(Daily Press Special Wire.)
Buffalo, Sept. 14.—President Roosevelt is a "white winged angel of peace," Dr. Isaac Franklin Russel of New York university and he so described him in an address here today before the American Social Science association.

What a heroic figure was the gallant colonel then, but I love to think of Roosevelt, who at the end of the Cuban war, walking in quiet majesty between two great armies and bringing peace. Roosevelt in the history of Russia and in the history of Japan, is the most majestic figure of the century."

The speaker declared that many existing laws which create and sustain monopolies, and which give special franchises belonging to the people but entrusted to faithless corporations should be repealed.
