

TAFT STRONG ON TRUE 13

Fulton Cohorts Are Successful in Clackamas—Bourne and Company Seem Somewhat Showed by Events of the Last Few Days.

Clackamas county has come to the front with 13 good men and true, pledged to serve as delegates to the Republican state convention under the banner of Fulton and a Taft instruction to the national delegation.

Yesterday the battle fought out in Oregon City, the stronghold of W. S. U'Ren, resulted in a clean sweep for the Fulton program. All of the delegates, according to the reports, are lined up solid for Fulton and his policy of a Taft delegation.

Lane county has also swung into the Fulton-Taft column. Yesterday afternoon the delegates to the state convention were selected in Eugene. There are 11 delegates from that county, and at the meeting yesterday 11 delegates were selected to the congressional convention and a second set of 11 to the state convention proper.

From these indications and others just as strong it would appear that Senator Bourne, John C. Young, Thomas McCusker and the second district term are on the run. The Fulton following contends that it has 24 counties solid in line for Fulton and an instructed delegation. Only one county, Lincoln, with three delegates, is conceded to be solidly for Bourne.

The Coke following seems to be falling in line with Bourne, apparently having heeded the warnings of John C. Young. The latest story bearing this out is one which relates that James Kerchem and Max Cohen, secretary of the Union Republican club, have agreed to gather at least 30 delegates to the convention and send them out lined up solid for Bourne and his slate. The Fulton men laugh loudly at the rumor and say that Bourne will not have half that many delegates when the convention is called.

LOCAL OPTION DEBATE CHALLENGE IN LINN

(Special Dispatch to The Journal.) Albany, Or., May 9.—On behalf of the Good Citizenship league of Linn county, H. Bryant as president and D. N. Williamson as secretary have issued a public challenge directed to Dr. J. L. Hill of this city and mentioned as the leader of the anti-local option forces in the county to debate the question of local option next Monday evening at 8 o'clock, Tuesday evening at 8 o'clock and Wednesday evening at 8 o'clock. The committee agrees to pay all expenses and have secured the services of Judge W. M. Madden of Corvallis to speak in behalf of the principles for which the organization stands. Should the party challenged not accept they extend the privilege to him of selecting some man to discuss the question.

FORAKER DETERMINED TO FORCE HIS BILL

(United Press Leased Wire.) Washington, May 9.—Senator Foraker announced today that on Monday he will move to make his Brownsville bill the unfinished business in the senate, which means it will be up for discussion each day until a vote is reached, as his report to Roosevelt's letters to senators that if the bill did pass he would veto it and if passed over his veto he would ignore its provisions. Foraker is determined to give Roosevelt an opportunity to carry out his threat if he can get votes enough to support him.

REALTY MEN VISIT HOOD RIVER ORCHARDS

Excursionists Taken Into Heart of Famous Apple-Growing District, and Shown Every Side of Industry—Warm Felicitations Exchanged.

Hood River people and apples had their day with the Portland Realty board yesterday. The apple city showed her hospitality and cordially welcomed more than 100 interested visitors. Many of the Portland men were accompanied by their families.

Autos and carriages met the excursionists as they left the steamer Charles R. Spencer after the trip up the Columbia river. The drive extended over twelve and one-half miles, through orchards scrupulously kept, and ranging from the full-bearing bonanza fruit farm to the newly planted places only now wrested from the forest.

Five miles out from Hood River on a 11-mile railroad, serving both logger and horticulturist, is the station Van Horn, where has just been completed a large two-story Grange hall. Here the visitors were welcomed and invited to help themselves to fine New York pippins, right from cold storage, hard and firm. They did.

Hon. A. A. Jayne, president of the Hood River Commercial club and Edward Laga, master of the Grange, spoke briefly. "Hood River is the right-hand neighbor of Portland," Mr. Laga said, "and it works in the same way for a greater Oregon."

County Division Up. Both speakers asked endorsement of the movement for division of Wasco county and the creation of Hood River county, on the ground that the interests of one section are purely horticultural and of the other entirely agricultural.

The Portland men who spoke later gave their endorsement to the question of the re-division of Hood River county in the June election.

W. L. Boise, representing H. W. Fries, president of the re-division board, who was the cordial reception and said he had noted in the past four years large additions to the acreage devoted to apple culture in the "Garden of the Gods," where fruits are picked by angels.

Secretary of the Portland board of trade said he had first heard of Oregon apples while traveling in Europe and had seen them on sale in Liverpool. He referred to the prevalence of dust and a west wind by saying

that Portland people usually raised a dust wherever they went. D. N. Mossosohn, from the Portland chamber of commerce, read the best advertising Oregon has in the world wide fame of the Hood River apple. He urged the Commercial club of growers and strawberry metropolis as well as all Oregon towns, to send more literature to the Portland chamber of commerce and to keep their permanent exhibits and renew them frequently.

It was a holiday for Hood River people and they were out in numbers to tell and show what they are proud of. Little girls in white gave apple blossoms to each excursionist.

Business Side of Horticulture. Seven miles more of sight seeing, which included winding roads among strawberry fields, soon to yield, and along the foamy and troubled coasts of Hood river, brought the real estate men to the business center of this settlement of enthusiastic fruit growers and boosters. It is a town of 3,000 population, supplying all facilities for urban life. Hood River valley, New York, by seven miles wide, has a total population of about 6,000.

Requirements and their definite enforcement in the important particulars of spraying, pruning, boxing and shipping the products of Hood River farms have made a world market for what is grown in Hood River valley. This, added to the "hang together and boost idea," has enabled growers there to realize in many cases \$1,000 an acre from their farms.

Portland boosters yesterday learned how to sell Hood River facts and came back heartily pleased with their day's experience.

Secretary Rountree declared that no possible future increase of acreage given to apple growing in Oregon will ever reduce the price received for the fruit, especially that of Hood River, so long as present precautions are observed, for the reason that the world will take all the fruit that can be grown here and pay top prices for them. He cited the high figure always paid for oranges from the orange belt in Southern California. He stated that other sections of Oregon can grow as good fruit if equal care is exercised in its cultivation.

The committee whose efforts resulted in so successful an outing was made up of J. G. Rountree, J. C. E. Fields, George Schalk and A. F. Swanson.

UNCLE SAM'S BIG TRADE ASSURED

Portland Merchants Will Get More Government Business Than Formerly.

Through the efforts of Oregon's delegation at the national capital Portland has again been restored to its position as the supply city of the north west for the army and navy, and an additional trade of several hundred thousand dollars annually has been assured. This city formerly furnished \$200,000 worth of equipment and supplies to the commissary branch of the department of the Columbia, and this trade was lost when San Francisco dealers by unfair tactics grabbed the big government trade.

The Portland chamber of commerce took up the matter with the commissary department of the army at Washington and by the aid of the senators and representatives from this state was able to secure favorable recognition for the Rose City.

Not only is the former business enjoyed by local business concerns recovered, but additional business to the amount of nearly \$500,000 has been assured.

A letter from J. B. Aleshire, quartermaster-general of the army has been received by the chamber of commerce advising it of this fair adjustment. The recent order of the department concentrating the buying of all supplies at San Francisco was manifestly unjust, as the goods sold to the government had to be shipped from long distances and could not be sold as cheaply as Portland merchants could have disposed of the same supplies.

All that the department requires under the new adjustment is that local dealers be able to quote prices which will warrant the purchase of goods at this point, and this they certainly are in a position to do. San Francisco will be cut off from an lucrative trade which the overreaching merchants of the Bay City had snatched through political influence.

SHOOTS GIRL AFTER DOMESTIC QUARREL

(United Press Leased Wire.) Baltimore, Md., May 9.—Following a domestic quarrel, Michael Gergely, who recently came here from Washington City, shot and probably fatally wounded Miss Florance last night. After shooting the girl Gergely turned the revolver upon himself and with a single shot through the temple killed himself instantly. The girl victim was taken to the Johns Hopkins hospital. It was stated at midnight that her condition was critical.

CLARKE GOES TO HIS REWARD

No, Not Dead, but the Manager of the New Cornelius Hotel.

"The man with the smile"—that is Nathaniel (Nat) K. Clarke, and for many years he has been main clerk of the Portland hotel—now is manager of the new Cornelius hotel, which will open for business at Park and Alder streets May 17.

Very few travelers who have come to the northwest have failed to meet Clarke. He is one of the drawing cards of the town and once his round, beaming face has been seen the brain registers a photographic impression that wears like the smile that won't come off. And Clarke has the smile, too. He is always smiling, except when he is laughing. When he is asleep he keeps his family awake.

Francis J. Heney has a smile that has made him famous, but Clarke—everybody calls him Clarke—makes friends. Inasmuch as Clarke is always smiling and has been for about 40 years, one can better imagine than estimate the number of friends he has. One man came to the Portland a week or so ago and said:

"Well, bless my soul, how are you?" "Clarke was 'next' in a minute—another faculty he has that makes him a good hotel man, and he said in reply: "Well, well, how are you?" "I haven't seen you in 17 years. Remember that time we threw snowballs at old man Winter's hat in 'sermont'?" And there you are. The man's name may not have been Smith, but Clarke knew the name, and he was right there with the glad hand and the smile in the house. Leave it to Clarke! He never forgets a face or friend, and the best is none too good for the man who has been longest absent.

There are many things to say about Clarke, but the best is that he is going to his reward, which he opens up one of the finest hotels in the city, and not as clerk, but as manager. If he doesn't make a success of it everybody will know that it will not be Clarke's fault.

OPEN SHOP FOR SHIPBUILDERS

Every Plant on Pacific Coast Said to Be Ready to Sign.

Open shop will be declared in practically every shipbuilding plant on the Pacific coast on June 1. This decision was reached shortly before 11 o'clock last night by the Pacific Coast Shipbuilders' association in session at the Oregon hotel. The question was put to a vote after permanent organization had been effected, and carried unanimously.

Operators of shipyards declare that for several years past their plants have been in the hands of the employees, and they have come to the conclusion that it is time they also be given say in the premises. There is no intention, it is declared, to close any plant changes in the wage scales or working hours, but rather to bring about an adjustment so that business is conducted along lines not altogether shaped by the men engaged at so much per day, week or month.

The action in line with that taken by the Willamette Iron & Steel works and other large concerns on the coast, whose large forces of mechanics are employed. G. E. Mathews of Hoquiam, who was elected secretary and treasurer of the permanent organization, stated last night that the organization counts 25 concerns as members, which means approximately 50 per cent of the plants on the coast. He said the open shop policy will affect ship carpenters, joiners and caulkers, the principal mechanics engaged in and about the shipyards. Associated with the shipbuilders are the steel fabricators, who are also engaged in the work.

"Our intention is not to cut wages or ask for longer hours, but we do expect the right of judging how much an employee is worth. If a man is worth \$5 or \$6 a day, well and good, we expect the privilege of paying him that amount, but we do object to having to

104-106 First St.

Green Front Building, Between Washington and Stark.

pay a man that much when he is only capable of earning \$2.50 or perhaps less. This uniform wage scale in different localities is working a hardship on the industry that it will not permit, especially under such conditions as might be looked for the coming summer.

Shipbuilding was greatly overdone during the rush of lumber into California and it is reasonable to suppose that there will be comparatively few steam schooners built for some time. A large percentage of the work in the yards for some time will be in the nature of repair work and it is quite necessary that the yard owners have something to say as to how the work shall be done and how much it is worth to do it.

"Our intention is to have eight hours constitute a workday as before, and so far as we have discussed it there seems no particular desire on the part of anyone to begin a crusade for the reduction of wages."

John Lindstrom of Aberdeen, was elected president of the association. It is understood that all the yards of this city are represented on the membership list.

The mechanics affected by the new resolution are strongly organized and it is said not improbable that they will declare a strike and fight the matter to a finish across the bay, since the new policy will virtually mean the abolition of the union in its present form.

Miss Lyman Goes to Whitman. (Special Dispatch to The Journal.) Pendleton, Or., May 9.—Miss Marjorie Lyman, who has been at the head of the department of music at Pendleton since the past two years, has tendered her resignation to take effect at the close of the present school year. She has accepted of the position of assistant teacher in the conservatory of music at Whitman college, Walla Walla.

Reducing the Waist Line in Both Sexes

Men and women with heavy, pendulous abdomens who wish to reduce them quickly and safely should use the following three simple household remedies which can be obtained at any drug store. Small cost, viz. 1/2 oz. Marmola, 1/2 oz. Fluid Extract Cascara Aromatic, and 1/2 oz. Syrup Simplex. These are mixed together at home and taken a teaspoonful after meals and at bedtime.

These three make a mixture that is not only perfectly harmless but is usually quite beneficial to the system, relieves the digestion, purifying the blood, and clearing the complexion of pimples and blotches. Its chief and surprising benefit is in the rapid, natural manner in which it reduces the fat portion to the normal, beautiful lines of a fine physique, it having been known to cause the resorption of as much as a pound of fat a day. Moreover, it does not only perfectly harmless but is usually quite beneficial to the system, relieves the digestion, purifying the blood, and clearing the complexion of pimples and blotches.
