Pine Gaited Horses.

Some especially fine gaited saddle horses were shown, walking trotting, cantering, notably Miss Caroline Flander's Johnny Moore, a chestnut gelding, which came striding into the ring, head nodding, quarters, shoulders, knees and stifles all at work, and which carried off first prize in the lady's saddle class for Miss Flanders.

Another interesting event of the afternoon was the showing of light harness horses. Wessinger & Froom, with a stunning black team, Altacora and Lady Zombro, high steppers and very dainty footed. The Considine pair, Lady McDonald and Black Diamond, were a close second, while Mrs. Colgate's Buster and Tige were third. In the yearling stailions Henry Corbett's chestnut Denny Kreegan, a very high lifed animal was awarded first and C. Holtgreive's oje Gaffney second.

Both teams were deep chested and quartered horses, of unusually heavy build, and stood square on all legs.

Favorable Comment.

Much favorable comment was aroused last evening and yesterday afternoon over the handling of all horses, especially those ridden or driven by women showed. In the contest of intelligence between exhibitors and the judges the women showed an intuitive knowledge of what their horses were about to do and how they were about to do it, and in almost every instance any outbreak on the part of the nervous animals was frustrated before an acanimals was frustrated before an ac-

The approach to the building was a scene of life and brightness. On either side of the broad road stretching two blocks back both ways showed the lights of waiting cabs and automobiles. The crowd surged from the building into their various vehicles and were borne away in parties to suppers at the

Opera glasses were leveled all about the ring at the women and their handsome gowns. The box parties were, of course, the center of interest. Applications came from them frequently as their friends rode or drove by in the various classes of competition. Miss Flanders, Miss Lewis, Miss Ainsworth, Miss Hahn and Harry Corbett always received the hearty approval of their friends from some of the most prominent central boxes.

NEXT TIME BETTER.

Shyness Attending First Event Will Be Cast Aside Another Season.

By K. R. W. Considering that it was our first at-tempt and that the music had to be stopped for the skittish horses and that it was so cold, and that we were not quite sure how it should be done, our first night at the horse show was very satisfactory. The horses were all right, and the arrangements at the Oriental

and the arrangements at the Oriental building were well conceived, and there were beautiful gowns and stunning millinery and lovely ladies—but how sadly we seemed to take our pleasure.

Barring the events, the atmosphere and setting were quite appropriate for an oratorio, and a stately solemnity marked the impressive occasion. Whether this was due to the specially transfer. marked the impressive occasion. Whether this was due to the specially imported men in livery and the agile tiger so excessively a la mode, or to the influence of so many "glad rags" at once, which are said to give a satisfaction which religion is powerless to bestow, or to the impassive way in which we sat solemnly glued to our appointed seats throughout the entire evening, is not quite clear, but it seems quite evident that Portlanders need a dress rehearsal—not of the performers, but of hearsal—not of the performers, but of the audience—before we shall be able to enter into the real zest and fervor of the

TERRIER VERSATILE.

One That Was Devoted to Snake Killing-Making Sure of a Fox.

Of all our dogs there is none so versatile in mind and body as the terrier. There is no service that a dog can do for us in sport or as a companion, says a in Blackwood's Magazine, that he is not capable of.
I knew one terrier in India who de-

voted herself to the dangerous and excit-ing sport of snake killing. Her method was to irritate the snake into sitting up. She would dance around it, sparring for an opening, as it were. Then with an opening, as it were. Then with redible swiftness she darted at the title and gripped it close behind the ad—a sharp bite and the snake was

She was marvelously successful until on an unlucky day when one of her pupples was with her she found a snake; the puppy got in her way at the critical moment and the snake struck Nettle on the nose. The wound was slight, it was cauterized at once and a strong dose of whiskey administered. Apparently Nettle was quite well the next morning, but as she was playing with the puppy she suddenly turned head over heels and when we reached her she was dead. A fox once went to ground in a narrow drain; two terriers were running with the pack. The first went in, and unable to get up to the fox, caught hold of the brush, the only point he could reach.

could reach.

The second terrier also went in, but could not of course get far, as his companion blocked the way, so he caught hold of the first terrier's tail. Then came the whipper in and he stooped down, put in his arm and feeling the second terrier he caught hold of him and pulled him out.

There was considerable resistance, but

and pulled him out.

There was considerable resistance, but at length, to the amusement of the field, the second terrier appeared holding tight to the tail of his predecessor, who in his turn was holding on to the brush of the fox.

If your terrier is to do his best for you in the field he must share your home, or if he lives in a kennel you must be often with him, but my experience is that the dogs that have been the best for work have been those that have lived with me day and night. A dog so studies your face that he learns to anticipate your wishes, almost to read your expression.

Moreover, he nicks up a good many words when he is always in the house and I have generally found that there are some words which are so thrilling.

that they have to be spelled out by members of the family. The sound of them is too exciting for the small friends under the table or seated on their favorite chairs.

The terrier that lives in the house develops a vocabulary of his own and one I knew well had three distinct tones. With one he called his mistress when he was in trouble or wanted help: in

With one he called his mistress when he was in trouble or wanted help; in another, respectfully imperious, he invited a trusted friend to take him out. If he wanted the servants he would put his head through the banisters of the kitchen staircase and bark sharply and imperiously.

Each tone was known and recognized, and I never knew him to deceive by using one in the place of the others.
