dinner in 1862 asked his friend Charles Babbage how he would show both sides of a shilling at once. Babbage replied by taking a shilling from his pocket and holding it to a mirror.

This did not satisfy Sir John, who set the shilling spinning upon the dinner table, at the same time pointing out that if the eye is placed on a level with the rotating coin both sides can be seen at once. Babbage was so struck by the experiment that the next day he described it to a friend. Dr. Fitton, who immediately made a working model.

On one side of a disk was drawn a bird, on the other side an empty birdonge: when the hard was revolved on all thread the bird appeared to be in the cage. This model showed the persistence of vision upon which all moving pictures depend for their effect. The eye retains the image of the object seen for a fraction of a second after the which has been removed. This model was called the thaumotrope.

train and on the lot, is sacred, and not a man of the show would dare to think of invading their portion of either place. During the long season, many are the incidents, romantic and sordid, that happen. These incidents seldom find their way into print, for the management hardly considers them news items.

J. H. B. Fitzpatrick of the Greater Norris & Rowe circus staff was caught in an expansive mood at the Imperial hotel yesterday. He smiled in recollection of a recent romantic happening with the big circus and told the following series of sketches of the unwritten life of the circus:

"In the magic world of the arena there are many titled personages. This is especially true of the side show or annex to the big show. Here live the princess, the kings, the queens, the majors and the colonels of the mimic world, and though their titles are more or less unsettled, yet their sway for the moment is as great as the real ruleers of the world.

"Among the inhabitants of the tented city is the Princess Louise. The princess is a charming little person, a midget, some 28 inches high and 24 years of age. The little princess is able to walk under an ordinary chair, yet her heart evidently is as large as that of an ordinary person.
