loudly against the condition. They have invested their money in stocks of goods and have erected buildings to house these goods and it does not please them to be deprived of custom by a lot of men who pay no taxes and whose busi-ness is entirely nomadic. There are a number of vacant store rooms in va-rious parts of the city and this class of men should be forced to occupy them or else abandon their traffic." The board of health has long main-tained that the exposed candy and fruit are propogating spots for tubercular and other disease germs. Every movement of the air carries infection into the eandy and fruit and the condition is declared to be dangerous to public health.

Bids Asked for Construction of Passageway Through East Portland Peninsula to Be Utilized by Harriman Trains Entering City From the North and East.

H. Boschke, chief engineer of the O. R.

Bids were asked for today by George H. Boschke, chief engineer of the O. R. to company, for construction of the roposed tunnel through the East Port-and peninsula for the Harriman rail-todads entering this city from the north-nd east. Plans have also been com-leted for both single and double-track ridges on the site of the present Steel ridge, but neither plan has been finally ccepted. "Mr. Boschke is asking for bids on the Bids were asked for today by George the deals that have delayed the project, and from this date the work will progress steadily. The tunnel will enter the hill at the northeastern extremity of Mock's bot-tom, and pass under Dana street, and will emerge on the north side of the peninsula to be railroad company has located McKenna Junctión and laid out a townsite. This will be the cross-ing of the St. Johns loop and the main line of the O. R. & N. and the Oregon Washington roads. The peninsula tunnel is the final link proposed tunnel through the East Portland peninsula for the Harriman railroads entering this city from the north and east. Plans have also been completed for both single and double-track bridges on the site of the present Steel the bridge, but neither plan has been finally

#### Object to Constructive Mileage.

Object to constructive mileage" proposal of the commission was one of the rules objected to. The railroad cash fare be-tween Olympia and Seattle, for ex-ample, is \$1.80, which is three cents a mile for 60 miles, while the actual mile-age is 73 miles. The company pulls 73 miles from mileage books for this trip, and the commission rule would put in and the commission rule would put in "constructive mileage" to meet the cast fare ticket, or 60 miles.

The railroad representatives were

most tenacious, however, in their op-position to the proposed rule of the commission which would make first-class tickets good for 30 days after pur-

chase. It was claimed by them that to put such a rule into effect would be to put a premium on ticket scalping, and that this would be especially true of

tickets which allowed a slop-over priv-liege. The railroad representatives, after a short consultation, urged the commission to reduce the time for us-ing tickets to the day following their purchase.

Agrees on Redemption.

The proposed rule about the redemp-tion of tickets, fixed by the commission

at six months, was agreed to by the railroads, as was also the proposed rule requiring all late trains to be bulletined

on station bulletin boards. There was a serious hitch over the rule proposing to require the railroads to keep all stations open until late trains arrive. It was claimed that this would practically compel day and night sta-tion agents and operators at every rail-road station in the state. The commis-sioners intimated that this might not be a bad thing for the traveline nuble
