TOUGH WEATHER AFFECTS CAPTAIN

Master of French Bark Ville de Mulhouse on Verge of Collapse.

CHIEF MATE GIVEN COMMAND OF BARK

Arrives From Antwerp With Report of Terrific Storms in Indian and Pacific Oceans-Rigging Damaged and Hull Possibly Strained.

The French bark Ville de Mulhouse. which arrived here last night from Antwerp, with a cargo of cement, narrowly escaped foundering several times on her way from Europe. Terrifice storms exught her and seas swept her decks continually for weeks in a stretch. Captain Homo fell victim to nervous, the

prostration and had to remain behind at Hobart town, where the big windjammer stopped for provisions and to re-

The first storm was encountered in the Indian acean, and one of the yards came down with a crash, but luckly in-jured none of the crew. For days after the bark labored in awful sess and the

the bark labored in awful seas and the experience became so trying on the skipper that he finally succumbed to nervous prostration. It was feared that he would give trouble and he therefore consented to going into a hospital at Hobart for a complete rest. The vesse; was turned over to the chief officer.

The storm continued on the voyage across the Pacific and when a few days off the Columbia river the bark again fell into terriffe gales. More than once she threatened to go on her beam ends but the heavy cargo remained in position, although it is believed that the vessel was pretty badly strained. Captain Berlequin entered a protest at the custom house this morning to protect himself and owners against any damage that might have been done to the cargo as a result of the stormy voyage.

The Ville de Mulhouse is anchored in the stream. She was chartered some time ago to carry wheat from here to Europe.

SCHOONER SHOWS SPEED.

Alvena Makes Run From Redondo to Astoria in Seven Days.

The schooner Alvena, which is loading lumber at Westport for Redondo, made a record for herself by finishing the ran from Redondo to the Columbia river in seven days. This is steamboar time seldem attained by a windjammer. time seidom attained by a windjammer.

The Alvena has been making a number of voyages between Columbia river and southern California ports this year, but this is the fastest recorded for some time, and is believed the fastest between the two ports on record. She has been racing with the schooner King Cyrus since the first of the year, and her last performance puts her considerably to the good, with a splendid chance of winning the bet.

The King Cyrus is due to arrive at Astoria any time, having left Redondo two days after the departure of the Alvena. The winds are fickle, however, and it might be a month before the King Cyrus makes port, although it would be possible for her to arrive to-day, tomorrow or any time.

ELMER DURLAND DROWNED Identity of Man in Capsized Sailbo

Remarkable Resous.

That truth is stranger than fiction, has once more been demonstrated in the little town of Fedora, Tennessee, the residence of C. V. Pepper. He writes: "I was in bed. entirely disabled with hemorrhages of the lungs and throat. Doctors failed to help me, and all hope had fled when I began taking Dr. Kings New Discovery. Then instant relief came. The coughing seon ceased; the bleeding diminished rapidly, and in three weeks I was able to go to work." Guaranteed for coughs and colds 50 and \$1, at Skidmore Drug Co. Trial bottle free.

DANGER IN DELAY

and the French hark Buffon in tow of a steamer for Portland was forced to drop anchor in the lay.

The heavy blow of early this morning came rather unexpected although the weather bureau ordered warnings displayed last night. It is supposed to have been quite severe along the coast and some damage might have been done to shipping.

Nothing has been heard from the British bark Castor which has now been off the river more than a month and the vensel sighted outside last night was the British bark Clackmannanshire in ballast from the west coast. She stood out again last night and could not be seen this morning.

Captain Campbell, who is here to meet the Castor as overlooker for the company, does not feel particularly wor ried over her failure to show up, saying that every once in a while it happens that a vessel is driven to sea and finds it difficult to work back again. He hopes the vessel will turn up all right.
