# Mountain Treasure Mining Co.

PORTLAND, OREGON

Mines in Josephine County, in Jump-Off-Joe District, on Jump-Off-Joe Creek, 10 miles northeast of Grants Pass, southern Oregon.

A REAL GOLD MINE, SO FAR DEVELOPED THAT ITS WORTH IS POSITIVELY KNOWN. It is not a guess, it is not a surmise, it is not a gamble, it is not a game of chance, it is not a trust-to-luck, not a prospect, but

**An Absolute Certainty, Tried and Tested with Assayed Ore Averaging Above \$25 to Every Ton of Rock**

We own 14 claims, each 600x1500 feet, covering the identical area crudely but profitably mined in pioneer days in Oregon. In fact our developed property may be said to be a new old one, only requiring new and modern machinery to make it one of THE GREATEST, RICHEST AND BEST GOLD MINING PROPOSITIONS IN WESTERN NORTH AMERICA.

Our shaft has been sunk to a depth of 125 feet, and our drifts and tunnels add 750 feet to the sum total of our development. In our combined properties we have seven or eight well defined ledges, three to four feet in width, and to tap all these we are running a cross-cut tunnel about 2,000 feet in length. This will open up all the different bodies, but it requires money to accomplish this and to enable us to carry out our plans

**We Have Placed a Block of 50,000 Shares of Our Capital Stock Upon the Market at 10 Cents per Share**

Each of the par value of 25 cents, fully paid up and non-assessable, but after the disposition of this stock no more will be sold at less than par.

WE HAVE PICKED ORE FROM THIS MINE THAT ASSAYS \$100,000 TO \$300,000 TO THE TON. But this is not mentioned to induce purchases of our stock, because we have no knowledge of the extent of this ore body. But we do know that we have millions of tons of better than \$25 ore, easily treated, and that owners of our shares may be assured that there is plenty of this splendid treasure to make each of us rich. All correspondence should be addressed and all checks made payable to

## These Facts Are Important to Your Success in the West:

Behnke-Walker Business College was established in 1899.

The enrollment from August 1st, 1906, to June 1st, 1907—ten months of the year—was 794.

During this period we had applications from business men for 708 graduates; we placed 309 in good positions.

The cost of our equipment for the practical training of students in all lines of business was \$15,000.

A business educator of national repute stated, after inspecting all the business colleges:

**"In Classifying Schools, I rank yours as one of the Six Leading Business Colleges of the Country"**

The west is filling up so rapidly it is impossible for us to keep pace with the demands for competent young men and young women. Our graduates bear the stamp of competency; to be a BEHNKE-WALKER graduate is to carry a passport that admits one to the consideration of the most requiring and responsible firms. For more information, write or call for our new catalogue.

**We Place You in a Good Position  
When Competent**

Some Recent Trade Paper Comments:

The J. K. Gill Co. vivify their "Trade Help Bulletin" by enclosing a letter which for clarity and vim will seldom be equalled. It is bright, contains much valuable store news and offers numerous suggestions for displaying and selling goods. The wording and general spirit of enterprise which it breathes are sufficient to interest any dealer.

It would be a good thing for dealers to see just what this enterprising western firm is doing.

American Stationer, New York.

The J. K. Gill Co., which is a Globe-Wernicke agency in Oregon, is sending out some very effective "G.W." literature, profusely illustrated with fine half-tones, showing some "elastic" spring suggestions.

The J. K. Gill Co. is easily one of the most decidedly progressive stationery concerns in the far west, and its big success has been gained largely because of its careful attention to the little details in connection with its business like that mentioned.

Geyer's Stationer, New York.

In commenting on our "Trade Help Bulletin," Walden's Stationer & Printer (New York) practically reproduces the entire letter, which speaks volumes of commendation in itself.

OFFICE APPLIANCES (Chicago) says our catalog is "a wonderful piece of work. In every way it has earned commendation, for it is not only well arranged and printed, but is priced right and put up in fine shape. We were surprised at receiving such a large affair, and it shows great care and expense in preparation."

629 Chamber of Commerce

Portland, Ore.

The Automatic Telephone used by the Home Telephone Company is installed by the Empire Electric Company, a telephone construction company of Toledo, Ohio. The Automatic Telephone enables any subscriber to call any other subscriber's telephone without the intervention of human agency. It is sometimes called the "Cussless, Waitless, Out-of-Orderless Telephone." It is the foreigner's friend; has no moods; never tires, gossips, visits or listens. There are no "party lines" and the service is not attended with "nerve-racking" bells, "long waits," "lines busy," echoes and "wrong number" blunders. There are no local batteries to deface walls and woodwork. The service is absolutely secret. Portland people are delighted with the new up-to-date service, and there is now a waiting list for installation. The "Home" is a Portland enterprise with local stockholders. Portland labor and material constructed the plant, and the Automatic system is connected with all the outside towns by toll lines.
