It is, though; and for the very same reason. It is pure soap; and nothing else. Ivory Soap 99 44/100 Per Cent. Pure.

"New Process" Gas Ranges

We have just received a carload of these efficient and economical gas ranges, embracing every style for which there is a demand. Nothing can equal the "New Process" for quick work and ease of operation. The linings and bottoms of these stoves are open, so that the heat comes in direct contact with the article to be cooked or baked. This is a great advantage and

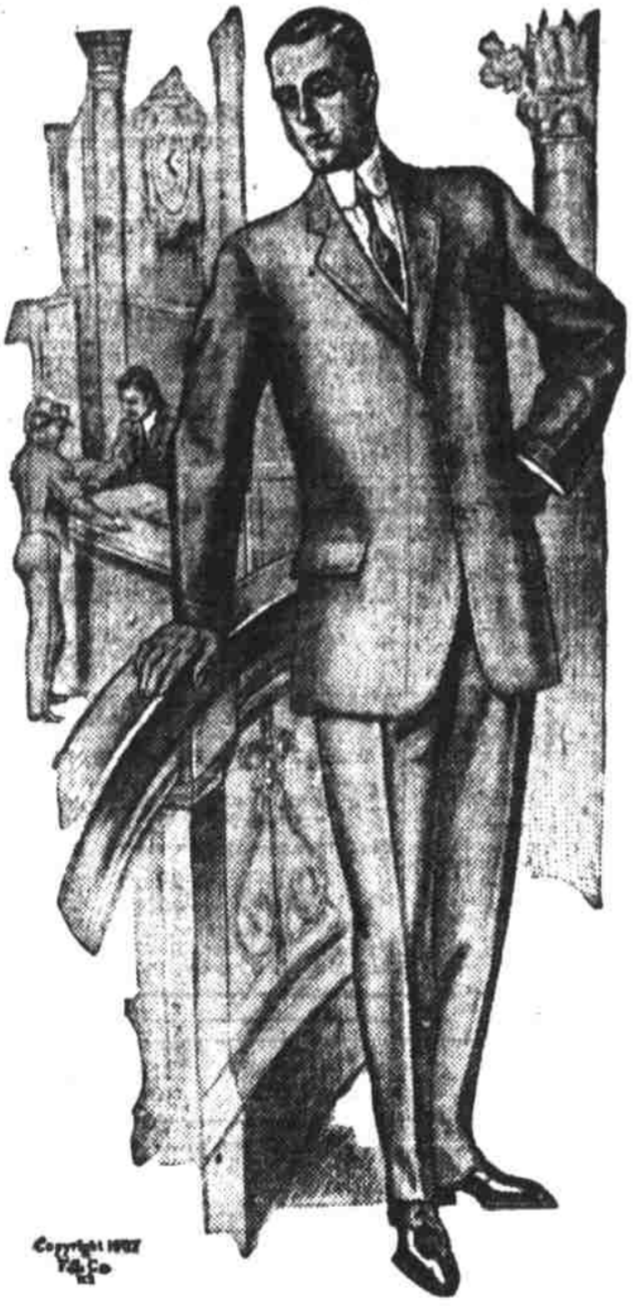

means a wonderful saving, as it is not necessary to heat the oven from 10 to 12 minutes, or longer, as on many ranges, before putting the baking in, but immediately after the burner is lighted the work in the "New Process" oven can be proceeded with without a moment's delay. An examination of the oven burner in these ranges and the construction of the oven interior will conclusively demonstrate the remarkable saving in operation on this new type of stove. We show these ranges in several styles and sizes—from \$14.00 up. Prices include installing and connecting where gas stubs project.
