## Kansas Fruit Grower Declares Oregon Orchards Are to Lead the World.

(Special Dispatch to The Journal.)  
Medford, Or., Nov. 7.—George C. Richardson of Leavenworth, Kansas, who owns an 800-acre apple orchard and is one of the national officers of the Agricultural Experts' association, has left for his home in the east thoroughly convinced that the Rogue River valley is to be one of the world's greatest apple districts.

"Apple men of the east," said Mr. Richardson, "are getting weary of the occasional blight and looking forward to moving to the Pacific slope, which can always be depended upon for a crop. This is undoubtedly the apple land of the future, and it is only a question of a few years until the bulk of the crop will be grown here."

### COMMISSION PLAN THING FOR TACOMA

#### Propaganda to Push Along This Latest Alleged Good Thing in Municipal Rule.

(Special Dispatch to The Journal.)  
Tacoma, Wash., Nov. 7.—W. B. Kennell, a member of the McKinley Improvement club, has started a movement for the abolition of Tacoma's present form of government. He is conducting a propaganda favoring the establishment of a "more business-like government" through a non-partisan commission of four members nominated upon petition proposed by the people, such commission to be in charge of all legislative, administrative and executive functions, with executive powers conferred upon it as a public utilities commission, having the power to regulate all public utilities of whatever nature.

Kennell was one of the commission empowered as mayor or president of the city, another to be in charge of streets and public property, another in charge of finances and revenues and the fourth to have supervision over city waterworks and sewers. By his plan of government all franchises must be submitted to the people for popular vote. The veto power is to rest with the people. The proposition of Kennell has been made a special order of business for a meeting of the Improvement club Monday evening. The plan embraces the abolition of the city council, and the offices of mayor, treasurer and comptroller.

### PULLMAN CITY CLERK MISSING FROM OFFICE

(Special Dispatch to The Journal.)  
Pullman, Wash., Nov. 7.—City Clerk G. W. Walter has disappeared, closing up the clerk's office so that no one can vote for the coming city election in a few days. It is claimed that the solemn element that is now in control of the city affairs have mostly registered. It was to this party that Walter belonged. Judge Chadwick has issued an order to the city clerk that he must register all voters on the old ward lines, which will prohibit the election of several saloon party councilmen. The town was recently divided into wards so that the saloon party could not get control of the council. Walter's whereabouts are unknown.

### HEALTH OFFICERS SAY

#### Common Colds Are the Primary Cause of Consumption.

The ravages of the dread "white plague" has aroused in the national health departments the keenest alarm and every effort is now being put forth to prevent its further spread. A most prominent physician on the advisory board recently summed up the situation in a very simple manner by declaring that people could give common colds the proper attention the increase of consumption would be materially checked. A neglected cold weakens the entire system and especially the pulmonary organs and renders them liable to the attack of the tubercle germ. He also gave the formula for a very simple remedy for colds which he claimed if generally known would prevent an enormous amount of suffering and eventually save many lives. The formula is as follows:

Two ounces of glycerine; one half ounce Concentrated oil of pine; half pint of good whiskey; this is to be used in doses of a teaspoonful to a tablespoonful every four hours, the bottle shaken well each time. He claims this will cure any cough that is curable and frequently break up a severe cold in twenty-four hours. He cautions that care should be taken to get the real Concentrated oil of pine, which any first-class drug store can supply. It is put up in the airtight screw-top boxes for dispensing, thus avoiding the bulk oils and patent medicine imitations which are insoluble and often injurious.
