BIG EXCURSION TO HERMISTON

Pendleton People Will Witness Lifting of Headgates at New Town.

(Special Dispatch to The Journal.)

Pendleton, Or., Feb. 6.—Definite plans for a monster excursion from all over eastern Oregon to Hermiston, to witness the lifting of the headgates at the first filling of the monster reservoir of the Umatilla irrigation project during the first week in June were taken last night when the transportation committee of the Pendleton Commercial association, composed of Bert Huffman, J. F. Robinson and T. T. Geer, was instructed to secure rates for the excursion and to prepare plans for carrying out the program for that occasion.

Engineer John T. Whistler, who is in charge of the Umatilla project, informed the committee that the reservoir will be ready to open by the first week in June, a definite date to be fixed later, and that the government would be glad to cooperate with the association in making the opening an event. The reservoir contains an area of 1,700 acres and will be filled through a main canal from the Umatilla river.

The lifting of the headgates and the filling of the reservoir will mark the final completion of the Umatilla irrigation project upon which over $1,000,000 is being expended and under which 20,000 acres of arid land will be reclaimed.

Government and state officials have planned to be present and reduced rates will be secured from all over Oregon, and the opening of the project will be made a state-wide event.

NO OPPOSITION TO VAN DUSEN

Secretary of Fishermen's Union Says Complaints Have Been Withdrawn.

Salem, Or., Feb. 6.—Opposition to Fish Warden Van Dusen has not come before the state fisheries board, composed of the governor, secretary of state and state treasurer. Secretary Benson says there has been no discussion of the matter before the board.

The secretary of the Astoria Fishermen's union was in the city yesterday and said they were perfectly satisfied with Dr. Van Dusen's work. The fishermen had at first protested against his appointment and had asked his removal on the ground that he did not understand his business and hired too many incompetent men, but the fish warden had shown a disposition to learn his work and employ competent people, and all objections on the lower river to his administration had disappeared.

APPOINTED TO NAVAL ACADEMY

Daniel E. Barbey, who has been appointed midshipman at the United States naval academy at Annapolis, is the son of John Barbey, a hardware dealer of this city. He is 18 years of

Daniel C. Barbey.

age, and graduated last year from the Portland high school. He was born in Portland and gained his appointment through a competitive examination last year in this city.

Young Barbey has to take another mental examination here before leaving for Annapolis to pass the final examination in April. He is elated over his appointment, and is preparing himself to pass the forthcoming examination with the highest honors. He lives with his parents at 425 Tenth street.

NOBODY SPARED

Kidney Troubles Attack Portland Men and Women, Old and Young.

Kidney ills seize young and old.
Come quickly with little warning.
Children suffer in their early years—
Can't control the kidney secretions.
Girls are languid, nervous, suffer pain.
Women worry, can't do daily work.
Men have lame and aching backs.
The cure for man, woman or child.
Is to cure the cause—the kidneys.
Doan's Kidney Pills cure sick kidneys.
Cure all forms of kidney suffering.
Portland testimony proves it.

W. Jenkins of 4103 Harrison street, Portland, Oregon, says: "I have no occasion to change anything that I said three years ago in recommending Doan's Kidney Pills, for since that time other members of our family have found equally beneficial results in treating kidney complaint. Before using Doan's Kidney Pills I suffered with acute attacks of backache and a derangement of the action of the kidneys, and a dull pain made it difficult for me to attend to my work. As the result of using this fine remedy I have been free from kidney complaint and backache for over three years, and therefore feel great confidence in recommending them to others."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Of Interest To Women.

To such women as are not seriously out of health, but who have exacting duties to perform, either in the way of household cares or in social duties and functions which seriously tax their strength, as well as to nursing mothers, Dr. Pierce's Favorite Prescription has proved a most valuable supporting tonic and invigorating nervine. By its timely use, much serious sickness and suffering may be avoided. The operating table and the surgeons' knife, would, it is believed, seldom have to be employed if this most valuable woman's remedy were resorted to in good time. The "Favorite Prescription" has proven a great boon to expectant mothers by preparing the system for the coming of baby, thereby rendering childbirth safe, easy, and almost painless.

Bear in mind, please that Dr. Pierce's Favorite Prescription is not a secret or patent medicine, against which the most intelligent people are quite naturally averse, because of the uncertainty as to their composition and harmless character, but is a MEDICINE OF KNOWN COMPOSITION, a full list of all its ingredients being printed, in plain English, on every bottle-wrapper. An examination of this list of ingredients will disclose the fact that it is non-alcoholic in its composition, chemically pure, triple-refined glycerine taking the place of the commonly used alcohol, in its make-up. In this connection it may not be out of place to state that the "Favorite Prescription" of Dr. Pierce is the only medicine put up for the cure of woman's peculiar weaknesses and ailments, and sold through druggists, all the ingredients of which have the unanimous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended.

A little book of these endorsements will be sent to any address, post-paid, and absolutely *free* if you request same by postal card, or letter, of Dr. R. V. Pierce Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy to take as candy

MRS. CARITHERS LOSES ESTATE

Court Sustains Allegation That Woman Plied Husband With Booze.

(United Press Leased Wire.)

Los Angeles, Feb. 6.—Mrs. Delta Carithers of this city loses the bulk of the estate of her late husband, William D. Carithers, valued at $50,000, through a verdict returned by the jury in Judge Bordwell's department of the superior court in which the last will is set aside.

Proceedings to annul the will on the ground that deceased signed under coercion and while his mind was affected by the excessive use of stimulants have been in progress for the last nine days.

Robert Carithers of Table Grove, Illinois, a brother of William Carithers, instituted a contest against the widow, alleging that a will written May 3, 1906, expressed the real intent of the deceased in providing for the distribution of his estate. The trial has been replete with sensational features. Mrs. Carithers was accused of having married the deceased when he was so intoxicated that he had to be supported when the bans were pronounced. It was also alleged that she had provided him with liquor, which he drank until his mind gave way, and that she then caused him to be removed to a hospital, where his friends were denied admission. It was stated last evening by counsel for Mrs. Carithers that the case would be appealed to the supreme court on the ground that the verdict was not sustained by the evidence.

YOUNG MEN TO BOOST ALBANY

New Club Organized and Contest Inaugurated to Find Suitable Name.

(Special Dispatch to The Journal.)

Albany, Or., Feb. 6.—Albany has organized a new boost club, and the membership consists of about 25 of Albany's leading young business men. The principal object of the club is to build up Albany as a city, and to increase her industries and population. The club proposes to increase the population of the city to 10,000 within the next five years.

No name has been selected, and a contest is to be inaugurated for a name and suitable prizes will be offered for the best name offered.

The following officers were elected for the ensuing year: President, E. H. McCune; first vice-president, Fred Dawson; second vice-president, G. A. Flood; secretary, M. H. Gibbons; treasurer, R. C. Churchill; ways and means committee, J. N. Chambers, D. O. Woodworth, F. J. Devine and Willard L. Marks.

TWO REVIVALS ARE HELD AT PENDLETON

(Special Dispatch to The Journal.)

Pendleton, Or., Feb. 6.—Pendleton is having two of the greatest revival meetings in the history of the city. Rev. Haudenschield, the noted evangelist, who is conducting a series of meetings at the M. E. church, in which the Presbyterians, Methodists and Baptists have united, is a very forceful speaker and from five to ten people are converted each evening. The church is crowded for each meeting, and Rev. Haudenschield states that he will remain here longer than in any place he has been in the northwest on account of the interest shown here.

Rev. E. Wilson is conducting a series of meetings at the Christian church and a great number of converts have been received there also.

Indiana Oratorical Contest.

(United Press Leased Wire.)

Indianapolis, Ind., Feb. 6.—A score of budding orators, each accompanied by a band of enthusiastic "rooters," are in the city to engage in their annual forensic tilt tonight. The occasion is the annual contest of the Indiana Oratorical association, the membership of which includes Notre Dame, Wabash, Purdue, Butler, Franklin and other leading colleges and universities of the state.

Milton Club Election.

(Special Dispatch to The Journal.)

Milton, Or., Feb. 6.—At a meeting of the Milton Commercial club held in Alliance hall last evening the following officers were elected for the year: W. E. Putnam, president; H. M. Cockburn, first vice-president; H. A. Williams, second vice-president; A. E. McKnight, secretary; T. C. Frazier, treasurer.

Removed to 517 Lumber Exchange Bldg., Second and Stark Streets

The Butte Boys Consolidated Mining Company

Has Met With Unprecedented Success in Its Offering of Original Stock at TEN CENTS PER SHARE

THERE IS SENSE IN INVESTING IN A REALLY DEVELOPED GOLD MINE!

BRIEF HISTORY OF OUR PROPERTY

So many persons write us asking for information concerning the Butte Boys Consolidated Mining Company's mines in Goldfield, Nevada, that we have thought that perhaps the best as well as the least expensive method of satisfying this craving is that which we here employ—the columns of a daily newspaper. Another reason for our adopting this method is that we have no secrets—know nothing we wish to hide from the public—and in answering those who write us we may appease the desire of others who would like to know, yet hesitate to ask for the information.

ITS EARLY DAYS

The Butte Boys property consists of five and a fraction claims, or 103 acres of ground, in the Goldfield, Nevada district. It was acquired last year from the Callahan brothers, the discoverers, and the present management began its improvement last spring. Its stock was first put upon the market nearly a year ago, and the work of preparation for development was almost immediately begun. Except for transitory delays, always incident to such beginnings, development has been continuously carried on, until now we have a shaft more than 300 feet deep, with one crosscut of 145 feet. In this development our miners have passed through 46 feet of ore of varying values, but sufficiently rich to make it immensely profitable even if milling only the lowest grades. We have had stringers that assayed $2,000 to the ton, but it would be little short of criminal to hold out the impression that these were fair samples of all our rock. Quite an extensive body was tested by Mr. J. P. Stampher, an expert mining engineer, that averaged in the neighborhood of $600 to $700 per ton, and we look upon this as adding in large measure to the value of the property. But of $25 to $50 ore we seem to have an almost unlimited supply, and it is from this product that we expect our permanent and ever-increasing dividends.

LOW GRADE ORE THE BEST MINES

Among the difficult facts to fasten upon the human mind, eager for riches, and dropping upon the gold mine as the surest avenue leading to the attainment of that ambition, is that the low-grade ore gold mine is the one to tie to and the surest to eventually satisfy the most avaricious nature. We have said that we have ore that has tested $2,000, and as high even as $3,000 to the ton, and those statements are positively true. But it is a provision of mineralogical nature that such bodies are small, and there are seldom large deposits of even $500 ore. But when we get down to $25, $50, or even up to $100 rock, permanency may be looked for, save that the bulk will average beneath the $50 mill test or assay. Of this rock we believe we have all we can mill for years, with the largest equipment we can secure, and that our stockholders will have a permanent monthly harvest so long as they retain Butte Boys shares.

AN EXPERT MINER'S OPINION

Mr. M. D. Neer of St. Johns, a suburb of Portland, is an expert prospector and miner. He was for years with the Homestake gold mine in South Dakota, one of the largest gold mines in the world. It operates a thousand stamps and has made millions upon millions for its stockholders—has made thousands immensely rich—and yet the general average of its ores, Mr. Neer declares, is but $2.55 to the ton of ore. Everything is ore, however. There is not an ounce of waste rock. None is thrown away. Every pound taken out is run through the stamps and milled, because, like the Butte Boys, it is free-milling rock. But we have had only one test running so low as the Homestake, and we can say with the utmost confidence that our ore, 46 feet of which we have passed through, will average more than $25. Mr. J. P. Stampher, as stated elsewhere in this advertisement, filled his ore sacks from our dump, picking from a radius of 30 feet around, ore that had been emptied haphazard from our buckets, and from this he got a mill average of $25.60 to the ton. This means that the general average of our ore is of three times the value of the Homestake. Ore of the celebrated Treadwell mine in Alaska averages $3 or thereabouts to the ton. Seldom does any of it run above $4. But it is there in millions upon millions of tons, and who ever hears of any of that mine's stock being offered on the market? Its hundreds of stamps are pounding away day after day, and its profits pile up with exactly the same regularity. It is pleasant to contemplate $2,000 or $3,000 ore, and we wish we had a mountain full of it; but the truth is there has not such a thing been found upon the face of the earth, and it is not likely ever will be. The millionaires of California gleaned their almost incalculable riches from the low-grade mines—those that gave them $25 to $50 ore—and we have a supply of this sufficient to keep our drills hot and picks descending as long as most of us shall live. It is because the $25 to $50 to the ton mine is invariably permanent that experts prefer its stock—and buy it in preference to those of the $500 to $2,000 class:

The Mohawk of Goldfield is an exception to the average high-class gold producers, its ores, it is said, averaging more than $100 to the ton, but Goldfield throughout is an exceptional camp. It is the richest in the world, and the Mohawk, but one of its chief mines, in the first 60 days of its operation, produced $6,000,000 in gold! For this camp, however, the Mohawk's $100 average to the ton is not greatly out of proportion to that expected from this region, Mr. Stampher, the noted mining engineer, declaring that "For the same amount of work done, the Butte Boys has a better showing than the Mohawk had, and as good a showing as any mine in Goldfield." Carefully reading the engineer's report on the Butte Boys, Mr. Neer declared that "It looks good to me." His statement that he "found in both tunnels a number of ore 'stringers,' all of which tended in a northeasterly and southwesterly direction, will be well understood by mine operators and miners of experience as one of the most favorable omens, though not understood or realized by persons not acquainted with or versed in mineralogy."

WHAT WE EXPECT AND WHY WE EXPECT IT

One correspondent asks: "What reason have you to expect generous returns from your mine?"

This writer is a Willamette valley farmer, and perhaps would have no difficulty in replying to our query if we, viewing his broad wheat fields of yellowing grain, and cognizant of the prosperity of his neighbors, well knowing that by the richness of their lands they increase in wealth, should propound to him the query: "What reason have you to expect a generous harvest from your springtime sowing?"

Doubtless he would in return ask if we were not looking out upon his ripening fields of thrifty grain, and if they did not make silent answer to our interrogation.

We therefore say to him that we began our seeding almost a year ago; that the seed fell upon fertile soil; the ore is upon the dump; water will be our thresher, economy our shibboleth, and that **there is no more chance of our failure than of his almost completely matured grain fields withering away beneath the melting suns and being dissipated by the tempest that never comes!**

We expect our ore to continue exactly what it has proven itself to be by numerous mill tests as well as assays, and that it will grow richer as we go down. We expect it to have all the permanency of the most faithful low-grade mines, with the difference that "low grade" in Goldfield means $25 to $100 to the ton, as distinct from the low-grade mines of the Dakota or Alaska camps.

We expect large net returns from our mine, because **we have the ore in sight to warrant such expectation,** and that there is not another property of equal magnitude in the United States more carefully handled or more intelligently worked; **but above and beyond all other considerations is the fact that ours is free-milling ore, requiring neither cyaniding or smelting,** and can therefore be treated **at an expense of from $1 to $3 per ton, including mining,** thus saving to our stockholders from $10 to $15 per ton as compared with the cyaniding and smelting processes. If our correspondent will some day gather together a ton of rock and survey its smallness, he will have some conception of the monumental saving in mining and treating an ore body **we positively know to exceed 46 feet in diameter,** when the rock is of the free-milling quality. If we shall eventually attain to the dimensions of the Homestake, of itself this saving will amount to $5,475,000 per annum, not to speak of the profits from the ore. But, of course, we shall not grow to the Homestake's dimensions in one or half a dozen years.

IN ALL THIS WRITING WE HAVE SPOKEN ONLY OF ONE OF OUR CLAIMS

This because we are mining upon only one of the **five.** We have leased 16 acres of one of the other four to other parties, from which we are to receive 15 per cent of its gross receipts after deducting freight charges upon its shipments. This will doubtless yield us a liberal income, **and we have 87 acres still** upon which we are just as likely to find other mines as we were to strike it rich on this claim.

WATER IS ALL WE NEED

And we will have that when we get down to its level. Another 100 feet will most likely settle this question, but it would be no great damage if we were compelled to sink yet 200 feet. We want to go down anyway. The Mohawk is down 500 feet and is finding richer rock all the time. Other mines are having the same experience, and we are confident we will, too. Why? Because experts in mining and the best mining engineers tell us so. But when we reach a place in close proximity to the water level it must not be concluded that we will recklessly plunge down into the fluid. When we reach the seepage we shall stop and crosscut. We will spend a month or two right there. By that time we will have "our house in order," for the flow that will start our mill, well knowing that every stockholder will recognize the wisdom of this sensible preparation. Then, when we are ready for the keen activities of lively operation, the wheels will begin to turn and the pounding of the stamps will usher in the manifest prosperity of the enterprise, **and there will not be a stockholder on our books who will be forgotten or slighted, or who ever will accuse the management of unfairness or neglect of duty.** If ever there was a mining management on this green earth determined to treat its people right, **the Butte Boys of Portland is its name!**

COLD FIGURES FROM GOLDFIELD

We already have written that Goldfield is the richest and greatest gold mining camp on earth. Here are some of the coldest kind of facts in official figures to go to prove the truth of our asseverations. If readers of this advertisement will send for, or buy from a newsdealer, a copy of the Goldfield News of Saturday, February 1, he will find chronicled in the third and fourth columns of the last page these figures:

PROFITS FOR JANUARY ON $100 INVESTED IN

Midnight Pawnee	$12.50	Red Hills	50.00
Combination Fraction	12.80	Red Top Extension	50.00
Florence M. & L.	15.00	Crackerjack	60.00
Eureka	16.67	Magnet	60.00
Jumbo Extension	18.00	General Washington	66.67
Black Butte Extension	20.00	Mohawk Ledge	66.67
Florence	27.73	Florence Extension	80.00
Diamondfield	28.79	Yellow Tiger	86.96
Consolidated	35.29	Great Bend Annex	90.91
Empire	37.50	United Mines	100.00
Lone Star	38.89	Higgonson M. & L.	150.00
Coming Nation	41.67	Sandstrom West Extension	200.00
Booth	42.11	Black Butte Bonanza	237.50
Daisy	42.22	Baby Florence	480.00
Milltown Fraction	50.00	Mohawk figures secret.	

Total profit on $2,900 equally invested in all Goldfield stocks, $2,217.08.
Average profit on $100 invested in each of 29 Goldfield stocks, $76.45.

ISN'T THAT MAKING MONEY FAST ENOUGH FOR YOU?

Wouldn't it satisfy almost anybody, devoid of bristles on the back of his neck? The Butte Boys mine is in the district in which this rich mess is found. **Can it be possible that anybody will neglect to secure a slice of this Butte Boys pie now that it is set upon the table?**

FULLY EQUIPPED AND OWE NOTHING

The Butte Boys mining operations have always been conducted on a spot cash basis. We have not accepted credit from anyone, and have our property completely equipped with everything necessary to prosecute our work with the greatest vigor. Our miners have not been idle a day since we started operations, and we have no thought that there ever will be a cessation of delving into the fastnesses of the earth and extraction of its wealth so long as any of us will be interested in the pursuit of wealth.

THOSE FRIENDS WHO HAVE JOINED IN WITH US IN THIS MINING FOR THE HIDDEN TREASURES OF THE DEPTHS, MAY BANK THEIR VERY EXISTENCES UPON THE ACCURACY OF OUR STATEMENT THAT THIS MINE WILL WITHIN A FEW MONTHS BE RETURNING THEM ITS FRIENDLY GREETINGS IN THE SHAPE OF THE COINED PRODUCT EACH OF US SO EAGERLY IS SEEKING

There is no chicane, no trickery, no deception, no vain boasts, no falsity or wildcat bragging hanging around this mine's headquarters, its shafts or its tunnels. Our **advertisements are true.** We want this particularly understood. Our people will be getting back **ten dollars for one within a year.** We are as firmly of this belief as that we are breathing the breath of life.

WE HAVE A PRINCELY PROPERTY! IT WILL MAKE PRINCELY GIFTS TO ITS OWNERS!

STOCK FOR A LITTLE TIME LONGER AT 10 CENTS PER SHARE—IT IS FULLY PAID AND NON-ASSESSABLE AND OF THE FACE VALUE OF $1 PER SHARE.

SON SAYS MORSE IS NOT ABROAD

Harvard Student Swears Father Was in New York City Last Night.

(United Press Leased Wire.)

Cambridge, Mass., Feb. 6.—Benjamin W. Morse, son of the deposed ice king, and a student at Harvard university, declared today that his father is in New York and that he heard from him last night.

In answering advertisements herein, please mention The Journal.

NEW BUILDING FOR COLLEGE AT MILTON

(Special Dispatch to The Journal.)

Milton, Or., Feb. 6.—At a meeting of the board of Columbia college it was decided that an administration building costing $25,000 should be erected, and it is understood that this building shall be ready for use at the next college term next fall. The building is to be equipped in the most modern way, giving every advantage to the students. This is a South Methodist institution, and is proving very successful. There is an enrollment of over 100 students this term, all from different parts of the northwest.

LEAVES FORTUNE TO KLAMATH SCHOOLS

(Special Dispatch to The Journal.)

Klamath Falls, Or., Feb. 6.—The will of Joseph Conger, one of Klamath county's oldest citizens, who died in this city on Saturday, was filed for probate today, and it was found that he had left about $14,000 to the Klamath Falls public schools. The will stipulates that the money be invested in interest-bearing securities or loaned, and that the interest be used for the benefit of the schools, and the principal sum to remain intact as an endowment fund to be known as the "Joseph Conger fund."

D. C. HOLT FINED FOR QUENCHING THIRST

(Special Dispatch to The Journal.)

Albany, Or., Feb. 6.—D. C. Holt of Harrisburg, accused of violation of the liquor laws, yesterday afternoon changed his plea from "not guilty" to "guilty," and was fined $75 and the costs. The next case for trial is that of P. C. Anderson on the same charge, this will be taken up immediately.

Prince Edward's "Tip."

(United Press Leased Wire.)

London, Feb. 6.—A story of the school life of Prince Edward of Wales at Osborne college relates that Prince Edward goes through the ordinary routine, and among other things has to take his part in fagging. Recently an elder cadet gave the young prince a shilling, and directed him to go to the shop and get some jam puffs. Prince Edward went on his errand and brought back the delectable puffs and threepence change. "Keep the threepence, boy," said the cadet, in a lordly fashion, and the future ruler of 400,000,000 of people pocketed his tip with an unalloyed joy. In fact it was so great that he sat down promptly and wrote the details of his success to his father, the prince of Wales, who is said to have fully shared his joy.

START FIRST BRICK BUILDING AT CLIFFS

(Special Dispatch to The Journal.)

Cliffs, Wash., Feb. 6.—Bricklayers commenced work today on the first brick building in Cliffs. When this is finished work will be commenced on the cement block buildings. Over 60 wooden buildings have been erected during the past five months.

A move is now on foot to arrange for incorporating the town. The latest census shows about 240 inhabitants on the grounds, 300 being the requisite number to incorporate.

Union High Schools.

(Special Dispatch to The Journal.)

Salem, Feb. 6.—County Superintendent Walter Smith reports that the Marion county communities are moving to establish union high schools—Stayton and Gervais. They are conducted on the same plan as county high schools and are created by uniting several smaller districts.

The Jumping Off Place.

"Consumption had me in its grasp and I had almost reached the jumping off place when I was advised to try Dr. King's New Discovery; and I will to say right now, it saved my life. Improvement began with the first bottle and after taking one dozen bottles was a well and happy man again," says George Moore, of Grimesland, N. C. As a remedy for coughs and colds and healer of weak, sore lungs and for preventing pneumonia New Discovery is supreme. 50c and $1.00 at Skidmore Drug Co., druggists. Trial bottle free.
