

BOB IS THE ONLY DOG THAT GOT A VALENTINE

the dog waits patiently about till Nelson does appear. Nelson was a carrier for The Journal last year when he was in school, but is now working at Honeyman's hardware store. About The Journal office the dog Bob was a favorite and he knew everyone and was a pet. When he jumped last Fourth of July into the midst of an exploding bunch of crackers and foundered about joyously thinking the demolition was all his doing, his friends, the carriers and newsboys, screamed with delight. His master lives at 422 1/2 East Burnside, near the North Central school, and he makes a daily visit there to see his children and everywhere has them as his admirers. One little girl was so fond of Bob that she sent him a valentine addressed in all formality and grandeur in his own name. When Nelson was a carrier Bob was known all along the route and could be hired to go over the route of his master and leave the papers.

Mary had a little lamb, whose fleece was white as snow; And everywhere that Mary went The lamb was sure to go. The old story has been transplanted into the present real life. But "Mary" is Nelson Bartholemew, the lamb is a little dog, the high school is the place where the dog followed him, and Principal T. T. Davis is the teacher who turned it out because it made the children laugh and play. And the master's haunts along the street, including Coffey's candy store, are the places where

Tomorrow we offer you a rare opportunity to buy a stylish, up-to-date Spring Suit at a saving of \$4.00 to \$5.00. It's an inducement worth considering.

DRIFTERS' CLUB SO WELL PLEASED EXPECT TO DRIFT BACK AGAIN

Members of the Drifters' club of Portland who were entertained by the citizens of Medford two weeks ago are still talking of the trip and several of them will probably join the business men's and merchants' excursion to the Rogue River valley which leaves Portland April 24 by special train. H. C. Bowers, of the Hotel Portland, president of the Drifters' organization, says the treatment afforded them by the Medford citizens was excellent. The Drifters were met at the passenger station and taken in automobiles through the various orchards and other places of interest in the Rogue River country. Later they were guests at a meeting of the Commercial club.

invited to go on the excursion by the Medford commercial club which takes in automobiles to Ashland and through the southern end of the valley. The special will leave Portland on the evening of Friday, April 24, arriving at Medford the next morning. Returning from Ashland the excursionists will be entertained at luncheon at Medford and in the afternoon will be taken to the north end of the valley. Returning the party will visit Jacksonville and the various orchards and places of interest which will be in full bloom at that time. The invitation of the Medford people to the citizens of Portland to visit that part of the state was extended through the Commercial club of Portland, and several hundred business men and merchants are arranging to make the trip.

GOOD AND BAD STAND SIDE BY SIDE AND EACH PROSPER

The world is evenly balanced in nearly all things including the good and the bad. When you see a suggestion of badness you generally also see something suggesting goodness. As an illustration of this fact there is a Bible house and a slot machine shop doing business side by side on Salmon street, between Fourth and Fifth streets.

The machines are old and rusty and dilapidated and have simply been put away to await developments or to be sold eventually and transferred to some other part of the country. Then they will be adorned with signs which will tell of the wonderful winnings possible. But nothing will be said of what one is liable to lose. Next door is the Bible establishment where a different kind of people come in to get good things. They are not noting about the intricate slot machine—and some of whom were instrumental, perhaps, in having the slot machine law passed.

NEW BOAT WILL HAUL LEAD ORE

Materials Bought in Portland to Build Vessel for Pend d'Oreille.

Navigation of the Pend d'Oreille river canyon, so long under consideration by transportation men with a view to the building up of an ore carrying trade between the Metairie lead district and Newport, is at last to be accomplished by the Metairie Navigation company. Captain A. S. Lanneau of Metairie is purchasing in Portland the materials for construction of the first steamer and is placing orders by wire with eastern manufacturers for the necessary powerful machinery with which the boat will be equipped. The Metairie Navigation company is capitalized at \$50,000, and is the first corporation to seriously enter the ore carrying trade in the Metairie district. The first boat will be named Ruth in honor of Captain Lanneau's young daughter. It will have a cargo capacity of 10 tons, and will register at 140 tons. Its dimensions will be 11 feet length, 24-foot beam, and it will have a hold depth of four feet nine inches. The shaft and machinery will be of the best, but so powerful will be the machinery that the steamer is expected to navigate the swift Pend d'Oreille canyon with ease on the Tana and to make at least three round trips between Metairie mines and Newport, where a rail connection with the Sand Point smelter is obtained.

18 MONTHS FOR ROBBERY SAFE

G. H. Black Sentenced to Penitentiary for Tapping Employer's Cash Box.

"I was drinking the night I stole the money. I have lived here three years and never got into trouble before. I told all about it when I was arrested." This was the simple statement made by G. H. Black when he was brought before Judge C. and in the circuit court yesterday afternoon for sentence. He had tapped the cash register and the safe in an establishment where he formerly worked, securing about \$88. He was sentenced to serve 18 months in the penitentiary. John McNuttson, the Swedish youth who was captured by County Clerk Fields one night not long ago as he was acting as a fence, was sentenced to an effort to escape, pleaded guilty to the charge of burglary, and was given the minimum sentence for that crime. He was accused by Hollander of having led him into the job, in which they took a quantity of clothing from a freight car. The case was continued for one week for further investigation. Five men will be taken from the county jail to the penitentiary tomorrow. The treasurer of the company is H. H. Hoyt, purchasing agent at Spokane for Selms & Shields, general contractor on the construction of the north bank road. The steamer is being designed by Captain Depeu, who is in Portland as a consultant and electrical engineer and is building the steamer at the Perkins hotel last night, said. "The first boat built will be of the very highest class and capable of doing the work out for it. The designer, Captain Depeu, is one of the best mechanical engineers and an experienced navigator. For seven years he operated steamers on the Yukon, and for the last three years he has been running boats on the Tana. I have known him many years, and in 1891 was associated with him in navigation on the Kootenai and on Flathead lake, where we carried thousands of tons for the construction of the Great Northern railroad. The Ruth will be equipped with electric lights, hydraulic steering gear, the same as the gear on the steamer J. N. Neal, and will carry a cargo and a loaded barge through the canyon. "We regard the Metairie district as having immense producing possibilities. There is a world of ore sighted, I am afraid how much—but enough to keep the concentrators running many years. We expect to have the first boat running by June 15." Captain Lanneau is postmaster and owner of the principal merchandise store at Metairie. He is a pioneer in that country and has made a study of navigation on the Pend d'Oreille.

ASSERTS SHE IS NOT DERANGED

Mrs. Wirt Asks Court to Depose Administrator of Husband's Estate.

Asserting that A. B. Manley has obtained letters of administration on the estate of Umer H. Wirt by representing that she was insane, when in fact she is sane, Mrs. Sarah A. Wirt, the widow, has asked the county court to revoke the appointment and to name her to look after the estate. Manley was appointed March 4 in the regular way, after filing a petition stating that Mrs. Wirt was unable to act because she was deranged in mind. Manley went further and asked that he be appointed guardian for the widow, but when his petition came up for hearing before Judge Webster a few days ago it was dismissed on request of Manley's attorney. Mrs. Wirt asks that Manley be cited to appear and show cause why he should not be removed as administrator. She says that after the sudden death of her husband she was temporarily stunned by grief, but that she has since fully recovered and is qualified to act in the settlement of the estate. She says she did not consent to waive any of her rights and that 30 days have not yet expired since the death of her husband, that being the time allowed by law in which the widow may claim letters on an estate left by her husband. She further states that Manley should have given a bond of \$5,000, but has supplied one for only \$2,500. The Wirt estate is estimated to be worth \$5,000, of which \$4,000 is in real estate. The heirs are the widow and her two minor daughters, Elizabeth and Heloise Wirt.

FREE TREATMENTS ON PROF. RICKARD'S ELECTRO RADIATOR

YOU CAN BE CURED

If you have been sick and discouraged, tried everything and still suffering, come and take a free treatment on the Radiator. It will give you immediate relief. Hundreds are well and happy today through its use. If you have rheumatism, or any chronic or nervous diseases, the Radiator is a home remedy. Call or write for particulars. The Radiator is a dry electric heat apparatus, where the patients can treat themselves if they have no one to assist them, and there is nothing more soothing or quieting to the nerves than half an hour spent in bed or couch with the Radiator. It gives no shock, but instead gives a pleasurable thrill that fills the body with new life and vitality. It establishes a perfect circulation and imparts an electric heat evenly distributed. Professor Rickard gives a free treatment in order to prove the merits of the Radiator, as seeing is believing. We ask you to come and try it. 555 FIFTH STREET, CORNER OF LINCOLN

PREPARING FOR FUEL FAMINE

Operators Ship Three Million Bushels of Coal to Chicago.

(United Press Leased Wire.) Chicago, March 21.—Three million bushels of coal are stored in railroad yards and other places in the vicinity of Chicago in preparation against the possibility of a strike by the coal miners. The operators have in mind the seizure by citizens of supplies of coal on railroad tracks during the last big strike, and are taking time by the forelock by daily bringing in trainloads of fuel. They are putting the coal in protected districts, where they can guard it against the thieves and confiscators, who constantly annoy them, and at places easy of access to trains, in case it is to be hastily removed. Every big dealer in Chicago has laid in a supply limited only by the capacity of his bins. If the miners fail to sign a satisfactory agreement, they will have the disadvantage of trying to win when the roads and dealers are plentifully supplied and fully prepared for a long siege. The advantage gained by the agreement of Indiana operators to enter into a contract with the miners will be more than offset, the dealers claim, by the large stores of supplies on hand.

MCCOURT HERE TO TAKE OFFICE

Newly Appointed United States District Attorney Arrives in Portland.

(Special Dispatch to The Journal.) Pendleton, Or., March 21.—John W. McCourt, who has just been appointed United States district attorney, left this afternoon with his family for Portland, after receiving a message from Washington directing him to qualify at once, as his commission had been forwarded. Mr. McCourt, who arrived at 11:30 o'clock last night, will take the oath of office before Judge Wolverton in the federal court tomorrow morning at 10 o'clock. He will at once take charge of the office and its work. It is presumed that Deputies Tucker and Evans, recently appointed by W. C. Bristol, will remain in office until Mr. McCourt has had time to become familiar with the routine of his office. Mr. Tucker, who has had charge of the grand jury investigations up to this time, will probably continue in this work. Mr. McCourt reached Portland on the delayed O. R. & N. train last night and is staying temporarily at the Imperial. In answering advertisements herein, please mention The Journal.

BOOSTS CANNON FOR PRESIDENT

Congressman Boutelle Declares Uncle Joe Should Take Teddy's Place.

(Heard News by Longest Leased Wire.) New York, March 21.—Representative Henry Sherman Boutelle of Illinois, chairman of the Lilley submarine investigation committee put in a lick for the presidential boom of Speaker Cannon at the Beta Theta Pi banquet last night. The banquet was held at the Hotel Astor and Congressman Boutelle, Senators Brown of Nebraska and Borah of Idaho were the principal speakers. Speaking to the toast, "The Ship of State," Mr. Boutelle declared that the president and the speaker are the two biggest figures in the country today and between them have put through most of the epoch-making legislation of the Roosevelt regime. Then he said: "In carrying on in the future the policies of this administration, Mr. Cannon, as president, would simply be finishing the work which he has been engaged in during the recent panic. Mr. Boutelle offered a vigorous defense of the president's Panama canal bond sale during the recent panic. "The president wisely determined to restore confidence by offering bonds and bringing hoarded money out of its hiding place. His plan was as successful as it was bold. A more timid man than Roosevelt would not have taken the risk of possibly adding \$150,000,000 to the national debt in time of peace, but he wisely conjectured purchases of a much less amount would steady the situation. In this financial crisis he displayed the rarest gift of the highest order of statesmanship."

DAVIDOR FAILS TO PUT UP CASH

Promoter of St. Johns Gas Plant Likely to Lose His Franchise.

S. V. Davidor, president of the St. Johns Gas Heating and Lighting company, did not deposit the \$6,000 cash to insure the building of the gas plant, as it is understood in St. Johns should have been done yesterday. According to Mr. Davidor his franchise is not forfeited because of the failure to make this cash deposit and he maintains that the \$10,000 surety bond filed some time ago is all that is required of him. It has been understood in St. Johns that the \$10,000 bond was not permanent, but that it was to be substituted March 21 by a deposit of \$5,000 cash. However, Mr. Davidor does not understand his obligations to be the same as the city council at St. Johns understood. The matter will be taken up and thoroughly thrashed out at the meeting of the council Tuesday evening. The city officials in St. Johns are beginning to feel some apprehension regarding the value of the original surety bond. Further meetings were felt Friday when H. J. Meagher, who went on the bond, asked City Attorney Green of St. Johns to be released from his liability on the bond. Attached to the bond is an affidavit in which S. V. Davidor and H. J. Meagher each swear that they are worth \$20,000 over and above all their debts and other liabilities. "Whether the city council of St. Johns will take the stand that the bond is forfeited remains to be seen. It is likely that litigation will follow in any event. The city government has been very careful in guarding its rights and the officials have felt confident that the city's interests were especially safeguarded in this particular franchise. Mr. Davidor again gives assurance that the work of building the plant, or at least laying the mains, will be started at once. The constructing department is waiting for the arrival of materials, he says, when work will go ahead with the St. Johns plant."

WOMEN TO LOOK AFTER HOME'S NEEDS

At the meeting of the Juvenile Improvement association at the courthouse last night it was voted to authorize President H. M. Esterly to appoint a committee of three women members to investigate the needs of the new detention home in the matter of furniture and to appear before the county court and ask for liberal treatment. Superintendent Nisley has estimated that \$1,700 will be needed.

Superintendent Gardner of the Boys' and Girls' Aid society was to have read a paper on "Child Placing," but the business session was longer than usual and his paper was made a special order for next meeting. Mr. Gardner made a plea for monthly conferences of benevolent workers as a means for doing away with petty jealousies and greater efficiency by cooperation.

VOTERS GET LAZY; REGISTRATION LAGS

Saturday Only 358 Fixed Signatures to County Clerk's Books.

There was a woeful fall in the number of voters who appeared at the office of the county clerk to register during the week just closed. Yesterday, for instance, 358 had entered their names at 6 o'clock last evening, when the total should have been 500. With yesterday's figures added, the total to date is 22,881, with just 13 days left in which to register. Men employed in the lumber mills and factory employments have been backward in registering, although the office of the county clerk is open nightly until 8 o'clock for the accommodation of those who cannot come at ordinary hours. Employers generally are requested to call the attention of their workmen to the importance of voting at the primaries and to give evidence of their own interest by allowing their names enough time off to visit the courthouse in daylight hours. Ten thousand more men should register before the books are closed, and the voter who fails to get promptly is sure to be caught in the rush of the last-minute crowd—those who always put off until tomorrow what they might do today. That means delay and inconvenience, which may be saved in large part if the unregistered will file in large numbers during the next few days. As the figures stand politically, the Republicans have 13,030, the Democrats 8,813, and all others 1,124. Horsemen of northern Lake are becoming more and more interested in the breeding of their stock up to a higher standard, says the Silver Lake Central Oregonian.

Do You Ever Think? DRESS WELL

Did you ever note that some men always look as if they had a new suit of clothes and you wondered at the same time how it was you looked so shabby? Take it from us—the man that always looks well dressed has his clothes tailor made. He gets fit, style and material, and it costs him no more than it costs you. Come tomorrow and we'll talk it over. No trouble to show goods or quote prices. That's what we're here for. YOUR ESPECIAL ATTENTION IS DIRECTED TO OUR WINDOW DISPLAY SPRING SUITS \$25 TO \$50 J. C. SHAEFER & CO.
