

# GOVERNOR APPROVED BY BAKER

## WAG GLEDES INTO STAD SALEM

### Walks Right in and Looks Around, Walks on South Again—Portland Slow.

(Salem Bureau of The Journal, 267 State street.)

Salem, Or., May 6.—A female wag, a bleached blonde, with a full kit of curling irons, rouge and other articles for making a complete toilet, hove into Salem late yesterday afternoon. Her approach was heralded by trainmen who had passed her at Gervais, and her entry was a triumphal one, for the deputy sheriff met her at Chemawa. Dressed in dark outer garments and wearing a long cloak with a cap, and with her small satchel containing the heavy outfit, the woman hove into town swinging down the track from the north when she was first detected by Deputy Sheriff William Ech. She readily accepted the proffered hospitality of the officer.

"Hello there, sister," said the sheriff, "where are you bound for?"

"I'm looking for work. Got anything for me to do?"

"Have you any money?"

"A little," the female "vag" answered. "Wouldn't refuse the price of a meal, though I'd give most anything for a cup of tea."

"How would a jolt of rye strike you?"

"That sounds about right. That would be bully. Hand her over, pard."

When asked where she was treated on "the grit" she said other hoboes paid little attention to her and that she paid little attention to them. She stated she had started from Portland, as that was a slow place, "nothing doing." She was escorted to the city by the deputy, where she had a meal and then started again, southward.

When the sheriff was first notified he thought he had found Wolff's murderer in disguise, but was soon satisfied that he had found a real female vag the first he had even encountered.

## ALASKA HAS GOOD RANGE FOR STOCK

### Experiment Station Man Says Islands and Peninsula Are O. K.

(Special Dispatch to The Journal.)

State College, Pullman, Wash., May 6.—Dr. C. C. Jorgeson, director of the Alaska experiment station, called at the State college this week and imparted some interesting information relative to the investigations now being carried on in Alaska by the northern station. He said in part:

"We are taking large numbers of livestock to the Kadiak islands to demonstrate the possibilities of grazing in that region. Along the coast region west of Sitka for 500 miles the country is quite mountainous, but by the time the Kadiak islands and the Alaskan peninsula are reached much of the country is not nearly so mountainous and is entirely suitable for grazing. Many people do not understand that the Alaskan peninsula and the coast islands lying near by are really no farther north than Sitka, and owing to the influence of the Japan current have a very pleasant climate. It is safe to predict, I believe, that in a few years the peninsula and island regions will become quite well known as a stock grazing region. The Kadiaks, the Alaskan peninsula and all the Aleutian islands are included in this region."

At the Sitka station much attention is being given to blackberries and similar bush fruits, while in the more northern station in the Copper River valley investigations are being conducted relative to hay and cereal crops. A third station is at Tanana, which is in about the latitude of Circle City.

## NOW IT IS "NEMO WEEK"

### Thousands of Stores All Over the Country Are Celebrating This Event.

Go into almost any big store this week, from Maine to California, and you will find the corset department busily showing throngs of women the latest specialties in Nemo Corsets; not only the famous velvet-lined variety, which has carried the fame of American corset-making around the world, but a score of new and graceful models designed to give the best of support and medium figures. It is a fashion event of genuine interest to every woman who wants to develop the best lines of her figure—and that means practically the entire sex.

Most corsets are alike. Nemo Corsets are different; each one has some exclusive feature of much value, and does something that no other corset can do. Nemo Corsets give the best of support, a chance to learn how to be ultra stylish as well as hygienically comfortable.

this afternoon and evening. Late to-morrow, Dr. May (W. W.) will be given tomorrow.

## Anti-Statement Men Doomed.

Baker county, determined in its fight for the people's right to rule in the matter of choosing United States senators, will elect next June J. J. Chute, a Democratic candidate for state representative. Chute is pledged to Statement No. 1, and both Republicans and Democrats are moving without a moment's delay to elect him.

McKinney, the Republican candidate, was urged to shoulder the people's standard, but he has refused to recede from his position, and the result, in consequence even the Republican leaders of the county and city are advocating non-partisan support for Chute. His election is not questioned.

## BODY OF UNKNOWN FOUND AT RAINIER

(Special Dispatch to The Journal.)

Hot Springs, May 6.—While fishing yesterday Douglas Adams, a fisherman, brought up a very gruesome find in his net, the body of a man. Many people viewed it. The body was that of a large man, but no one had ever seen him in life, and no one had ever seen him in death. The body was concluded to be the body of a stranger that has drifted from some remote point. A large mark on his head may have been received in falling or might indicate a murderous blow.

## New Adventist School in Idaho.

(Special Dispatch to The Journal.)

Boise, Ida., May 6.—The seventh day Adventists, who are erecting a college at Eagle, near Boise, say they expect to be ready to open the school this fall. The institution is being started by members of that denomination in southwestern Idaho.

## Protect Alaska Game.

(Gated Press Leased Wire.)

Washington, May 6.—The senate today passed a bill providing protection for game in Alaska. The bill had already passed the house.

## HAI HAI HAI

### Good Digestion and Good Health Bring Joyous Life.

Whoever heard of a jolly dyspeptic? Merriment and indigestion are as far apart as the North and South poles. Don't blame the poor dyspeptic for being blue, cross, nervous, irritable and grouchy. He cannot help it. No one whose stomach is weak whose nerves are on edge, whose tongue is furred and who hesitates at eating a hearty meal for fear of the distress that will follow, can be sweet-tempered.

Take up the weak stomach muscles and get digestion working naturally by using Mi-o-na stomach tablets. This remedy is not a mere digestive that gives temporary relief only; it cures all stomach troubles by strengthening the digestive machinery and putting it into such perfect order that it will take care of all foods without distress, indigestion or flatulence.

Mi-o-na cures stomach troubles in a perfectly natural way increasing the flow of gastric juices so that life's nourishment is extracted from the food and the refuse expelled without the aid of laxatives or other medicine.

If the complexion is blotched or pimply, in nine cases out of ten it is caused by stomach troubles and cannot be cured until the stomach is regulated by Mi-o-na.

A reliable and positive is the action of Mi-o-na in curing indigestion and all stomach weaknesses that Woodard, Clarke & Co. sell the remedy under guarantee to refund the money unless it cures. Try a 50-cent box and see how quickly you will get relief from indigestion and how short a time you will forget that you have had a stomach.

## ROCKEFELLER TO INVADE RUSSIA

### American Oil King Asks for Contract to Build New Amur Railway.

(Gated Press Leased Wire.)

London, May 6.—A dispatch to the Central News from St. Petersburg says that three agents of J. D. Rockefeller are there negotiating for the construction of the Amur railway, a bill for which the house passed in the first reading last month and which the government is understood to desire to have constructed speedily.

Rockefeller's agents offer to complete the railway in five years, to use only Russian material and to employ only Russian labor.

Three factories will be erected in Siberia for the supply of material. Rockefeller does not ask a subsidy from the Russian government, but only authority to issue debentures.

The Central News correspondent adds that the proposition apparently is favorably regarded by the Russians.

A party of engineers has left St. Petersburg to make a preliminary survey of the route.

## REQUIREMENTS TO GET A SECOND HOMESTEAD

### Permissible Where First Entry Was Abandoned but Not for Consideration.

A subscriber wants to know if a person who has already proved up on a homestead of 160 acres under the old law can take another; and if he is entitled to another will he be compelled to live on it and comply with the other requirements in respect to residence.

The act of February 8, 1908, allows a person otherwise qualified to make a second homestead entry where the former entry was not cancelled for fraud or abandoned or relinquished for a consideration.

The person applying to make a second homestead entry must file in the local land office an application to enter a specific tract of land and state under the facts respecting his former entry and its relinquishment, etc. This must be corroborated by the oath of one or more persons having knowledge of the facts.

The act of June 5, 1900, allows a second homestead entry to a person otherwise qualified who, prior to that date, made homestead entry and commuted the same under the provisions of section 2201 statutes.

amendments thereto, but such second entry is not subject to commutation.

The act of May 22, 1908, allows a second homestead entry to a person otherwise qualified who, prior to May 17, 1900, made and perfected a homestead entry and thereafter failed to provide under the law opening the land for settlement, but to which land, had

## After Once Tasting Vinol

### no one wants an old-fashioned cod liver oil preparation or emulsion, because Vinol is a much better body-builder and strength creator for old people, weak children, and for coughs, colds, bronchitis, etc. If it does no good we will return your money.

Woodard, Clarke & Co., Portland, Or.

are a bad combination and the resultant strained shoulders and legs must be given careful attention if your faithful beast is to be spared to you. Prompt treatment is necessary and the best suited for the purpose is old reliable

## Mexican Mustang Liniment.

Made of oils, famous for their penetrating and healing qualities it quickly relieves soreness, soothes the injured parts and removes all stiffness from the joints and limbs.

# ROBINSON & CO.

289-291 WASHINGTON STREET, PERKINS HOTEL

Idaho's Summer Normals. (Special Dispatch to The Journal.) Boise, Ida., May 6.—The state summer normal schools at Boise, Couer d'Alene and Pocatello, provided for by the last session of the state legislature, will be held this year from July 20 to August 18. Some of the very best instructors that can be secured will have charge of the schools, and it is believed by those who have charge of the arrangements that the attendance of teachers this year will be far in excess of that of last year. An excellent program is being arranged.

Boise Men Plan a Tour. (Special Dispatch to The Journal.) Boise, Ida., May 6.—Boise business men are talking up a business man's excursion over the Pacific & Idaho Northern railway to upper Washington county.

# Three Days Yet to Get

## Florence Central Mining Company's Promotion Stock at 3 Cents Per Share!

IT'S THE BIGGEST THING IN GOLD MINES PORTLAND PEOPLE EVER KNEW

We have sold more shares in four days than ever were sold in four weeks by any mining company in Oregon, and as if good luck were camping on our trail,

We Will Begin Crosscutting From the Chedd Shaft Tomorrow Morning

As stated yesterday, the Chedd people's shaft is located so far from their present workings that the Nevada mining law compels them to sink another air shaft. They are now mining right up to our line, and we have made this deal with the Chedd management:

That Company Is to Sink a Double Compartment Shaft on the Line Between Us, for Our Joint Use, and We Are to Have the Privilege of Immediate Crosscutting From the Division Line to Which They Have Mined, and That Work Is to Begin Tomorrow

If that is not rushing matters, then we do not know what is. We stand now in exactly the position of a company at work for eight or nine months, with the advantage that our cross-cutting can be pushed with vigor from the very first morning, under more favorable conditions than were the branching out to be begun at the bottom of a new shaft, and our shaft, sunk in conjunction with the Chedd company, costs us just one third it would have cost had we started the work ourselves.

This Crosscutting Deal Enables Us to Say That We May Be in Ore Within Less Than Two Weeks—Perhaps Within a Week—and a Dividend Mine Within Six Weeks

In fact, it looks like our 3-cent-a-share friends will be getting dividends before the stockholders in some of the good Gold-field mines that have been in process of development for more than a year.

# WE ARE CERTAINLY ON THE BOUND FLORENCE CENTRAL MINING CO.

Incorporated under the laws of Oregon for \$1,000,000, divided in 1,000,000 shares of the par value of \$1 each, fully paid and non-assessable.
