publican national convention in 1908 are increasing rapidly. The Chicago com-

tomorrow.

The Hepublican national committee begin its meeting today, but the real work of deciding upon the time and place for holding the national convention will not be taken up until tomorrow. An exceeding active competition to secure the national convention is in progress among the delegations representing several cities, and much hard work and campaigning will be done durwork and campaigning will be done dur-ing the next 24 hours. In addition to Chicago and Kansas City the cities that will put in applications for the big

Chicago and Kansas City the cities that will put in applications for the big gathering include St. Louis, Denver, Pittsburg and Scattle.

It appears at present that a majority of the national committeemen favor Chicago as the meeting place, but the soniest has not yet reached a point where any particular city can claim a sefinite assurance of having won the fight.

sure it. Denver and Seattle are regarded as at a disadvantage because of their geographical location.

Apparently there is no presidential collides in the contest for a meeting place for the convention. It has been asserted that the managers of the Taft tampaign favor Kansas City because there seems to be more Taft sentiment in western Missouri and eastern Kansas than anywhere else at this time, but persons who are authorized to speak for the Taft movement declare the managers of the campaign of the secretary of war are not working in the interest of any particular city.

Representative Ellis and convention on behalf of Professor W. D. Lyman of appeared for Washington.

BILLY HENSE KII BY AN UNKNOV (United Press Lessed W. Ellensburg, Wash., Dec. Hense, a foreman in the start of the campaign of the secretary of war are not working in the interest of any particular city.

The digestive impulse is the life of the stomach. If this is weakened, crippled by abuse-eating improper food -the rest of the body suffers

The body and brain are nourished through the digestive impulse. Food is called for, and if proper in quality and quantity, the tissues are repaired as fast as mental and physical activity break them down. This is life.

Grape-Nuts food not only meets the requirements of tissue-repair, but is a powerful source of vital energy. It contains the vital phosphates stored up in wheat and barley by nature.

A food expert prepared this food so you can get these vital elements without bother, cooking or other effort than simple eating it. Eaten slowly, with cream, it is delicious and satisfies the "digestive impulse." It also quietly, systematically builds up brain and nerve. "There's a reason." Read the little book, "The Road to Wellille," in pkgs.

The consideration of four essentials ill undoubtedly govern the committee the selection of the convention meet-

in the selection of the convention meeting place. These are: Central location, with ample railroad connections, plenty of hotel accommodations a hall capable of a commodating the gathering, and ample facilities for the transmission of news of the convention.

After the place for the convention and the time of the meeting have been chosen tomorrow, formal notice will be sent out to the chairman of every state committee of the action. This will be the signal for starting the machinery that will choose delegates to the convention. The national committee never undertakes to say when any state shall

The bulk of the delegates will be chosen in February and March. In a majority of the states the Republicans start the work of reorganization early in January, until the first week of June.

The bulk of the delegates will be chosen in February and March. In a majority of the states the Republicans start the work of reorganization early in January, beginning with the precinct committeemen, and gradually working up to the election of a state committee, and in the natural course of events the district conventions for the election of delegates are reached about the middle of February, and the state conventions for the election of delegates are large a little later. It will be for the convention to say precisely how many delegates shall sit in the convention. Each state will have twice as many delegates as it has senators and representatives in congress. This means that each congressional district will elect two delegates, and a state convention will elect two delegates, and a state convention will elect two delegates at large. The convention as proposed meeting places of the Re-publican national convention in 1998 are territories and noncontiguous territories mittee, which was one of the earliest to put in an appearance and secure to put in an appearance and secure and Alaska were permitted to have six

fight.

Chicago has the advantage in the contest by reason of the splendid hotel fabilities it has to offer. Old convention for the last 20 years are nearly all for Chicago, because, as they say, the city is big enough, and has hotels enough to care for a convention without causing knybody discomfort. The one advantage offered by Kansas City is its univalled convention hall. St. Louis and Pittsburg, though they would like to intertain the convention, are not expected to put up much of a fight to separate it. Denver and Seattle are regarded as at a disadvantage because of their professor W. D. Lyman of Walla Walla appeared for Washington.

sassin stepping out of the dark and shooting his victim down. The authorities are on the track of the murderer.

Hense's relatives live either in Tacoma or Aberdeen. He had been around this city for the past 15 years.

Sprinkling.

Of this amount Mr. Donaldson thinks that for salaries and feed \$121,469 that for salaries and feed \$121,469 four new street sprinklers and one horse-power broom, while for supplies he wants \$13,244. He figures on securing

### ROSEBURG CHINK SOLD TO MINORS

(Special Dispatch to The Journal.)
Roseburg, Or., Dec. 6.—Shan HI, the Chinaman who conducts the Oregon restaurant, has been put under bond on a charge of selling liquor to minors, to appear after the holidays. Complaint was made by parents of boys who frequent the place, and the particular charge was made when two girls, aged 14 and 15 years, were found in the restaurant drinking beer. The girls were questioned by the marshal and the arrest followed.

Special Dispatch to The Journal.)
For sprinkling 20 miles of city streets with oil at a price of \$200 per mile it is estimated that \$4,000 will be required.

### ASSOCIATED OIL WELL PROVES TO BE GUSHER

(United Press Leased Wire,) Los Angeles, Cal., Dec. 6.—The Associated Oil company has proved that the \$1,500,000 expended in the development of what is known as the south field of the Conlinga oil district was not held of the Coalinga oil district was not sunk in vain, as had been generally feared. Associated well No. 5 came in and started flowing 160 parrels a day, nothwithstanding that the casing had not been landed, and is therefore ex-pected to yield 600 parrels. This means that all the money put in will return large profits, and that much more will be invested.

### TAFT WILL SAIL FOR AMERICA TOMORROW

(United Press Leased Wire.)
Berlin, Dec. 8.—American Ambassador
Tower will tender a formal dinner to
Secretary Taft tonight. The secretary
is due to arrive at 7 o'clock this evening
and leaves at midnight for Hamburg,
whence he sails for New York tomorrow. He expects to reach New York
on December 15.

Captain Thomas B. Merry, Veteran Writer on Racing Topics, Will Furnish Letters for Saturday's Jour-

Captain Thomas B. Merry, veteran newspaper man and dean of reporters who make a specialty of racing news, will write a series of racing letters for the Saturday Journal, commencing tomorrow

Captain Merry has had an interesting career and is known to all old-time Oregonians. He came to California in quarters at a leading hotel, was strengthened by the arrival of several more Chicagoans this morning. A large Kansas City delegation is at another notel and more enthusiastic cities of the collegates each. The District of Monroeville and owned by Henry Wilsons from that city are expected before temportor. 1853 and was employed as watchman on first the incomparable Heimont, the first thoroughbred stallion that ever crossed the plains. In 1869, after a long service on the Sacramento river as clerk and pilot, Mr. Merry went to Oregon, where he entered the service of the old Oregon Steam Navigation company, under Captain John C. Ains-worth, who gave him his first command on the Columbia there. In 1881 Comthe Columbia river. In 1881 Cap-Merry gave up life on the river became a writer on the Oregonian, er Harvey W. Scott, who showed his appreciation of Merry's services by making him managing editor of that paper's Sunday edition. In 1888, finding him considerably run down by work at the desk, Senator Dolph of Oregon procured his appointment by President Cleveland to be one of a board of commissioners to the national exposition at Melbourne, and there it was that he made himself more familiar with the breeding and performances of Australian horses than any other American.

Captain Merry returned to America in 1889 and has since made two voyages to the land of the kangaroo. In one of these he brought back 16 mares of antipodean breeding, one of which (Ricotchet) afterwards became the grand dam to f Running Water, the best American oppreciation of Merry's services by mak

## Airship to Be Constructed by the National Airship Co.

The National Airship Company has purchased 80 acres of land at an expense of \$56,000, on the Montavilla carline, Portland, and will commence building operations on landing docks, freight sheds, etc., in the spring. We will have a small ship which will carry 100 passengers, 30 tons of mail, and maintain a speed of 80 miles an hour, and make schedule trips between Portland and San Francisco every 24 hours, after April 1, 1908. We will also have ships making transcontinental trips, as well as trans-Atlantic. The first full-sized ship to run between New York and London is 1,250 feet long, 64 feet in diameter, 140,000 cubic yards capacity, 128 tons displacement, 8 independent power plants, 3,280 actual horsepower, 16 propellers, ships 40 men in the crew, and will carry 500 passengers and 40 tons of mail at an expense of \$875 in 24 hours-only as fast as automobiles have traveled.

Stock is now selling at 25c per Share and AFTER DECEMBER 10, 1907, WILL ADVANCE TO \$1 PER SHARE. Mail orders received up to noon Dec. 10, 1907. For further information write or call on
