A Great Uplift in Individual Credit!

The whole world operates on credit. Why shouldn't the individual? The average man can't possibly pay cash for everything he wants. What right, therefore, has the merchant to make borrowing any harder for his customers than the banks make it for him? A study of the subject reveals the fact that credit on commodities is a national necessity. We do not only proceed upon that basis of belief, but we make our credit system clean, comfortable, dignified and desirable. Ours is not the old plan that made life a burden for buyers. It has experienced an uplift and it is accorded for the good it will accomplish—not only for you, but for us.
