If You Can Afford to Ride
You Can Afford to TALK

Now Listen

Just a Minute, Please

Other things being equal, a sane man uses the telephone which enables him to talk to the greatest number. If he subscribes to this service, he has no need of a second telephone. The Pacific Telephone & Telegraph Company has 25,000 subscribers in the city of Portland, including practically every business man and nearly every family.

Betterments in the plant of the Pacific Telephone & Telegraph Company in Portland, approved three years ago, are now practically completed. The list of improvements provided includes outside cable construction, a new telephone instrument of latest model for every subscriber, and for each of the four exchanges a common battery, multiple switchboard—absolutely the best device, bar none.

The Pacific Telephone & Telegraph Company has spent for these improvements more than \$1,500,000, a sum equal to nearly \$10 for every man, woman and child within the city limits. This means just one thing—better telephone service than Portland ever knew, telephone service as good as that enjoyed by any city anywhere, at a fair price.

The Pacific Telephone & Telegraph Company has a toll system which enables you to talk from your home or office, at slight cost, to 250,000 Bell subscribers, and which puts you into speedy connection with every city and almost every village and hamlet on the Pacific coast. No other company can afford this advantage.
