

THE FIRST THING WE MUST IMPRESS UPON THE MIND OF READERS OF THE SUNDAY JOURNAL IS THAT THESE ADS ARE ABSOLUTELY TRUE

A Week of Excitement in the City of Goldfield.

\$165,000 Ore Being Mined by the ROGERS LEASE on the FLORENCE and the FLORENCE ANNEX, Blasting Out Tons of \$1,016.40 Rock, Large Blocks Going as High as \$50,000

Scarcely at any time since the first gold was discovered in Goldfield, Nevada, when the precious metal was found on the surface of the ground at the Sandstorm, now one of the rich mines of that famous district, has there been greater excitement than has prevailed there the past week. First of all, the Florence Annex broke into a ledge of \$1,016.40 ore, which it has been blasting out and rushing to the surface with all the vigor that men on short shifts can employ, because the lease on the property expires in exactly 45 days from today. No attention is paid to ordinarily rich rock, which would bring a shout of joy to miners in any other camp, but

EVERY NERVE IS STRAINED TO ITS UTMOST TENSION TO GET THIS STUFF OUT OF THE MINE AS FAST AS POSSIBLE, TO BE LATER MILLED AT THE WILL OF THE LEASERS

On top of this came the announcement that, on the Rogers' lease, another of the Florence properties, the drillers had plunged into a great body of \$3,845.60 ore, and as this lease expires at midnight on July 11, there are constant roars of powder down in its depths, miners are urged to exert themselves TO THE VERY UTMOST OF THEIR ABILITY, and the management is all excitement, and everything is in the midst of an uproar such as is seldom witnessed outside of a gold-producing region.

\$100,000 FOR SIX WEEKS' WORK.
Robert F. Scott worked in the Portland Trust National bank at \$25 per week. He put six weeks' wages into Goldfield stocks and in two years sold at \$100,000, after having been paid several thousand dollars in dividends. He bought \$50,000 worth of Portland income property—never need work another day—and is now on a tour of the world. He roomed for years at the Newcastle, Third and Harrison. He took a slight chance at the beginning. He is glad of it. Our stockholders' chances are 50 times better than were those of Mr. Scott. But the moment those shares will be sold, the moment we have a wire that our miners have struck high-grade ore. We are right where we ought to get it any time. One hundred dollars invested in our shares today is very liable to be earning \$100 per month within a quarter of a year. It may be had in installments, too—10 per cent down and 10 per cent per month. Scott would have worked 30 years and 9 months for \$100,000 at \$25 per week.

MINING STOCK PROFITS.
The strike being practically settled, the Florence has resumed dividends of 10 cents per month. Five hundred shares therefore draws \$50 per month, or \$600 per year; 1,000 shares \$100 per month, or \$1,200 per year; 5,000 shares \$500 per month, or \$6,000 per year, and other amounts of shares in proportion. When our shares pay as well, and we have no doubt they will, and that at an early day, our people can see how profits will roll in to them. For example, \$500 invested at our present prices would mean the handsome income of \$6,000 per year, or \$500 per month. We certainly believe that our dividends will be rich as the greatest mine in Goldfield ever has been. But our stock may pop up from 10 cents any day.
American mines have been the wonder of the world. They have made \$40,000,000 for the Hearst estate, \$25,000,000 for C. P. Huntington, \$25,000,000 for Leland Stanford, \$25,000,000 for James G. Fair, \$25,000,000 for Marous Daly, \$25,000,000 for Senator Clark, \$22,000,000 for Charles Crocker, \$20,000,000 for Peter Donahue, \$20,000,000 for J. B. Haggis, \$20,000,000 for Claus Spreckles, \$20,000,000 for the Sharon estate, \$21,000,000 for Mark Hopkins, \$20,000,000 for Thomas F. Walsh, \$15,000,000 for W. S. Stratton, \$10,000,000 for John W. Mackay, \$10,000,000 for James G. Flood, \$10,000,000 for William S. O'Brien, \$10,000,000 for the Lick estate, and millions upon millions for hundreds of others that might be mentioned. Each of these men were poor as church mice at the beginning. They invested all they could take and scrape together in such shares as were being sold. **THEY GOT RICH QUICK, and are getting richer all the time. Readers of this advertisement ARE OFFERED JUST SUCH OPPORTUNITIES RIGHT NOW.** It is not our fault if it is not embraced.

But to Cap the Climax of It All, and to Set the Rogers People Next to Crazy With Excitement Scarcely Possible to Conceal, at Ten o'Clock Yesterday a Blast of Powder Uncovered a Vein of Ore That Actually Shows Milling Values of \$165,000.00 to the Ton

A telegram conveying this information was received yesterday from Mr. Rogers himself, and is therefore TRUTHFUL WITHOUT QUESTION! Other Goldfield mines have made large strikes also the past week, the Sandstorm showing some rich rock, but

THE CENTER OF ATTENTION HAS BEEN DIRECTED TO THE IMMENSELY RICH STRIKES IN THESE TWO FLORENCE LEASES.

Goldfield is so accustomed to reports of such strikes that people take even extraordinary finds as matters of course, but the richness of these two leases, as evidenced by the discoveries of the last six days has stirred even that camp as it seldom has been before. Goldfield newspapers arriving in Portland since Wednesday have been full of expressions of astonishment and delight at the finds, even before the Rogers \$165,000 ore was brought to the surface, and these may be bought at the newsstands and perused at leisure by those interested in the richest gold camp beneath the sun.

WE HAVE A LEASE ON A PART OF THE MINE THAT IS CREATING ALL THIS EXCITEMENT.

Our development has brought us almost to the level of this amazingly productive rock, and any blast in our shaft may land us in the midst of ore that will lead us right to treasure the equal of any found so far in Goldfield. The Florence Annex, mining this \$1,016.40 ore, is RIGHT UP AGAINST US to the southwest and the Rogers lease is only 400 feet to the south and a trifle west of us. Before we bought this lease Mr. Bolen had spent \$20,000 in its development and left us \$5,000 worth of machinery which belonged to the lease. The panic and the strike completely strapped him and he was driven to the wall. It was this condition that forced him to sell and enables us to step into his shoes and carry on development from where he had left off. Our shaft is down 260 feet and we have more than 100 feet of crosscut, AND WE FEEL JUST AS CONFIDENT AS THAT BLOOD COURSES THROUGH OUR VEINS THAT THIS LEASE OF OURS WILL PRODUCE JUST AS RICHLY AS THE FLORENCE ANNEX, THE ROGERS LEASE, the Little Florence or any other mine in the camp. These producers crowd us from the south and east and west and EVERY MINERAL INDICATION leads to the belief that EACH OF THOSE ENORMOUSLY RICH CHUTES PENETRATE OUR PROPERTY.

WE ALSO OWN OUTRIGHT 100 ACRES LITTLE MORE THAN A MILE NORTH OF THE CITY OF GOLDFIELD

and but a few minutes' walk north of the Sandstorm, where gold in the camp was first discovered. There are five claims in this tract, located by a Mr. Anderson, a miner, who never intended to sell them, but the strike starved him into parting with

his holdings. He was a member of the striking union and not permitted to work, and having a family to support was driven into letting his property go. But he retained several thousand shares, and so will not be so greatly injured if we develop that property into what we most sincerely believe it is bound to be. This ground is hemmed in on three sides by mines of splendid productiveness, actively getting into the Mohawk and Florence class, and no one ever will make us believe that we are in the midst of gold and have none ourselves. Our Mr. Stewart, president of this company, is a mining engineer of 20 years' almost constant experience, and before buying the ground from Mr. Anderson gave the claims the most careful investigation. At the beginning it was his private purse that procured this property and at the time he did not know where the means were to come from that would pay for the development. But he knows now. His Portland friends have settled that question. Shares of this company are being sold right and left, not only in Portland, but throughout the coast, so that the development of our claims is assured beyond all peradventure.

Our Shares Are Selling Now at 10c Each, 10 Per Cent Down and 10 Per Cent a Month

We make no promise of maintaining these prices for any definite time. The blast that uncovers our high grade ore will be the signal for the telegraph to apprise us of that good fortune, and that moment up will go our stock, if it is not entirely withdrawn.

WE ARE GIVING THE PEOPLE OF THIS REGION AN OPPORTUNITY TO GET IN ON A GOLD PROPOSITION THAT WE HONESTLY BELIEVE WILL REWARD EACH INVESTOR MORE THAN A THOUSAND FOLD.

This thing is being done in Goldfield every month. Tom Lockhart went to Tonopah a prospector five years ago. He owns the Goldfield Florence and is rated at \$10,000,000 now. Hundreds and thousands have been lifted from penury by the Goldfield mines. The Florence and its leases alone have produced \$4,517,000, and other mines have done well nigh as well. The fame of the Mohawk has spread throughout the world, and was the richest mine in it until the Florence won the title, and still it is one of the wondrous treasure cells of the earth.

\$100 INVESTED WITH US TODAY, CASH OR TIME, MAY BE THE NUCLEUS OF AN IMMENSE FORTUNE WITHIN THREE OR FOUR YEARS.

We have opened the doors to all readers of The Journal. It will be their own fault if they do not embrace this THE MOST STUPENDOUS MONEY-MAKING OPPORTUNITY they ever will have presented to them.

Shares 10c Each — 10% Down, 10% Per Month — Fully Paid, Non-Assessable

WE COULD NOT GET IT NOW.
"It is an ill wind that blows nobody good," are the words of an old saw. The panic that crippled Mr. Bolen will likely make hundreds of Oregonians rich. He was forced to sell his Florence lease after he had spent \$30,000 in its development. We got it, metaphorically speaking, for a song. Had Mr. Bolen not negotiated the lease when he did, it could not have been had at all. No man living can get another lease on Florence property. No more will be made on any terms. That our lease will win out and win out big, we are confident there can be no doubt, and those who get in with us now will reap the harvest. And then there is our other 100 acres, too, which we own all ourselves. It belongs to this same company, and every share of stock covers both properties. But shares at 10 cents may be withdrawn at any time. Any blast of powder, in the present condition of development of our lease, may uncover high grade ore. The moment the telegraph speaks these words to us, that instant the sale of 10 cent stock is at an end.

THERE ARE MORE THINGS TO A MINE THAN HIGH ORE.
Rich ore is not all that constitutes a mine. High grade rock and profitable management is what exasperates many an owner of mining shares. The Portland-Florence Mining & Leasing company never will be accused of profligacy. No officer receives a penny for his services; each has invested all the money he possessed in the enterprise; it has no promotion stock, and each officer must pay the same for his shares that is paid by any other stockholder; its office rooms are as modest as those of the smallest real estate office in the city, its office stove, for example, cost only \$2.50, and yet it is not that it cost the people know about its extraordinary inducements as a money making venture, through the medium of the newspapers, its entire expenses would not amount to more than \$2 or \$3 per week. We would like to hear of any other mining company run as cheaply as this one. It already has paid \$4,517,000, and four of its leases are in its infancy. It likely will be \$10,000,000 before next Christmas. What ever our lease may contribute to the total will be square and honestly divided among our stockholders. We never will be accused of having spent a cent unwisely. The money paid into our hands is not ours. It belongs to the company, and every stockholder is partner in it. If this mining venture does not make our people rich, it will not be our fault. We will see to it that every dollar goes exactly where it belongs.

CAPTAIN THOMPSON AND WIFE HAD PASSED 67 YEARS OF MARRIED LIFE

Had Robert R. Thompson lived until March 30 he would have been married 67 years. He was 88 years old when he died in San Francisco last Tuesday and Mrs. Thompson, who survives him, is 85 years of age. They were married in Ohio, March 30, 1841. Ten children were born to the couple, eight of whom are living. There are 12 grandchildren and three great-grandchildren, the third was born February 26 and his name is R. R. Thompson Jr.
Mr. Thompson came to Oregon first in 1846 and settled near Vancouver. He engaged in the manufacture of furniture and became interested in mining. He then bought an interest in the Island Mills at Oregon City, which he operated together with General Lane, but finally sold his interest to Colonel John McCracken.
With the money derived from this deal he returned east and bought a flock of sheep which he drove from Ohio to Oregon. This trip was made in 1853. D. E. Thompson was hired by R. R. Thompson to help bring the sheep to Oregon. They were not relatives but both succeeded in making fortunes in the west.
Mr. Thompson was connected with the control of the Indians in Oregon and held a position of trust under the government for many years. While acting in this capacity he made his home at The Dalles.
The most prominent part he played in the development of the west, however, was his connection with the first steamboat line ever operated on the upper Columbia. The Colonel Wright was built and netted a fortune for its builders. The company had a government contract and carried freight from Celilo to Fort Walla Walla for \$100 a ton. In 1858 Thompson & Co. added the steamer line to the business.
Following the operation of this company came the organization of the Oregon Steam Navigation company in which corporation many prominent owners of Oregon were associated to financial advantage. This company was the first Oregon Railway Navigation company now owned and controlled by R. H. Harriman and is part

SOAKED "GARMENTS" DISTRESS ROSE DALY

Mysterious Contents of Trunk Ruined by Cloud Juice, She Says.
Rose Daly has begun suit against the Scott Hotel company for \$547.50, claiming this sum as damages for water-soaked wearing apparel that she left in a trunk stored in the basement of the hotel. The complaint does not reveal what the garments were—but they are women's apparel, and the rest is left to speculation.
The plaintiff states that she and her two trunks were received at the hotel in June, 1907. She remained for some time as a guest, and one of the trunks remained still longer in storage. She says she informed the hotel people of the valuable materials in the trunk, and she paid 25 cents per month additional for extra care for the trunk.
Notwithstanding this, she asserts, the trunk was put in the hotel basement and there it stood for four months, and when she again gazed upon its unmentioned contents her garments were ruined.

TWO MEN ALONE GIVEN THESE MEDALS

But two men have been honored by the National Geographic society by being presented with gold medals—Commander Peary and Captain Roald Amundsen, the discoverer of the magnetic pole.
The annual banquet of the Geographic society, at which Captain Amundsen was the guest of honor, was given in the Willard hotel and took upon itself the character of a personal ovation to the intrepid Norwegian explorer, such as has been seldom bestowed on a foreign scientist.
The vice-president of the United States, on behalf of the society, handed Captain Amundsen the large gold medal, made of \$250 worth of gold; especially engraved on one side and on the other showing an arctic map, with an emblem set at the point of the magnetic pole. The medal is the highest scientific distinction that can be awarded in the United States.
In presenting the medal Mr. Fairbanks said: "You, Captain, have helped the scientific world to gain a certainty where formerly there existed only a well-founded theory. During the last 400 years very many vain attempts have been made to navigate the North-west passage and many lives have been lost in these futile expeditions. Many renowned names are tied to the history of the Northwest passage, but to you alone belongs the honor of having achieved the goal for which all other courageous heroes fought but failed to reach.
Captain Amundsen set the medal to the University of Christiania, where the collection of his medals is in the property of the university."
Free Deafness Cure.
A remarkable offer made by one of the leading ear specialists in this country. Dr. Brantman offers to all applying at once two full months' medicine free to prove his ability to cure permanently Deafness, Head Noises, and Catarrh in every stage. Address Dr. G. M. Brantman, 1837 Walnut St., Kansas City, Mo.

FARNHAM BELIEVES IN RULE OF PEOPLE

Commercial Traveler Announces Candidacy for the Senate.
Walter C. Farnham has announced himself a candidate for the Democratic nomination at the primaries for state senator.
Mr. Farnham states that if he is nominated and elected, he will strive

for the enactment of laws having for their purpose public improvements and such laws as will safeguard the rights and interests of the majority of the people. He is out strong for Statehood No. 1 and popular government. He says he intends to put up a hustling campaign and expects strong Democratic backing. Mr. Farnham is a sterling Democrat and will energetically support the principles and platform of the Democratic party.
Mr. Farnham has been in business for some time in Portland as a broker and manufacturer's agent, and is at present engaged as a commercial traveler.

DECLARE COUNTY HAS ASSESSED OWN LAND

Alleging that the county has assessed its own property and is now attempting to make them pay the taxes, Morris Senosky and John C. Shillock have begun suit against Multnomah county and Sheriff Stevens to restrain the sheriff from selling the property. The land in question is described as lots 2 and 8 in block 116, East Portland. It formerly belonged to the estate of Henry Wilson, who died in 1826 without heirs, his property escheating to the state. Senosky and Shillock state that they purchased the lots at sheriff's sale on October 7 last.
County Assessor Sigler placed \$65.92 in taxes against the property in 1906 and \$78.81 more in 1907. It is stated that the county now threatens to sell the lots once more to pay these taxes, although the county owned them at the time the taxes were levied. The

MEN'S AILMENTS

Need the Early Attention of a Competent Specialist

There is nothing in the world more dangerous than neglect. Nothing else is responsible for so much suffering and disaster. Trace the cause of misfortune and you find that, somewhere, neglect has had a part. Neglect is more dangerous than disease. It is usually through neglect that little ailments come, and through neglect that they grow serious, undermine the constitution and reach an incurable stage. During my sixteen years' practice as a specialist in men's diseases I have not met with a single serious condition in which neglect was not in some degree responsible. There are warnings, but men do not heed them. A little lack of functional tone, an occasional dragging pain in the groin or other minor symptoms of disorder may occasion no concern. But when neglect has brought developments that threaten the general health, or even life itself, the case is one that absolutely demands what it should in its incipient stages have received—treatment by a competent specialist.

I have treated hundreds of men who had long suffered a gradual decline of physical and mental energy as a result of private ailments, and have been interested in noting the marked general improvement that follows a thorough cure of the chief disorder. My success in curing difficult cases of long standing has made me the foremost specialist treating men's diseases. This success is due to several things. It is due to the study I have given my specialty; to my having ascertained the exact nature of men's ailments, and to the original, distinctive and thoroughly scientific methods of treatment I employ.
To those in doubt as to their true condition who wish to avoid the serious results that may follow neglect, I offer free consultation and advice, either at my office or through correspondence. If your case is one of the few that has reached an incurable stage, I will not accept it for treatment, nor will I urge my services on any man. I treat curable cases only, and cure all cases I treat.

- Weakness**
You've probably been treated for so-called weakness and helped temporarily or not at all, and the reason is very apparent when cause of loss of power in men is understood. Weakness is merely a symptom of chronic inflammation of the prostate gland, which my treatment removes, thereby per manently restoring strength and vigor.
- Specific Blood Poison**
No dangerous minerals drive the virus to the interior, but harmless, blood-cleansing remedies that remove the last poisonous taint.
- Varicocele**
Absolutely painless treatment that cures completely in one week. Investigate my method. It is the only thoroughly scientific treatment for this disease being employed.
- Free**
My colored chart, showing the male anatomy and affording an interesting study in men's diseases, will be given free upon application.
- Contracted Disorders**
You can depend upon a quick and thorough cure by my treatment. A quick cure is desirable. The slow cure is apt to be no cure at all and a chronic development will follow long-standing and in half the usual time required.
- Stricture**
I cure stricture without cutting or dilating. The treatment I employ is original with me, and has been perfected to a degree that renders a cure an absolute certainty. All obstructing tissues are removed by a process of absorption. Membranes affected are thoroughly cleansed and restored to a healthy state.
- Reflex Ailments**
Often the condition appearing to be the chief disorder is only a reflex ailment resulting from some other disease. Weakness sometimes comes from varicocele or stricture, and bone diseases result from blood poison taint, and physical and mental decline follow long-standing functional disorder. My long experience in treating men enables me to determine the exact conditions that exist and to treat accordingly, thus removing every damaging cause and its effects.

MY FEES ARE THE LOWEST; YOU CAN PAY WHEN CURED
Consultation and Advice Free. OFFICE HOURS: 9 A. M. to 9 P. M., Sundays 10 A. M. to 1 P. M.

THE DR. TAYLOR CO.

COLORADO GAME BIRD.

Mountain Forests Will Be Stocked
With Capercaillie From Sweden.
From the Denver Post.
Two strange birds arrived all the way from Sweden. Now they are domiciled in the city park. If the plans of their owner, W. F. Kendrick, succeed they will be the progenitors of a new race of birds in the Colorado mountains.
They are the capercaillie, pronounced cap-er-sel, and are the size of a small turkey. In habits they are much like grouse and ptarmigan. They thrive best at timber line and subsist on pine, spruce and hemlock boughs and mountain berries.
Mr. Kendrick, who is tremendously interested in birds and animals, has had an ambition for some time to start the breeding of these birds in Colorado because of their rarity and beauty. He has already bred and liberated thousands of pheasants, but the capercaillie were hard to get. For months he has had a commission in Sweden for two perfect birds. As the result of this order the two arrived Saturday.
The capercaillie is almost as large as and similar in habits to the American wild turkey, with the advantage that it can endure much more severe hardships and cold weather and will live on food such as is obtainable from the treetops, if necessary, when the ground is deeply covered with snow.
Mr. Kendrick will keep the birds at the park until they breed, his plan being to take the young to the most suitable places in the mountains and liberate them.
Arrangements are practically complete for the People's party national convention, which is to assemble in St. Louis April 2. The Olympic theatre, one of the largest in the city, has been secured for the sessions. The Missouri state convention of Populists will be held in St. Louis on the day prior to the national convention.
