

### ABERDEEN PRESBYTERIANS DEDICATE CHURCH TODAY

First Presbyterian Church, Aberdeen, Washington; Property Valued at \$25,000.

(Special Dispatch to The Journal.)  
Aberdeen, Wash., May 2.—Tomorrow will be a red letter day in the annals of the First Presbyterian church of this place, which will dedicate its handsome new home and begin its use as a center of religious activity in the community. The Presbyterian church was the first church organized in Aberdeen, its inception dating back to March 13, 1858. The little building erected by this organization was the mother of churches in this entire section and all of the sects that followed in the wake of the Presbyterian worshipped in it until able to build their own church homes. The history of the organization was full of adversity and hardship, in keeping with the pioneer times of which it was a part. Dr. Thompson, Rev. J. W. White, Rev. H. D. Crawford and Dr. A. H. Lackey served the church well and faithfully as stated supply, the latter having been the minister of the struggling little organization for several years.

**Church Outgrows Two Homes.**  
The first regularly installed pastor was Rev. E. H. Prichard, the present incumbent, who was installed on September 1, 1902, at which time there were about 40 members on the church roll. During the past year, 140 persons have been welcomed into church fellowship, 61 on profession of faith. There is also a strong Christian Endeavor society and a flourishing Sunday school.

The present beautiful edifice is the third one to be built by this organization, and the second under Mr. Prichard's pastorate. There are few ministers who have the honor to build one church in order to provide for the growth of his organization and then within the next five years to build still larger for the same reason. At the time of the erection of the second church the first was moved away and used for a school house and for other purposes, being finally destroyed in the

big fire that devastated this city in October, 1902.

The second one was sold to the Polish Catholics last fall when the present structure was decided on and was moved.

Additional ground was obtained adjoining the old site before beginning the work of building.

**Costly and Beautiful Building.**  
Between \$13,000 and \$14,000 have been spent in the building and furnishing of the present edifice, and no time or expense has been spared in making it beautiful within and without. The work on it has been done by day labor and has been of the very best. Everything that could be bought of local dealers was obtained here, which was about everything excepting the glass and the brick used in its construction. The interior is extremely artistic, and every inch of space has been utilized. There are several memorial windows in honor of those who used to worship in the old church. The basement is finished in the most modern manner, and contains rooms for various purposes besides the social hall, where the members may gather for the social events of the church organization. It is estimated that the new building and the grounds that it occupies are easily worth \$20,000, while the manse, which was built during the present pastorate, is valued at \$5,000.

**Dedication by Dr. Holt.**  
The dedication sermon will be preached by Rev. W. S. Holt, D. D. of Portland, who canceled several important engagements in London shortly before this service. Dr. Holt is an old and valued friend of Mr. Prichard, as they were received into the old synod of the Columbia, which includes the present states of Washington and Oregon, at the same meeting, in 1884. There will be a union service of the English-speaking churches of the city at this time and the Presbyterian churches of the west and East Hoquiam will also attend.

### American Restaurant

- CORNER WILSON AND COUCH STS. OPEN DAY AND NIGHT.**  
Dinner from 11 a. m. to 8 p. m.  
Chicken soup, free with meals.
- Lettuce 10¢ Sliced Cucumbers 10¢
  - Green onions 5¢ Radishes 5¢
  - Chicken salad, mayonnaise dressing 20¢
  - Fried omelet 15¢
  - Fried razor clams 15¢
  - Fried halibut 15¢
  - Fried salmon 20¢
  - Fried tenderloin of sole, tartar sauce 25¢
  - Half cracked crab 20¢
  - Solled mackerel, drawn butter 20¢
  - Steamed little neck clams 20¢
  - Clam-bouillon with toast 15¢
  - Boiled chicken and rice 15¢
  - Chicken pot pie 15¢

### SOCIETY CRAZES AFFECT NATION

Balloon and After-Dinner Conundrum Parties Popular Fads.

London, May 2.—Two new society crazes are flourishing during these holidays—country-house balloon and after-dinner conundrum parties. Well-known aeronauts have arrived from France to join a balloon party which will start from Lord Langatock's place to Monmouth. C. Rolls will be the skipper. The conundrum parties are welcomed by the press and a certain element in society, who hope they will lead to a possible conversation revival which, it is generally agreed, bridge whist has demoralized entirely.

Mrs. C. S. Henry has given her house for a concert under the patronage of Mrs. Asquith and other notable persons. It is to be in aid of the fund of the Strand Liberal and Radical association. Mrs. Henry is one of London's most philanthropic Americans and has established a convalescent home on her estate at Henley.

### HISTORIC CRAFT TO BE RESTORED

Italy Will Raise Caligula's Jeweled Galleys From the Lake of Nemi.

Rome, May 2.—After many years of discussion and delay one of the most wonderful and precious relics of antiquity is about to be restored to Romans, and incidentally to the whole world.

All who are interested in antiquities identify with the Eternal City have heard of the two galleys of Caligula, but none but a diver has ever seen them, as they are still submerged in the waters of the picturesque Lake of Nemi in the Alban hills, near Rome.

The historian Suetonius tells us that the Emperor Caligula squandered in less than a year almost 3,000,000,000 sesterces, or about \$150,000,000,000, that all he left him by Tiberius.

Among other things, he constructed galleys of cedar and adorned them with precious stones and shells of purple silk, with reception rooms and bathrooms, and even miniature vineyards and orchards. The discovery of the two sunken galleys in Lake Nemi not only proved the veracity of Suetonius' record, but is now about to present us with the richest of Roman archaeological treasures, inasmuch as these are the only two to be discovered specimens of Roman nautical construction.

### Failed in Attempt

In the 15th century Cardinal Prospero, then the owner of Lake Nemi, employed Battista Albert, the greatest architect of the period, to try to recover the two vessels which tradition said were sunk in the lake. His attempt to raise the vessels failed. March of 1892 another attempt was made to recover the galleys. By the help of a diving bell he descended to the bottom of the lake and measured the galleys, but that was all he accomplished.

In 1905 Signor Borghet, the learned antiquarian, obtained permission to make another attempt. He brought up several projects, among them wonderful heads of animals holding rings for honoring in their mouths. At last the minister of public instruction stopped what was really a piecemeal destruction of the galleys.

**Describes Craft.**  
In Borghet's report it is stated that the two galleys are in the northwest part of the lake, one at 22 yards' distance from the bank and the other 50 yards further off; one measuring 70 yards in length and 20 in width, and the other 26 yards in length and 3 in width. The sides are irregularly covered with canvas, kept adherent by a coating of pitch. Upon the cloth are folds of thin sheet lead, so doubled over as to be of great thickness, and fastened with copper nails. The most artistic parts of the vessel were natural—the decks, which were paved in mosaic porphyry and serpentine intermixed with colored glass.

With the exception of the injuries caused by the various attempts to recover them, the two great ships are entire, and will probably bear the strain of being raised on cranes worked along an inclined plane to the shore. Therefore the Italian government has now decided to make a serious effort to restore them as far as possible to their ancient splendor.

**Remember the Date.**  
The next concert of the Portland Symphony orchestra is Wednesday evening, May 6, Heilig theatre. Reserved seats at box-office, Heilig theatre, May 4, 5 and 6.

### SPEED OF HARE FOUND BY MOTOR APPLIANCE

Paris, May 2.—An ardent motorist, who travels in a motor car, has discovered that hares are plentiful, ascertained by speedometer how fast a hare can run.

On a flat road the hare can make from 14 to 18 miles per hour. Down hill he cannot make more than 12 1/2 miles per hour.

When a hare finds himself suddenly in front of a speeding auto, he gets so frightened by the lights that his thinking apparatus becomes paralyzed, instead of jumping aside and to safety, he runs ahead and generally continues to run until the auto stops.

The tribe of pigeons is peculiarly liable to disease. A large majority of the pigeons in London are diseased in some way or other.

Love always flows beyond its object.
