The barley and oats markets continue to excite wonder from the dealers because of their great strength. Both of those products are still being purchased by the eastern trade but this movement is likely to stop because there is every indication at this time that the coast market will go beyond an castern-shipping basis because we need the real of

Much Competition Is Shown Between American and Russian Products.

A report from Consul-General W. D. Straight, of Mukden, says, in the Daily Consular Reports, that it is stated that Russian flour from the Harbin mills will shortly be placed on the south Manchurian market to compete with the American article, of which during 1905 274,191 piculs, valued at 89,1,24 halk-wan taels, or about \$668,343 gold, were imported through Newchwang, with an average larger amount through Dainey.

All through the week there continued heavy selling of wheat and even this large volume of purchases did not keep the market from advancing. While there was a temporary check in operations due to the sharp decining prices in domestic and foreign markets, values held remarkably well throughout the Pacific northwest. Early in the week growers were paid on a basis of 91c a bushel for bluestem and 89c for club, track coast.

Much the larger per cent of the purchases were for foreign account the fore part of the week but with the latter strong and millers took the place of the foreigners in the buying field. The purchases of the latter were curtailed to some extent by the lack of demand or even inquiries for flour from the orient because of the record-breaking figures quoted on that product this week. New York, Oct. 19.—The week has been a period of feverishness and unsettlement in the stock market. At times the street was full of disturbing rumors and the embarrassment of one important operator in copper added to the prevailing demoralization. This continued liquidation was, of course, a part of the general reaction which began with contraction in the money market, was accelerated by various exposures and legislative attacks, and is now causing a wholesale and somewhat radical fluuncial housecleaning. radical financial housecleaning.

radical financial housecleaning.

Many of the rumors in circulation were gross exaggerations and that there is no need for any repetition of the financial hysteria which marked the August break in the stock market. Since January many good railroad shares have had their values cut in half. The industrials have suffered even more drastic declines, being cut into thirds and quarters. After such a tremendous shrinkage it is almost folly to talk of panic. Violent breaks may be possible but the chances of a genuine panic with all the disaster and derangement which that means is exceedingly remote.

Past Week Shows Feverish Not a Single Change Made Sharp Change in Sentiment in Values in Local Yards During Past Week.

> Year ago.

By Hyman H. Cohen.

Portland Union Stockyards, Oct. 19.—
There was not a single price change in the local market this week. Receipts were above the average for this time of year in all lines, and packers took advantage of this, and tried to dress values. While the receipts of cattle were not so great as a week ago, the run was sufficiently heavy to allow the packers to buy at former prices, while in reality the market should have been higher. The reason why no greater

in reality the market should have been higher. The reason why no greater price is shown in cattle is the enormous amount of contract stuff now being received by killers who are using this fact as a club to curb the market.

While the run of sheep was not so great as last week, it was larger than a coar as the coarse.

With the incorporation of Swartzchild & Sulzberger, the Chicago packers, in this city today, Portland is assured of another packing house with up to date facilities. While the incorporation papers call for a capital stock of but \$50,000, this is taken to indicate that the capital will be increased when the real building of the large plant begins. It is stated that the company has for some time controlled a parcel of land adjoining Swift & Company's proposed site on the Peninsula, and plans are now being prepared in the east for a modern packing plant. While nothing of a definite nature is given out by the company, it is understood that the plant will cost about \$500,000.

Echo, Or., Oct. 19.—Several thousand head of cattle are being fed in the Butter Creek country at this time. Among these about 2,000 head belong to the Frye-Bruhn company of Seattle, which company recently purchased many hundred head of cattle in the low pay country most of them below many hundred head of cattle in the John Day country, most of them being fed here for the winter. Several individual growers have a few hundred head feeding here. This week about 44 carloads will be received here from Eigin these cattle being mostly from Wallows county points, and they will be fed here by the different growers. While the run of sheep was not so great as inst week, it was larger than a year ago. Despite this the market held well, because killers on the coast neglected to buy sheep for fall delivery for too long a period, and therefore were short of supplies when the small shipments began.

Hogs arrived much faster during the six days, the total run reaching 1905 head, compared with 259 head a year ago. Market field guite firm all week.

Liverpool, Oct. 19.—Cotton futures opened quiet and steady, closed barely steady, 6 to 7 points lower. Spots 5 points lower. Excellent Sugar Beets.

vidual growers have a few hundred head feeding here. This week about 44 carloads will be received here from Elgin, these cattle being mostly from Wallows county points, and they will be fed here by the different growers. Thousands of tons of alfalfa are raised in the Butter Creek country, most of which is fed to the cattle during the winter.
