When we purchased this property about a year ago for \$10,000 cash, we thought we had picked up a snap but the deeper we get and the more development work we do the more convinced we become that we not only picked up a snap but a BONANZA. The directors as well as the Portland stockholders are all worked up to a high tension over the future prospects of the property. And this leads us up gently to the question; we need more money for installing machinery, development, etc. The first two days' canvass among directors and their friends raised \$2,000. There is only a small amount of TREASURY stock offered at TEN (10) CENTS per share and this will be rapidly gobbled up so that anyone desiring stock should order without delay.

#### TELEGRAPH OR TELEPHONE

Telegraph or telephone your orders, stating the amount of stock you wish reserved and let your remittance follow by mail. First come are first served and should your order be received after this small allotment is disposed of your money will be returned to you. When this little bunch of TREASURY stock is gone there will be no more at any price. Embrace this one best opportunity and get in with the MINE MAKERS. Things never drag with DENNY DULIN.

#### NEVADA STOCKS

Nevada stocks are booming. Tom Lawson says, "There is an eight-cylinder bull market coming down the American pike which will make all predecessors resemble one-horse shays." The market shows it. The entire east is buying Nevada stocks and why? Because at their present prices they are bargains, many of them being sold at 'way less than their intrinsic values as regards their relation to actual ore reserves blocked out in the mines and only awaiting the sound of the whistle to start hoisting. DENNY DULIN stock will be listed on both the Goldfield and San Francisco exchanges at an early date.

#### INVESTMENTS

Investment in proven mines has ceased to be a speculation. In our particular case the element of chance is far removed for the reason that we actually have the ore in the bottom of our incline shaft; three feet of it that will run from \$15 to \$75 per ton.

#### THE REASON WHY

We hear some one say, if your mines are so valuable, why are you selling shares? Why not keep the stock and reap the benefit vourselves

#### OUR ANSWER

If we had the means to carry this project to its fullest development no man could buy a share of stock. We have, however, manifested our faith in the mine by expending thousands of dollars on it which has brought it up to its present stage of development. But this must be supplemented by other expenditures necessary to make this property yield the biggest and most immediate results. To secure

#### CONTESTED CLAIMS BRING ABOUT SUIT

Dan R. Murphy has begun suit in the circuit court on a claim assigned to him by Charles E. Hayes against C. D. Dana-her, alleging that \$8.422 is due for work and money expended in connection with 88 contested land claims. Hayes filed the contests at the Oregon City land office, there being 14,080 acres involved. He says he sold to Danaher for \$2,500, with \$1,000 for expenses previously in-curred and an additional \$1 per acre for -all the land that was found to be good timber land to the extent of 10,000 acres. Hayes says he actually expend-ed \$1,266 and that he has received \$6,344, leaving an unpaid balance of \$8,422.

such requires that we have money to pay freight on our hoist when it arrives, buy mining timbers, supplies, etc., and to provide for a payroll for the miners pending the time when the mine will be on a self-sustaining basis, and when that time arrives our stock will be worth four or five times its present price.

#### A SQUARE DEAL

Our directors are all Portland business men well-known to most everyone and we submit them to you believing that they command your confidence and respect. The management of the mine is all that can be desired. The development proceeds with modern, scientific methods, combined with a thorough knowledge of condi-tions as they actually exist. We have one shaft 132 feet deep, timbered for 84 feet. From the bottom of this shaft we drifted 35 feet towards the ore chute. In addition we have an incline shaft 105 feet, which has followed the ore from the surface, with assays from \$7.20 to \$359. Our main body of ore, which is uncovered in the bottom of the incline shaft, is three feet wide and carries values up to \$75 per ton. Work has been suspended pending the arrival of the hoist, which should be on the property and hoisting ore in the next 30 days.

#### IN CONCLUSION

With the above outline of the property, which consists of five full claims, and of conditions as they actually exist, we feel that we can go to our best friends and say, join us in this enterprise, we will make SOME money and we may make a whole lot, but be assured of one thing, you will get a run for every dollar you put in.

You may pay 25 per cent down and 25 per cent monthly until paid. A discount of 5 per cent will be allowed on all orders for 1,000 shares when cash accompanies order.
