A Bold Step.

To overcome the well-grounded and reasonable objections of the more intelligent to the use of secret, m.dicinal compounds, Dr. R. V. Pierce, of Buffalo, N. Y., some time ago, decided to make a bold departure from the usual course pursued by the makers of put-up medicines for domestic use, and so has published broadcast and openly to the whole world, a full and compate list of all the ingredients entering into the composition of his widely celebrated medicines. Thus he has taken his numerods patrons and patients into his full confidence. Thus too he has removed his medicines from among secret mostrams of doubtful merits, and made them ficenedics of Known Composition.

By this bold step Dr. Pierce has shown that his formulas are of such excellence that he is not alraid to subject them to the fullest scrutiny.

Not only does the wrapper of every bottle of Dr. Pierce's Golden Medical Discovery, the famous medicine for weak stomach, torpid liver or billousness and all catarrhal diseases wherever located, have printed upon it, en plate Emplish, a full and complete list of all the ingredients composing it, but a small book has been compiled from numerous standard medical works, of all the different schools of practice, containing very numerous extracts from the writings of leading

book has been compiled from numerous standard medical works, of all the different schools of practice, containing very numerous extracts from the writings of leading practitioners of medicine, endorsing in the strongest possible terms, each and every ingredient contained in Dr. Pierce's medicines. One of these little books will be mailed free to any one sending address on postal card or by letter, to Dr. R. V. Pierce, Buffalo, N. Y., and requesting the same. From this little book it will be learned that Dr. Pierce's medicines contain no alcohol, narcotics, mineral agents or other poisonous or injurious agents and that they are made from native, medicinal roots of great value; also that some of the most valuable ingredients contained in Dr. Pierce's Favorite Prescription for weak, nervous, over-worked, "run-down," nervous and debilitated women, were employed, long years ago, by the Indians for similar aliments affecting their squaws. In fact, one of the most valuable medicinal plants entering into the composition of Dr. Pierce's Favorite Prescription was known to the Indians, as "Squaw-Weed." Our knowledge of the best of not a few of our most valuable native, medicinal plants was gained from the Indians. As made up by improved and exact processes, the "Favorite Prescription" is a most efficient remedy for regulating all the womanly functions, correcting displacements, as prolapsus, anteversion and retorversion, overcoming painful periods, toning up the perves and bringing about a perfect state of health. "Impossible" you say, but the game is on and the Labor-Socialists are right now actively at work before congress and the various state legislatures, and will establish these laws quickly unless

stopped.

Their plan is based on one principle. If any man has worked and been economical and self-denying and has bought a home, take it away and divide up the proceeds among those who are unthrifty, drinking, profligate or simply "failures."

The members of the "Other Class" think thoughts of work, sturdy, well-directed, intelligent work; work which brings good pay, because it is good service to mankind. "class."

Let's first consider the "Employers' Liability" movement. They have adroitly sought to have it apply first to Railways for it is now popular to attack them. Any employe hurt, even by his own negligence, is to be paid a sum to be extracted from the stockholders. There are over 77,000 stockholders in one American Railway. Many are widows and in some cases their hard carned money and savings invested thus, is

gifts to others.

Then it is the plan to extend this forced benevolence to the individual employer, just as the Labor-Socialista have succeeded in doing in England. It is an active working law there now in operation under which, if, for instance, a house servant has an accident no matter, whether about the house or elsecasually reads of these bills they look harmless enough.

Some will only wake up when, under the new laws, (if the Labor-Socialists succeed in having the bills passed) they find their property and savings coze away and the courts powerless to prevent.

This is a contest between the unthrifty "class" trying to wrest money, property and power from the Home-Owning "class."

Now let the reader sort out the different characters in society and as they are defined, locate each man in one or the other of these "classes." One class earns and saves and the other seeks to take what it doesn't earn.

The discontented, surly and botch the casually reads of these bills they look succeeded in doing in England. It is an active working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law there now in operation under which, if, for instance, a cle they working law ther

should have help; that is human benev-olence. Every permanently injured poor man should have a public home to live in free, all the balance of his days: he has, we will say, done his share of the work of the world and is entitled to its care. The law should provide that he had, during his well days, contributed his share, small or great, toward the support of such homes. That is the German law. In other words, every man. Labor-Socialist and home-owner should contribute for this pension. contribute for this pension.

But the Labor-Socialist plans to take only the money of one class, the thrifty, and give it to the unthrifty.

That would be a fine levied on the That would be a fine levied on the man for being thrifty and offer a reward of immunity to the man who would "drink up" his extra money. It says, "don't own a home or you will become a member of a class which we propose to milk."

ward of immunity to the man who would "drink up" his extra money. It says, "don't own a home or you will become a member of a class which we propose to milk."

Later on we are to have "Old Age Pensions" for every man when he reaches say 60 years.

That law is under consideration in England now. The plan is a noble one, for it would remove that awful ghost of fear which haunts most people. Every man should pay a small tax toward this desirable benevolence. But notice, when the Labor-Socialist leaders in England were asked if the members of

England were asked if the members of their class would contribute, the answer-was, "Not one farthing." was, "Not one farthing."

They propose to secure the entire sum from the home-owner "class."

Back again to their principle, you

see.

It seems benevolent to yote large sums for public work for the "unemployed." That class is made up largely of Labor-Socialists and incapable, botch workmen. The worthy, workmen are seldom "unemployed." Many of these "unemployed" are the noisy chaps who called strikes during the prosperous years. They wouldn't work themselves and kept thousands of good men from work.

wards the support of public works and charities.

The Labor-Socialists are opposed and their measures are right now being pressed with great strength to make them into laws.

The intent underlying each one of them is to directly, or in a round-about way, take money and property from the "Mome-Owners."

Now let's have a look and in considering each bill or act, keep in mind the underlying plan.

"Extract from the thrifty and homeowning people at least a part of their savings, to be divided among the untriffty Labor-Socialists."

You may have to search step by step through the apparently harmless part of these follow the steps and it will be seen that the Labor-Socialists have time and again stopped up the source of this flow of money and have entailed on the control of the surface and the chief causes of the panic and present the chief causes of the panic and present the chief causes of the panic and present the chief causes of the chief causes of the panic and present the chief causes of the again stopped up the source of this flow of money and have entailed on this country millions upon millions of dellars in losses and consequently, much

misery upon work people The labor leaders have brought strikes to force all employes to kick out independent American workmen and employ only "union" men, thus to give absolute power to the leaders, secure fees to pay their own salaries first and, in order to keep their slaves interested, force higher and higher wages. Here we reach the foundation fact again.

money and savings invested thus, is the main source of their bread and butter. But a part at least is to be taken from them to be given to the unfortunate "Unthrifty."

That would be benevolence if it was not a legal robbery of some to make gifts to others. extra money toward a public fund to be used to pay the "class" of unem-ployed Labor-Socialists?

Here the line between classes is clearly drawn and you get back again to the same old spot, "Take from one class and give to the other." "Make the consumer pay extra money and give it to the Labor-Socialists."

"Charge the home-owner extra wages for all labor which enters into the building of his home." "He has been saving, now let's take away part of it." High wage for skillful work is desirable for all, but when a Labor Union gains power enough to force home-owners to pay two, three or four times what hod-carriers and other workmen are actually worth it means just so much extra money extracted from the home-owner more than the service is

home-owner more than the service is worth.
It comes back to the same old place, you see. Look at the purpose of all the anti-injuction bills introduced by the Labor-Socialists. Each and every one seeks to tie the hands of the people's courts, and for what purpose? No injunction issued in labor strikes ever harmed an honest citizen, intending to rescentily purpose his accountation. peacefully pursue his occupation.

Injunctions stop mobs, intent on insuiting, assaulting and perhaps murdering other citizens, from congregating. The Labor-Socialist raises a loud cry because he is commanded by a court to keep off the public street near a factory employing independent men.

Therefore, in order to secure submission and power to extract from the employer extra money, they contend the injunction must be done away with. Every public man who supports any measure seeking to reduce the power of the courts in order to make it more difficult for them to protect property and the person of the common citizen is, an enemy of Home-Owners and an ally of the Labor-Socialists. owners and the people find it out as they will, the cowardly official is generally defeated at the next election, for the Liberty-loving, peaceable Home-Owning class of Americans heavily outnumber the Labor-Socialists, and these Home-Owners are the principal waders. Home-Owners are the principal readers and supporters of the newspapers.

and supporters of the newspapers.

The law-defiers are organized and able to present organized labor against heretofore, an unorganized public. Now, however, the Home-Owners have effected an organization known as the Citizens Industrial Association of America with a central body in New York and local bodies in many towns and cities. Competent lawyers are employed to watch the vicious measures introduced in congress and the legislatures and defend the rights of the common Citizens from these insidious attacks and to prevent the enactment of laws which rob one class, the Homeaws which rob one class, the Home-Owners, and pass over to the Labor-So-callsts money and property which they do not earn, and property which they do not earn, and power which would enable them to enslave the common people and force them to "obey." All of this work requires money for legitimate expenses. Every reader who feels a desire to help in this organized work of protection can forward to the National Citizens Industrial Association of the common can be applied to the contract of the common can be applied to the contract of the common can be applied to the contract of the common can be applied to the contract of the contra National Citizens industrial Associa-tion, St. James building, New York, such contributions as he decides upon, from \$1.00 to \$500.00. The work is now be-ing carried on and with gratifying re-sults. It can be widely extended and more certain protection insured by em-ploying a larger force of active workers. The Labor-Socialists contribute liberally for the support of their organization and the common Home-Owners are but just now beginning to learn that they are in danger of most serious consequences unless a determined organized stand is made and the work of protection carried on intelligently, skillfully

This is a clearly-drawn contest be-tween the Common citizens and Home-Owners seeking protection and the La-bor Trust seeking to obtain control of affairs and take money and property from the Home-Owners.

The strongest organization will win and if the Home-Owners fail to stand together they will certainly lose at least a part of their properties and more or less personal liberty. There are communities now where organized labor has rained control and every man must gained control and every man must "bow" and contribute and implicitly "obey," quit work when told, patronize those whom the labor leaders designate, and in various ways act the slave It has gone so far that juries fear to convict known murderers and whole communities are termorized. U. S. Judge Wm. H. Hunt of Butte, Montana, was brave enough to say:

"God gave man his hands, his back "God gave man his hands, his back and the right to use them as he pleases. It is an inalienable right. No power can take it away from a man, No power can compel him to work. No power can compel him to stop working if he desires to work. When a man, or any set of men, take it upon themseives to say that they are the law, and to defy the process of the courts, to defy the police authority of the land, to usurp the authority of the established government, to upset the very base of society in which we all live, there is a power which will come to the rescue of the man who is wronged in that way; and that power is that which protects you

of the Labor-Socialists. Watch such public men—particularly those who want to revise the criminal code injunction laws. They want to make it easier for mobs to do damage and escape punishment. Their names will be printed, broadcast, later on so that the people may know.
