## LANDSEEKERS DISCOURAGED

**Cold and Rain Too Much for Many Waiting at La Grande.**

(Special Dispatch to The Journal.)  
La Grande, Or., Sept. 19.—Skepticism as to the quality of the timber on the land to be thrown open for entry September 25 is responsible for a material thinning out of the waiting line at the land office in this city. Many have already left the line for this reason, though they had been for days awaiting the opening. Many more are still waiting, however.  
The prospective land filers were having a hard time of it last night. The range in temperature followed by a drizzle added greatly to their discouragement. Remembrance of warm rooms and comfortable beds floated before their vision and dampened their ardor to an appreciable extent.  
The state of the weather is especially hard on the women and it is extremely

doubtful if they will all hold out to the end. In all probability many of them will have to give up.

In the past few days the line has thinned out until it numbered only 31 last night, a loss of 15 in 48 hours.

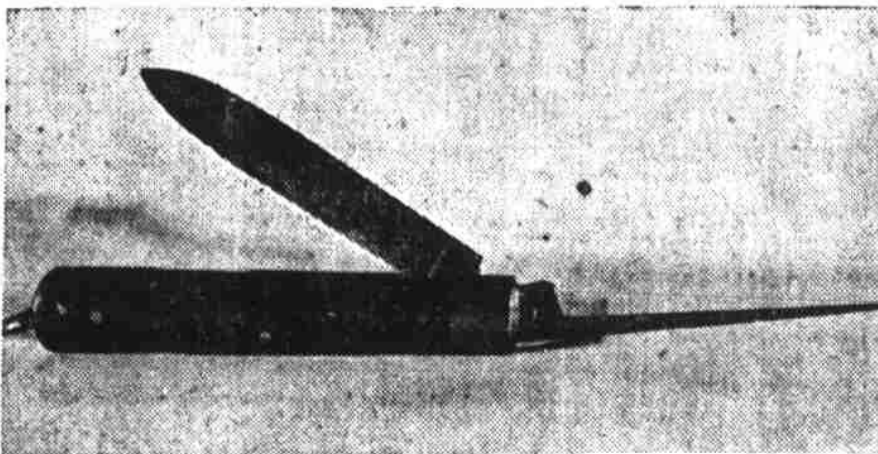

**Duplicates Discovered.**

One reason of this is that a discovery was recently made that put a damper on the ardor of a dozen or more and caused them to hurry back to the coveted land. It appears that the crowd began to compare notes a few days ago in regard to the numbers of the land upon which they intended to file. The result was that a number of them intended to file upon the same tracts. This knowledge disheartened those that were far down the line, as they realized that they had no show with those ahead of them.  
A consultation was held and as a consequence the rear ones decided to again explore the tall timber and hunt up new locations.

**Other Causes of Discouragement.**

There is also a persistent rumor afloat that some of those in line are there in the interest of speculators and that the latter are paying them a stated salary and expenses for holding down seats on the sidewalk. Doubt has also been generated as to the value of the lands. The timber on these lands is said to be mostly of an inferior quality and scarce at that. For agricultural purposes, it is said by some, they are practically valueless, but whether or not this story has been started to discourage entries cannot be determined.  
One of the men in line was heard to express the opinion that the line up would not be materially increased until within a few days of the opening and that he had his doubts about an increase even then.

## JAPANESE IN HOP FIELDS CARRY VICIOUS LOOKING CHEST PROBERS

Innocent Looking But Effective Weapon Carried by Japanese Laborers.

"For ways that are dark and tricks that are strange" the Japs can show the "heathen Chinese" some points in peculiarity according to the hop pickers who are returning to Portland from the Oregon hop fields. These men report that practically every Japanese

atletto-like point which can be opened if desired and which would prove an effective weapon in a hand-to-hand encounter. The blade is only a little larger around than a hairpin, but is enough heavier so that there is little danger of its breaking. It has a needle-like point.

Edward C. Herrin, proprietor of hop fields near Aurora, has secured a specimen of these knives from his foreman, James McAllister. The latter had an altercation with one of the Japanese laborers when the latter drew the knife and attacked him. It was taken away from him, but all the Japs on the plantation threatened to follow McAllister to the station when he left and kill him, according to the foreman. He got away without being molested, however, and kept the knife as a memento.

**FOUR BOY HUNTERS GET THREE ELK**

(Special Dispatch to The Journal.)  
Helena, Mont., Sept. 19.—The banner of the hunting season, so far as reported in this state, has fallen to four youngsters of Jardine, Park county, the oldest only 15 and the youngest 10 years old. After their chores were done the youngsters borrowed their father's guns and got back before supper with the announcement that they had killed three elk.  
Jardine is only about four miles from the Yellowstone park line and the deer and elk migrate from their winter range in the park to the summer range in the high mountains beyond the

boundary. This makes splendid hunting near the park line and it was here that the young nimrods bagged their game.

**Driver Killed Under Wheels.**

(Special Dispatch to The Journal.)

Lewiston, Ida., Sept. 19.—Benton Anderson was instantly killed yesterday

afternoon by being run over by a grain wagon on the Sweetwater grade, 14 miles from Lewiston. His wagon struck a rock, hurling him to the ground. The heavy wheels passed over his skull. He leaves a young wife in Lewiston.

Three-story bedsteads are now made for use in apartments, steamers, camps and wherever floor space is limited.
