

DR. GLASS IS FREED

Deputy District Attorney Adams Returns "Not True Bill" in Mysterious Case Against Beautiful Russian Woman for Murder.

Mrs. Augusta Glass will not have to stand trial in the circuit court on the charge of killing her husband, Alexander Glass, who was shot in the back while they were in a room together in an apartment-house. Deputy District Attorney Adams this morning filed "not a true information," which ends the case, she having been charged with manslaughter after her preliminary examination.

Mr. Adams this morning explained that after a long investigation he decided there was no possibility of convicting Mrs. Glass if she were placed on trial.

Explains Law. "The law says that a grand jury should not return an indictment unless there is a probability of conviction," said he, and the same rule should apply to the district attorney sitting as a grand jury.

For several days after her arrest Mrs. Glass was hysterical. She was confined for a short time in the city hall and then placed under guard in different hospitals. Finally she was released on her own recognizance and a local charitable institution has been looking after her welfare.

Glass is said to have had a long criminal record and to have dragged the woman around from place to place with him, keeping her in fear and constantly abusing her. They had been in the city only a short time when he was killed.

Mandelary, who was one of the alleged conspirators in the Radding-Waymire case, but was released by the state after his tearful pleas for mercy and his promise to tell the truth, which, he said, would convict the other two defendants, gave testimony this morning directly at variance with his sworn statements on the preliminary hearing.

At the preliminary hearing Mandelary testified that Radding had him go into the Hamilton building on the afternoon of the attack on Mayor Lane, telling him that something was going to happen and that a prominent official and a woman would be mixed up in it.

SCHOOL CHILDREN TO HOLD FESTIVAL

Speakers Will Tell Youngsters of Part They Are Expected to Play.

Eighteen thousand new boosters for the Portland Rose Festival will pour out of the schoolhouses tomorrow afternoon.

Superintendent of Schools Frank Rigler has written the principals of the more important schoolhouses, telling them that they will be visited by two speakers tomorrow afternoon at 3 o'clock.

Speakers will attempt to interest the children in the details of the Rose Carnival. It is felt that very little is known among the school children concerning the extent and importance of the carnival. It is hoped that the children will be enticed not only to plant roses, but to write to friends in other cities, the festival and of the many advantages of Portland and Oregon.

Speakers will also tell the children how much the part taken by them in last year's festival was appreciated and how it has been planned that this year there will be no delay in the marching and that there is more time, more money and a better system of control.

PROMINENT HOSPITALS SAY PE-RU-NA IS EFFICIENT IN RELIEVING ALL CATARRHAL DISEASES.

HOSPITALS ALL OVER THE CONTINENT FIND PE-RU-NA VALUABLE IN TREATING ALL CATARRHAL DISEASES

CATARRH of the respiratory organs is a common ailment in Canada for at least two-thirds of the year.

This condition is no doubt caused by the long, severe winters experienced in this part of the continent, where it is rare, when Pe-Ru-Na was discovered by Canadian people to be a reliable remedy for these catarrhal diseases, it at once became a popular medicine, not only among individuals and in families, but in the great hospitals, where it was used as a preventive and relief in hundreds of cases.

These institutions do not hesitate to give their indorsement of the remedy which has been so helpful in the treatment of their poor and sick.

Among these institutions is that of the Sisters of Good Shepherd, who gave the following indorsement:

The Sisters of Good Shepherd, August 30, 1935. Montreal. "Having used Pe-Ru-Na for the past few months for our sick and poor we are happy to say that it has given us great satisfaction."

After a continued use of the remedy, this institution has found no reason to change its good opinion of the remedy and expresses its satisfaction in the following terms:

Montreal, Nov. 7, 1935. "We found Pe-Ru-Na a relief in several cases. We can say it is a good tonic and we are very thankful. Sisters of Good Shepherd. When catarrh once fastens itself upon the system it becomes an obstinate disease to eradicate.

A systematic remedy—one that reaches every internal organ of the body—is an absolute necessity. Pe-Ru-Na is just such a remedy. It searches out the cause of the disease, healing and strengthening the mucous membranes, and thus giving nature an opportunity to perform her part of the restorative process.

One of the many hospitals which have found Pe-Ru-Na of value in treating old and obstinate cases of catarrh is the Hospital St. John, who writes as follows: "We are happy to tell you that your Pe-Ru-Na has given us satisfaction. Three patients have tried it, one 68 years old, Renou Dupuis, afflicted with catarrh, is much relieved, more than he has been for a number of years."
