All Morrison Bridge Cars Pass Our Store

BELIEVE SUBWAY PLAN FEASIBLE

Traffic on Bridges Constantly Growing More Difficult to Handle.

P. E. Sullivan is investigating the feasibility of constructing tubes beneath the river for the streetcar traffic. In an interview this morning Mr. Sullivan said he believed the cost would not be a barrier but that the only point on which he was doubtful was the distance back from the river on each side the tubes could be brought to the surface. "I understand that the depth of the river at the Madison street bridge is 45 feet in the deepest place," said Mr. Sullivan. "Now, in all probability the base of the tubes would have to be at least 25 feet below this point. A satisfactory grade would have to be found that would bring these cars from the tubes to the surface so that when they emerged they would not be too far out of town. "It is peculiar that it has been a difficult proposition to find anything authentic on the construction of tubes. I have searched the public library but as yet have found nothing. This lack of information is due perhaps because many of the tunnel projects in this country have been corporation enterprises and not municipal or public projects. It seems to me, however, that the city engineer could give information on this point—whether the construction of the tubes could be brought to the surface sufficiently near the river to make it practicable to build the tunnels in Portland. "There is no doubt in my mind but that there will have to be tubes placed beneath the Willamette river within a few years. The east side is surely the residence district of this city and as the city grows larger both sides will become more important and support larger populations. These tubes would be a great advertising feature for Portland and might well be an illustrative of Portland enterprise and spirit." Sullivan will continue his investigations and if it is found more practicable and satisfactory to construct tunnels than to erect high bridges, Mr. Sullivan intends to agitate the subject until it is adopted by the city.

CHILDREN WILL BE PARADE FEATURE

East Side Business Men Hit Upon Special Plan for Carnival.

At the first monthly banquet of the East Side Business Men's club held at the Gayosa cafe on East Stark near Grand avenue last night, a plan was launched by which the east side will have a school children's parade despite the recent decision of the school principals to the contrary. Professor M. M. Ringler, director of the East Side Athletic club, will train the children outside of school hours. The parade in which the children will take part will be but a short one and will be on one or two of the principal east side thoroughfares only. The plan was placed before the business men by Dan Kelihaer. The school children's parade is regarded by the business men as one of the principal attractions of a celebration such as the Rose Festival will be. If it will be possible to procure the parade as one of the side attractions it will add greatly to the interest of the show that will take place on that side of the river a most desirable one to witness. "Parade at Night. "In all probability the street parade of children will occur at night and along the principal thoroughfares of the east side that will be profusely decorated with arches and clusters and festoons of electric lights. All the objectionable features will be eliminated. Professor Ringler, who will be assisted by several other people, is willing to assume the task of training the children. The evening of June 4 has been set aside as an east side night, at which time there will be a carnival of masqueraders somewhat after the style of the Orleans annual Mardi Gras. For this occasion the east side clubs will erect a number of arches over the streets. In and under these decorations will occur the confetti throwing of the masqueraders and parade of the school children. The Rose Festival was the exclusive topic of discussion at the banquet of the business men's club last night. Between 50 and 60 men were present, a great many of whom were called upon for suggestions regarding different phases of the coming festival. It was the impression that the east side group

EXTRA!

This morning, after all other copy for this advertisement had been written and delivered to this newspaper, the following telegram was received from Goldfield: Goldfield, April 3.—Yesterday the Rogers lease got 105 sacks of ore that MILLS \$1,000 PER SACK. Hurrah!
This is the Rogers Syndicate lease referred to elsewhere in this advertisement. As stated, it is within 400 feet of our lease.

STARTLING GOLD DISCOVERIES

Unprecedented Finds of Amazingly Rich Ore Elbow-to-Elbow With Our Property In Goldfield, Nev.

FROM THE GOLDFIELD DAILY TRIBUNE, MARCH 29.
"Another of those sensational strikes of high-grade ore that has made Goldfield famous throughout the world was first discovered, and had it not been for it there never would have either, as it came from a depth of close to 400 feet. The discovery was made on the Rogers syndicate block of ground owned by the Florence Goldfield company. The lease is not incorporated, and there is no semblance of a stock deal connected with it. It is another illustration of what can be done with the right kind of work, and also furnishes evidence that if a lessee strikes it rich here he can take out more gold in a few months than he can find in years in almost any other mining camp in the world. In an upraise at the 400-foot level a seam of high-grade was followed, and 15 feet above the top of the drift the streak widened out to formidable dimensions, and the superintendent decided to drift on it. This drift from the upraise has been extended 25 feet on the ore shoot, and there is now in the mine a seam of ore as rich as ever was mined in Goldfield. All the rock shows gold to the naked eye, and pieces run as high as \$50,000 to the ton. It is identical in appearance with the best ore that was mined on the Hayes-Monroe lease on the M'hawk, 47 tons of which were shipped to the mill. The lease has until July 11 at midnight 11:00 a. m. that is long enough to make the owners independently rich."

THE ROGERS SYNDICATE BLOCK IS ONLY 400 FEET FROM US, AND A PART OF THE SAME MINE FROM WHICH WE HAVE OUR LEASE.

This news corresponds in cheer with a telegram we had from our president on March 31, who was then in Goldfield, but is now on his way to Portland. This strike was the next day after the Rogers.

BIGGEST STRIKE IN THE HISTORY OF GOLDFIELD.
Goldfield, Nev., March 31.—Portland-Florence Mining & Leasing Co., Room 15 Mallory Building, Portland, Oregon—Last evening the lease adjoining us on the Florence made the richest strike in the history of Goldfield. W. B. STEWART.

MORE GOOD NEWS FOR OUR STOCKHOLDERS.
The Sandstorm mine, just a little south of our 100 acres, was the first gold producer in Goldfield. It was this mine that gold was first discovered, and had it not been for it there never would have been a Goldfield, for it is the only place where surface ore is found. We therefore have pleasure in reprinting this from the Goldfield Chronicle of March 24:

FROM THE GOLDFIELD CHRONICLE, MARCH 24.
"Whether the Sandstorm is to make fortunes for another coterie of Goldfield men will be determined within the next fortnight. It has made many rich, and now has \$4,000 worth of high-grade ore sacked from a portion of the Loftus & Davis block, which produced a quarter of a million dollars in seasonally rich ore, and the present lessees are still working on immensely rich stuff. This is a sub-lease held by Ralph Waterman, William Wolverson and Doc Walton from Webb Parkison. The find was made back of the foot wall of the rich shoot which Loftus & Davis mined, and which has increased from a mere seam to 18 inches of ore that carries 4504 ounces of the yellow metal to the ton, of the value of \$84.50. From 2 1/2 feet of gangue on the sides of the rich vein, the assay shows 174 tons of ore that can be milled to good advantage. A hundred sacks containing 100 pounds or more have been filled with material of which grab (not picked) samples from the first 25 show auriferous samples of \$22.50 to the ton. From the last 15 which were filled after the shoot had grown in size, grab show the metallic contents to be \$71 to the ton. In addition the lessees have tons of lower grade which samples \$17. As the samples were taken by experienced miners, with a desire to learn exactly what they have, and assayed by Peters, there is no reason to doubt their authenticity."

FROM PRESIDENT STEWART.
W. B. Stewart, president of this company, is expected home Sunday or Monday from Rawhide and Goldfield. As stated, he leased a tract of ground in Rawhide, and in a note, hurriedly written, which we have just received, he says: "This is an A-1 lease, all right, and amongst the best, with an excellent surface showing. This certainly is a great camp. Everywhere you look men are working like a hive of bees, digging and hoisting, sweating and puffing as if their very lives depended upon getting fortunes from the ground each day they live. A lease on the Last Chance, within 100 feet of us, sold a few days ago for \$17,000. How's that? Our ground is more inviting than this. I AM SATISFIED THAT WE WILL BE SHIPPING ORE WITHIN FOUR MONTHS. This is the greatest mining camp ever discovered, judging from the surface showing and the development already done. The boom is on in full force, and there are probably 10,000 men in camp. The Florence lease is looking fine, and I have a thousand times more faith in its making us all rich than I had before we put our men to work resuming development. THERE IS NO DOUBT ON BASTE BUT WHAT WE WILL GET A GOOD PAY CHECK, AND THAT IN SIXTY DAYS OR LESS. We are making four to five feet with two shifts. Am very tired, but otherwise never felt better in my life." W. B. STEWART."

WORK OF THE LEASERS

FROM THE RAWHIDE MINER, APRIL 1.
"Every mining camp which has attained any prominence, and all the successful mining camps, have been developed by the leasers. Rawhide has at work in the hills between three and four hundred leasers, employing hundreds of men, and they are to be found in every nook and corner of this great camp. This is what appeals to the mining man and to the investor in the securities of a mining camp. They realize that where the leasers are, the gold lies not very far off. The leasers have not much money to begin with, but every hour of labor they expend is so much more development for the camp. The leasers are not to be found developing any property unless they are well assured that there is gold in the levels below. They are all practical miners, and they expect to get enough out of the ground to pay them for their labor. If they are not pretty certain of this, they would not be working here. But they are on sure ground, and they are sure of it. What more encouragement can there be made and the wonderful discoveries that are being unearthed. And the beauty of it all is that the deeper they go the better is the ore."

WE OUGHT TO SHOUT WITH GLADNESS.
Here we have assurance that our Florence lease will "make good," that our Rawhide lease is within 100 feet of a lease that sold for \$17,000, and that means that THERE IS GOLD AT THAT PLACE, and then there is being unearthed the monstrously rich ore "right up against" both our Goldfield lease and the 100 acres we own outright. What more encouragement can there be given our people today? But even now there are some who will read this advertisement, and doubt, or put off stock-buying until it is too late.

NO MORE STOCK WILL BE SOLD AFTER SATURDAY, APRIL 11, ON TERMS OF TEN PER CENT DOWN AND TEN PER CENT PER MONTH.
We are now selling on these terms, but beginning Monday, April 11, our terms will be 25 per cent down and 25 per cent per month. We also NOW reserve the right to withdraw the stock entirely or increase prices at any time without notice. The fact is, we may stop selling at any time. We are liable to strike high-grade ore any minute, and that second we will be wired to stop selling.

WE ARE CONFIDENT OUR STOCK WILL SELL AT TWO DOLLARS PER SHARE NEXT JANUARY AND FOR AS MUCH AS FIVE DOLLARS WITHIN A YEAR FROM NEXT JULY.

The Portland-Florence Mining & Leasing Company

Room 15, 228 Stark Street, Opposite Chamber of Commerce, Portland, Oregon. Phone Main 5408.
Officers—President and manager, W. B. Stewart; vice-president, W. A. Moses; secretary and treasurer, F. W. McKechnie; superintendent, E. G. Virtue.

Send us your address and we will mail you an up-to-date map of Goldfield free of charge.

OPEN EVENINGS ALL NEXT WEEK UNTIL 7 P. M.

TRAINING CIRCLE TO HOLD MEETING

The Williams avenue Home Training circle will this evening present to the school building. It is noisy and in poor repair. The building is 20 years old. The school board has discussed the placing of the structure but has been slow to start operations.
Every enterprise the Stanton Co. has placed on the market has been a money maker, no exceptions. Evanston will be the greatest of all. See it Sunday, take the 11:30 a. m. car. The Stanton Co., 179 Stark street.
