the treasury. October 2 last year was the date set to sell \$500,000 worth of stock. When the day was over it was found that \$650,000 had been subscribed. The exposition officials believe October 2 is their lucky day, and will make another effort this year on that date.

A Great Cob Pipe Center.

From the Kansas City Journal. Franklin county rates high in the output of cob pipes. Enough pipes were made there last year—28,862,058—to supply every man, woman and child, not only in Missouri but in half a dozen other states, with a pipe.

A Vote of Thanks.

O Katydid, we hear once more your statement to creation. Nor have the searching years that sped Produced elaboration. In vain we try to piece it out, We cannot guess your story; We do not know what was the deed, If one of shame or glory.

Oregon Trust & Savings Bank Depositors

Certificate of deposit or deposits in the Oregon Trust & Savings bank to the total amount of \$25,000 will be accepted as payment of stock in our company. No more than \$300 will be taken from one individual. This offer is open for this week only, to September 8. This will give small depositors an opportunity to have their money earn them good returns.

The J. M. Acheson company's big store and factory plant, Fifth and Alder streets, is conceded to be the best equipped and practical in the west. Lighting system unexcelled. The company is seven years old—started with a capital of \$2,000—capitalized now at \$150,000. Has a paid up capital of \$50,000 and additional subscribed stock of \$24,000. Assets about \$160,000, not including unsubscribed stock. Liabilities less than one third the assets. Doing a business of over \$50,000 a year. Unsubscribed capital stock is for sale—10 per cent interest or dividend guaranteed—also trade discount allowed stockholders on all goods purchased by them in the store. In connection with the department store is men's tailor and woollens; also a grocery store. You can save enough on your grocery bills to clothe yourself. The company owns the five story building, its ladies garment factory, men's clothing and grocery departments are located in. Very good asset, isn't it? Subscriptions can be made weekly or monthly saving payments. Call, drop us a card or fill in the following subscription for the amount you desire, how you wish to pay the same and mail it to us and we will call and complete your connection with the company.
