

ONLY THING HOP MEN CAN DO NOW TO HELP PRICES IS TO PLOW UP AT LEAST HALF OF THE PRESENT ACREAGE.

BEET SUGAR IS AFTER CONTROL

Market Is Complicated With One Up and Other Down and Then Back Again.

Front street features: Beet sugar men on rampage. Sugar market both up and down. Beet sugar men are hard to handle. One slow tone in poultry. Farmers are holding wheat. Salmon supplies again limited. Beet market is dull. Grape fruit is rather scarce. Hay market somewhat steady. Beet oranges are hard to sell. California oranges selling better.

Beet Sugar Is Steady. The cane sugar men are getting a dressing from the beet men, which the former are now about to return. This is causing all sorts of complications in the sugar market. First, one factor is up and then the other. The regular brands of cane sugar were advanced 5c per hundred pounds during the past week while the price of beet remained unchanged. This is far in excess of a victory for the cane sugar men. The beet manufacturers sidestepped a little and put down their special brands of cane sugar. This has drawn down the price of beet to the regular brands—the same as for regular beet sugar. This last drawback to cane prices has worked up the beet men to a considerable extent and what they will do to the cane manufacturers is a matter of guesswork. However, the cane sugar people are not lying awake nights to see what is going to happen for they firmly believe that the beet men will retaliate in some way or other.

Both Want to Control Trade. Both the cane and the beet sugar men are very anxious to dictate the trade of the Pacific coast. The beet men are more firmly entrenched every day. The cane sugar people are not idle and are making preparations for the final battle between the two conflicting interests. Some of the cane people are putting in a greater amount of beet sugar than they are doing with cane. This action is believed by the beet sugar people to indicate that the cane manufacturers have always been produced the cheapest and for this reason want to be on the winning side. The acreage of sugar land has never so great as during the past season and it is stated that preparations are now being made in this line. The beet men are increasing their acreage and will not greatly overstock the market at present indications the con- sideration will keep pace with the output or it has increased gradually every year.

Some Sugar Statistics. Willet & Gray, acknowledged to be among the greatest sugar authorities in the world, show in their report the following summary of sugar supply and demand: Consumption of sugar, 2,932,973 tons, in increase of 129,269 tons over 1906, or 4.5 per cent increase, against an increase of 231,797 tons, or 8.6 per cent over the preceding year. For 1907 the average yearly increase for 26 years.

Total consumption of sugar on which duty was paid was 356,237 tons, and of sugar on which a concession of duty was allowed was 1,576,736 tons, or 1,220,500 tons.

Cuba contributed 1,240,000; Hawaiian Islands, 418,192 tons; Porto Rico, 212,340 tons; Philippine Islands, 1,070 tons; domestic cane, 264,968 tons; domestic beet, 375,410 tons; mangle sugar, 10,000 tons, and molasses sugar, 14,700 tons. Total consumption of refined sugar in 1907 was 2,843,928 tons, of which 1,907 was refined in this country.

Domestic beet sugar factories consumed 375,358 tons, or 13.19 per cent, against 10.87 per cent in 1906 and 8.73 per cent in 1905.

Foreign refined supplied 1,008 tons, .04 per cent, against 11 per cent in 1906 and 15 per cent in 1905.

Average difference between raw and refined in 1907 was .893c per pound, against .82c per pound in 1906 and .75c in 1905.

Per capita consumption in 1907 was 55 pounds, an increase in the year of 14 pounds. In 1881 it was about 50 pounds, showing a gain in 22 years of 7 per cent, a splendid evidence of a rising prosperity.

Beet Are Dull but Unchanged. While the local egg market is not showing any change in values today the rest of the trade is dull and dealers report few sales during the 24 hours. California tangierines, of the same variety as the Japanese, but of superior quality, are in better supply. They're better too.

Brief Notes of the Trade. California oranges are finding a better sale for best quality at unchanged prices.

MILD WEATHER PUTS EGG PRICES LOWER

"Since the mild weather set in eggs have rapidly declined from the prices obtained during the cold spell, and will likely drop again in the near future."

"Butter is cleaning up a little better, but supplies are still large. Dairy or store butter is poor and weak."

"There has been a little better demand for poultry this week, and the large springers have met with a better reception. Geese are dull and low, and ducks are not as firm as they were a few days ago. Broilers and fryers are firm and in great demand. Live turkeys are poor and dull, but fat dressed ones are in very good request at good prices."

"Veal is still very scarce, and small and medium, if fancy, are bringing record prices. This market needs much more veal, and more could be used."

"Mutton and beef is in the best sort of demand. Potatoes are still quiet with little doing in this line. Onions are firm and high."

"Potatoes are still quiet with little doing in this line. Onions are firm and high."

"Grape fruit is rather scarce but demand is limited. Salmon from the Columbia and Willamette are again limited. A small run of gilet smelt again reported from the lower river. Potato market is very slow with practically no outside movement reported by the trade."

PRODUCE PRICES IN SAN FRANCISCO MARKET
